

MTDS7 Super Charged NinjaTrader Strategies

MicroTrends can develop your strategy from scratch or we can super charge your strategy and provide the cheapest route with the maximum highest quality and best trading system features available for NinjaTrader by using the MTDS7 Strategy Development Kit to power your Strategy – unique to MicroTrends.

Save time and money, don't pay to re-invent the wheel get the most powerful semi/fully automated trading system possible for NinjaTrader 7 by using our MTDS7 NinjaTrader Strategy Trade Engine to power it. The MTDS7 is 100% free for sim/demo/ development /backtest/replay - it only ever needs a license for live trading.

Important Notice about NinjaTrader Strategies – The MicroTrends Difference

We can rapidly build your system using MTDS7, the features and functions in MTDS7 allow real-time interaction and control of the strategy, advanced trade management and off the shelf trade filters which can be combined with your system to optimize the trading results. One of the most important features is that it is written in an advanced mode of NinjaTrader known as "Unmanged mode."

MTDS7 Super Charged NinjaTrader Strategies

“The [Unmanaged approach](#) is reserved for VERY EXPERIENCED programmers. In place of the convenience layer that the default NinjaTrader 7 Managed approach offered, the Unmanaged approach instead offers ultimate flexibility in terms of order submission and management. The flexibility required to achieve more complex order submission techniques.” So you can be confident trading with real money on the line due to the unsurpassed reliability & features; built in intelligent, automatic fault tolerance for Errors, Overfills, Connection Loss & Order rejections handling via an institutional trade workflow engine designed by MicroTrends with 100,000s of hours of live trading and testing with 100s of traders over many years.
