Specializing in providing accurate, confidential and professional appraisals for most types of personal property assets since 1984.

Did you know we have offices throughout the United States?

Dedicated to accurate and quality appraisals beyond the standard

MIEDEMA Asset Management Group

Miedema Asset Management Group can provide many options for our clients, including asset management and recovery, complete buy outs of your assets, guarantee of selling price, inventory services, etc.

CALL US TODAY AT 1-800-LASTBID TO DISCUSS HOW WE CAN PROVIDE A VALUABLE SERVICE FOR YOUR SITUATION

MIEDEMA AUCTIONEERING, INC. LIVE DIVISION (STARTED IN 1984) is our live equipment auction division that conducts millions of dollars of traditional style auction sales annually. These auctions include construction, agricultural, industrial, commercial, business liquidations, and more. We offer real time live internet bidding to augment our professional onsite traditional auctioneers, maximizing our seller's market and increasing selling prices. When the excitement and competition of a live, traditional auction is desired, our Miedema Auctioneering, Inc. team delivers!

MIEDEMA AUCTIONEERING, INC. LIVE REAL ESTATE DIVISION has marketed millions of dollars of real estate across the country. We sell vacant land, agricultural, recreational property, homes, investment property, and commercial/industrial properties. Miedema Auctioneering, Inc. Real Estate is on the latest edge of technology, offering bidding options such as multi-par systems, the squeeze board and the internet, maximizing our seller's prices.

MIEDEMA APPRAISALS, INC. (STARTED IN 1984) specializes in providing accurate, confidential and professional appraisals for most types of personal property assets. Our team writes over 200 appraisals annually for all types of equipment and personal property, valuing millions of dollars of assets for our clients which include financial institutions, legal professionals, courts and other professionals and corporations across the globe.

CALL US TODAY FOR MORE INFORMATION AT 800-734-1112 OR VISIT US AT: MIEDEMAAPPRAISALS.COM

REPOCAST.COM, INC. (STARTED IN 2000) specializes in recovery and sales. We market commercial, business and personal property assets of all types for banks, credit unions, trustees, businesses and individuals. We have many auctions every week, typically selling over 3,000 items and attracting thousands of bidders. We have three permanent Michigan facilities, from which items sell: Grand Rapids Metro (Byron Center), Southwest MI (Wayland) and Flint Metro. Repocast.com can handle voluntary or involuntary repossessions from a whole business to a single car and more, and move these items to our secure facility to be included in our auctions.

CALL US TODAY FOR MORE INFORMATION AT 866-550-7376 OR VISIT US AT: REPOCAST.COM

ORBITBID.COM, INC. (STARTED IN 2002) brings the internet auction to your facility and sells all the assets from your location, providing an efficient and effortless auction with all the benefits of a large bidding audience. We have the latest in internet bidding technology, and a huge following of online bidders (320,000 and growing) from all over the world. Orbitbid.com conducts over 300 auctions annually totaling millions of dollars.

CALL US TODAY FOR MORE INFORMATION AT 866-672-4806 OR VISIT US AT: ORBITBID.COM

RANGERBID.COM (STARTED IN 2012) allows businesses to sell their item(s) to end users, as well as other businesses, with ease right from the seller's location. When it is not convenient for a seller to have their own auction or transport their items to one of our three fixed facilities, Rangerbid.com is your source for listing and selling your items! Rangerbid.com auctions consist of items from multiple consignors and multiple locations around the country. The Rangerbid.com team will provide a high level of customer service and security while working hard to facilitate seamless transactions by utilizing a proven state of the art internet auction technology.

CALL US TODAY FOR MORE INFORMATION AT 616-261-4984 OR VISIT US AT: RANGERBID.COM

LASTBIDREALESTATE.COM, INC. (STARTED IN 2008) specializes in selling real estate via online bidding. We market several hundred real estate properties each year for banks, credit unions, government agencies, corporations and private individuals with our unique and highly successful online auction bidding platform. Bidders from around the world are able to participate in the real estate auctions we conduct for our clients. Quickly and efficiently, we turn our client's real estate assets into cash.

Value Conclusion

Analysis and Date of the Appraisal

Pro Source Rent/All, Inc.

3725 Old 27 South
Gaylord, Michigan

At the request of:
Mr. David Russell
Pro Source Rent/All, Inc.
Caro, Michigan

Scope of the Appraisal

The purpose of this document is to create an independent, professional appraisal which provides the Fair Market Value of the machinery and equipment of Pro Source Rent/All, Inc. to assist with business management decision making.

Pro Source Rent/All, Inc. is an equipment rental company serving the general public. The equipment in this appraisal includes pickup trucks, trailers, brush chippers, chain trenchers, boats, personal watercraft, man lifts, scissor lifts, crawler mounted compact excavators, telescoping boom rough terrain lift trucks, skid steer loaders, truck tractors, ag tractors, towable air compressors, miscellaneous machinery and equipment, office furniture, office equipment, certain inventory and more. This report does not include software, real estate, intangible assets, etc.

Value Conclusion

Based on my investigation, analysis, and methods used, it is the opinion of Miedema Appraisals, Inc., considering the stated assumptions, conclusions and limiting conditions that the total Fair Market Value of the machinery and equipment of Pro Source Rent/All, Inc. in this report is:

Total Fair Market Value	\$ 1,598,250.00 USD
--------------------------------	----------------------------

Analysis and Date of the Appraisal

The effective date of this appraisal is January 8, 2018, and is subject to the market influences and economic conditions that existed on that date only. Any uses for this report outside of this date may be null and void without a signed update from a qualified appraiser. This report is intended to be used by Pro Source Rent/All, Inc. to assist with business management decision making, and is not intended for any other use.

Most of the major machinery in this appraisal is commonly used in the construction and rental industries, which is what the machinery was designed and manufactured to do. Continued use in these industries is the highest and best use of the assets in this report. The most common markets for this type of equipment are end users of the equipment and used equipment dealers that sell to end users. The information used to confirm the values given in this report come from those sources. Efforts to sell the equipment, if it becomes necessary, should be on a local, regional, national and international level in order to target the proper buyers. Much of their equipment is in average condition for its age and use and appears to be maintained well to meet the rental industry standards. Current market conditions for this type of equipment are steady, and the values in this report reflect these conditions.

The national economy has shown sustained growth and we are optimistic that it will continue to strengthen. This report is an estimate of value of Pro Source Rent/All, Inc.'s machinery and equipment as of the effective date of this report. The reader of the report should be aware that unforeseen volatility of the economy could affect the values of the assets in this report at any time.

Section 2

Overview Pictures
Value Definition

SECTION 1 • **SECTION 2** • SECTION 3 • SECTION 4 • SECTION 5 • SECTION 6 • SECTION 7 • SECTION 8

Overview Pictures

Value Definition

The objective of the appraisal is to estimate the "Fair Market Value" of the equipment.

The "Fair Market Value," hereinafter referred to as "FMV," is the amount, expressed in terms of money, that may reasonably be expected in an exchange between a willing buyer and a willing seller, with equity to both, neither under any compulsion to buy or sell and both fully aware of all the relevant facts as of the date of the appraisal. This definition of value assumes that the equipment would be removed to a new location.

This definition is taken from the American Society of Appraisers Machinery and Technical Specialty Committee's definitions.

Any users of this report must assume that this equipment would be adequately marketed by qualified and experienced brokers. The "FMV" listed in this report is the probable value for which the item would sell to the new owner and does not take into consideration expenses, such as advertising and commissions, involved in that sale.

Section 3

Appraisal Methodology

Resources

Remaining Useful Life

SECTION 1 • SECTION 2 • SECTION 3 • SECTION 4 • SECTION 5 • SECTION 6 • SECTION 7 • SECTION 8

Appraisal Methodology

Once the appraiser establishes the appropriate markets and definitions for the appraisal, he or she must consider the three accepted approaches to determining value:

The **Cost Approach** is an estimate of the cost to reproduce an exact replica of the subject property or the cost of replacing the subject property with a property of the same or like utility less accumulated depreciation. Depreciation includes losses in value due to physical deterioration as well as functional and economic obsolescence. Physical deterioration includes, but is not limited to, abuse, age, wear and tear and other factors that occur over time and with use. Functional obsolescence is the decreased ability of the item to perform the function for which it was intended. For example, a machine may be fully functional, but a newer model of the same machine may be able to perform the same function twice as fast with the same quality. The difference in speed is functional obsolescence. Economic obsolescence represents a loss in value from factors outside the appraised item such as a downturn in the economy causing a depressed demand for the end product produced by a machine that in turn could reduce the value of the machine. All of these factors must be analyzed and quantified by the appraiser and applied to the replacement/reproduction costs to determine an indication of market value.

The **Sales Comparison Approach** involves researching recent sales and offerings in the appropriate marketplaces of the same or similar equipment. Ideally, the sales of the same equipment under the same market conditions provide the most reliable source of data to determine an indication of current value. However, exact comparisons are not always available, so the appraiser must look at the sales of similar equipment and make adjustments in these sales to compensate for the differences to arrive at an indication of its current value.

The **Income Approach**, which considers the present worth of the future benefits of ownership, is not usually used when appraising individual pieces of personal property. The Income approach is generally used to value the aggregate of the assets that generate income for a business. The income approach was considered and deemed not applicable in performing this appraisal.

In completing this appraisal, I relied primarily on the Sales Comparison approach since actual recent sales of a property most accurately reflects its current value in an appraisal of this type. I paid particular attention to the marketability of the assets in their geographic location to arrive at the most probable values for the machinery and equipment listed. I used the Cost approach as a comparison when sufficient Sales Comparison data were not available to arrive at a sound conclusion. I began the appraisal process by inspecting the equipment at two locations in Gaylord, Michigan on January 8, 9 and 10, 2018. During this inspection, given the limitations of a visual inspection, attempted to record and evaluate several factors including but not limited to physical condition, age, estimated depreciation, utility, model numbers, miles, hours, serial numbers, attachments, alterations, upgrades, re-builds, etc., since all of these factors can affect value.

From the resources listed below, I collected data by researching published sales results and equipment manufacturers' and dealers' asking prices. Then using the Sales Comparison and Cost approaches to value, I determined the most probable values for the equipment listed in this report.

Resources

Resources utilized include but are not limited to: Ebay; Equipment Watch's Green Guide to Used Machinery Values; Equipment Watch's Last Bid Online Auction Reports; Equipment Watch's Serial Number Guide; Machinerytrader.com; Hot Line Construction Equipment Guide; TruckPaper.com; Michigan Truck Trader; Truck Blue Book Online; Kelley Blue Book; Iron Solutions Outdoor Power Equipment Guide; MachineryPete.com; TractorHouse.com; Fastline.com; Various Equipment Dealers; Various Internet Web Sites; Past Miedema Appraisal Data; Plus Others. All notes and digital pictures made while performing this appraisal are on file at the appraiser's business address.

Remaining Useful Life

Most of the machinery used in the everyday operations of Pro Source Rent/All, Inc. is in average condition and in working order. It appears to be maintained well to meet the rental industry standard. With normal maintenance procedures and repair, the overall average remaining useful life of the majority of the equipment should be seven to ten years or more.

Section 4

Limiting Conditions of the Appraisal
Standard Report Conditions of the Appraisal

Limiting Conditions of the Appraisal

I attempted to include all of Pro Source Rent/All, Inc.'s major equipment, but I cannot guarantee that all of their major equipment is included in this report.

I made no attempt to ascertain whether the personal property listed herein belongs to Pro Source Rent/All, Inc., or if it is subject to outstanding liens, is rented, borrowed or leased. No allowances have been made for possible liens or encumbrances. This report in no way establishes ownership of this property.

I have assumed that there are no unreported or hidden conditions with this equipment to make it more or less valuable than the reported value. If the age, manufacturer, serial number or other information were not available, I made value decisions by assuming that the equipment is similar to other equipment I have appraised in the past. Some information about the equipment was provided by personnel of Pro Source Rent/All, Inc. and is assumed to be correct. Miedema Appraisals, Inc. does not take any responsibility for the completeness or accuracy of this information.

I did not see all of the subject assets. The items I did not see have an "NS" in the condition column and are listed in the Exhibit A - Equipment Descriptions. I cannot verify if these assets exist or what their condition is. I made assumptions about this equipment based on the assets I did see. These items have been valued on a "Desktop" basis. If my assumptions about them are wrong the values herein could also be erroneous. The information for these items was provided by personnel of Pro Source Rent/All, Inc. and assumed to be correct.

The fluctuating inventory listed in the Exhibit A - Equipment Description was valued using cost information provided by the client. This cost information was assumed to reflect its retail price. Using this information, I deducted the retail price by 50% to reflect a reasonable discount a dealer would pay for the same equipment to arrive at my Fair Market Values.

The shifting inventory and Craftsman tool boxes are valued in its entirety. All items valued are not listed in the Exhibit A – Equipment Descriptions. The complete list of items was provided by personnel of Pro Source Rent/All, Inc. and is assumed to be correct. The complete list is on file at the appraisers office.

Standard Report Conditions of the Appraisal

The values presented are expressed in USD currency.

Each item number in the Exhibit A – Equipment Descriptions is valued as one lot unless otherwise noted.

Exhibit B of this appraisal report contains a representative sample of some pictures of the machinery and equipment listed in the Exhibit A – Equipment Descriptions.

Miedema Appraisals, Inc. reserves the right to change this report at any time should new data become available that warrants an adjustment in any of the values presented herein.

Certification

SECTION 1 • SECTION 2 • SECTION 3 • SECTION 4 • **SECTION 5** • SECTION 6 • SECTION 7 • SECTION 8

Certification

I certify that, to the best of my knowledge and belief:

- the statements of fact contained in this report are true and correct.
- the reported analyses, opinions and conclusions are limited only by the reported assumptions and limiting conditions, and are my personal, unbiased professional analyses, opinions and conclusions.
- I have no present or prospective interest in the property that is the subject of this report, and I have no personal interest or bias with respect to the parties involved.
- my compensation is not contingent upon the reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value estimate, the attainment of a stipulated result or the occurrence of a subsequent event.
- my analyses, opinions and conclusions were developed, and this report has been prepared, and is believed to be in conformity with the Uniform Standards of Professional Appraisal Practice.
- I am a candidate with the American Society of Appraisers' program.
- I have made a personal inspection of most of the property that is the subject of this report.
- no one provided significant professional assistance to the person signing the report.
- I have performed no services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.

Section 6

Conditions of Equipment Definitions

SECTION 1 • SECTION 2 • SECTION 3 • SECTION 4 • SECTION 5 • **SECTION 6** • SECTION 7 • SECTION 8

Conditions of the Equipment

The condition of the items in this appraisal report is determined only through observation. The following defined conditions will be used to make our analysis of the value of the equipment described herein.

New (N) - This describes a piece of equipment that is new and has never been used.

Good (G) - This term describes those items of equipment that are capable of being used to their fully specified utilization for its designed purpose without being modified and without requiring any repairs or abnormal maintenance at the time of inspection or within the foreseeable future.

Average (A) - This term describes those items of equipment that have seen normal wear and tear for their age or have been modified or repaired and are being used at or near their fully specified utilization.

Fair to Average (F-A) - This term describes those items of equipment that have seen above average wear and tear for their age but are still operating near their fully specified utilization. This term is also used to describe those items that are older or have cosmetic defects and deficiencies but are still functional and are being used at or near their specified utilization.

Fair (F) - This term describes those items of equipment that are being used at some point below their fully specified utilization because of the effects of age and/or application and which require repairs and some replacements of minor elements in the foreseeable future to raise their level of utilization to or near their original specifications. This term is also used to describe those items of equipment that are older, nearing the end of their normal useful life or show high hours/miles for their age.

Poor (P) - This term is used to describe those items of equipment that can only be used at some point well below their specified utilization, and it is not possible to realize full capability in their current condition without extensive repairs and/or the replacement of major elements in the near future.

Scrap (S) - This term is used to describe those items of equipment that are no longer able to be used to any practical degree regardless of the extent of the repairs or modifications to which they may be subjected. This equipment has been used for 100% of its useful life.

Not Seen (NS) - This term is used to describe those items of equipment not inspected by the appraiser. Descriptions and information for this equipment is obtained from other sources, and the value is established from the source's general condition description and normal valuation methods.

Terms and Conditions

Terms and Conditions

This Appraisal Report is given subject to the terms and conditions hereinafter set forth, all of which are a part hereof unless expressly set aside in writing in the pages of this Appraisal Report.

1. Unless otherwise stated herein, this Appraisal is based only on the readily apparent identity of the item(s) appraised, and no further opinion nor guarantee or authenticity, genuineness, attribution or authorship is made.
2. Unless otherwise stated herein, the appraised value(s) is based on the whole ownership and possessory interest undiminished by any liens, fractional interests or any other form of encumbrance or alienation.
3. This Appraisal is made at the request of the party(ies) named for his/her/its use. It is not an indication or certificate of title or ownership. The identification of the interest of the requesting party is simply that represented to the appraiser by such party and no inquiry or investigation has been made nor is any opinion given as to the truth of such representation.
4. The value(s) expressed herein is based on the appraiser's best judgment and opinion and is not a representation or warranty that the item(s) will realize that value if offered for sale at auction or otherwise. The value(s) expressed is based on current information on the date given and no opinion is hereby expressed as to any future value nor, unless otherwise expressly stated, as to any past value.
5. Stated values are given item by item unless clearly stated as being per lot. The total of individual item values shall not be construed as an appraisal value for the whole lot, but merely as the addition of single values. Where values are given by lot, the value per lot is for the whole, and no opinions are given as to individual or proportionate values within the lot.
6. Unless otherwise stated herein, the value(s) expressed is based on the general expertise and qualifications of the appraiser as to the appropriate market and valuation for the item(s) and purpose involved. Where particular detailed valuation information is relied upon, it will be so stated in writing.
7. Where the appraisal is based on a sample of a larger whole, it will be so stated and will be based on the assumption that the sample delivered is representative and fair. No opinion or warranty is hereby made as to the fairness or representative nature of any large whole from which the sample was drawn.
8. Where this appraisal is based not only on the item(s), but also on data or documentation supplied therewith, this Appraisal report shall so state by making reference thereto and, where appropriate, attaching copies thereto.
9. Unless expressly stated, the condition of the item(s) is good for its type, with serious deficiencies and repairs noted. Ordinary wear and tear common to this type of item(s) is not noted.
10. No portion of this report may be reproduced, copied or used in any manner by anyone other than the Client without the previous written consent of this Appraiser and then only in its entirety including all cover letters and material.
11. It is understood that this appraiser has no past, present or contemplated future interest in the items herein described and employment to make this Appraisal and compensation for it are not contingent upon the values found. Note that the Appraiser is associated with an auctioneering service and in such capacity may reserve the right for future interest only if circumstances are conducive to such services.
12. Should, in conjunction with this Appraisal, additional services of the Appraiser be requested by the Client, his Agent or Attorney, or the Court (such as for added time researching for other value purposes, pretrial conferences, court appearances, court preparations, etc.), compensation for same shall be \$250.00 an hour or \$500.00 per occurrence, whichever is higher, charged by the Appraiser at that time and shall be paid by the Client immediately upon receipt of a statement for said work.
13. If for any reason, Miedema Appraisals, Inc. determines that a conflict of interest exists between one of its present clients and the customer bound under this agreement, it may cease work under this contract, immediately notify the contractual customer of the conflict, and retain all information from the project immediately. No information will be shared nor will the contractual customer be billed for the work completed prior to the disclosure of conflict.
