## Clash of clans iphone to android transfer

Steps to transfer a Clash of Clans village from iOS to Android: Most professional app developers appreciate that you might have multiple devices or want to transfer between OS when you upgrade. The team behind Clash of Clans is one of them. 1. Install Clash of Clans on your new device and open it on both devices. 2. Open the Settings in the app menu on both devices. 3. Select Connecting a device on both devices. 4. Choose This is the old device on your iOS device and It's the new device on your Android. 5. Select I want a link to another device on the iOS device and you should see a 12-digit code. 6. Select G- on your Android device where it says Already have a village? in the tutorial. 7. You now need to be connected to Google Play Games where you can enter this 12-digit code. 8. Your village should now load and be completely up to date. 1432 Cool clan names for Clash of Clans and Call of DutySteps to transfer a clash of village clans from Android to iOS: Just reverse this process if you decide to migrate from Android to iOS. This is a small tutorial on transferring clash of clans account from one device to another which is from iOS to Android and Android to iOS. If you have any queries, let us know in the comments section below. Also, check out the best and famous games of all time: What method do you use to transfer your clash account of village clans from iOS to Android and vice versa? How do I get my game center username and password from my iPhone to my Android, so I can restore the progress of my clash of clans app? in: Community, Supercell, Support View Source Share Comments Here's how you can play your own village on both devices. This feature can also be used to transfer iOS -- Android, or vice versa. NOTE VERY IMPORTANT: Play through the tutorial on the new device and use the link BEFORE reaching Level 4 of City Hall and before doing in app purchases. If you need additional support or experience problems linking your devices, please contact the player's support via the in-app reporting feature in the game settings menu! You'll find it under the Help and Settings option. In order to transfer your village between an iOS and Android device, it must be connected to Game Center/Google. You can check the Game Center connection on iOS by logging into the Game Center and opening the game. For Android, open Clash of Clans and connect your village to Google in the game settings by clicking the button Google. Step 1: Press Link a deviceStep 2: Press the option that best matches your current deviceStep 3: Select the option that describes the device you connect toStep 4: Read the link given to you on your old device and prepare your new deviceStep 5: On your new device, write in the code given to you on your old cameraAdd a photo at this gallery Before you attempt to connect your device, please make sure you have played through the tutorial and have not made a purchase before TH4. Open Clash of Clans on both devices and follow these steps: Open the game settings window on both devices. Press the button that fits your current device. Select OLD DEVICE on the device you want to move your village to select a new device on the device you want to move your village to select the type of device you want to connect to your village. If you connect your village from an iOS to an iOS device, use the Game Center User Guide. If you're connecting your village from an Android device to another Android device, try Google Play Guide here: Google User Guide. Use the device code provided on your FORMER APPAREIL and enter it on your NEW APPAREIL. You have a 5-minute window of time before your code is invalid. Once you have successfully copied the village transfer code from one device to another, your village will be on both devices. IMPORTANT: This feature cannot be reused. Following the use of the Link a Device feature, your game will be connected to both the Game Center and Google Play. You will be able to use these services to connect your game to other devices. Can't transfer photos of disabled Galaxy S5 to the Android Smartphones 1 Nov 5, 2018 Anyone who has felt the grief of losing hundreds of hours of gameplay on a mobile device because the phone has broken or it was time to upgrade and the game data would not transfer is immediately hesitant to go through this ordeal again. You know at least one person who kept an older device around just to keep playing their favorite mobile game. Fortunately, for everyone involved, there's no need to ever worry about it with Clash of Clans. You can link your account to multiple devices, even between platforms with little difficulty. To make it even easier, we've put together this quick tutorial on moving your village Clash of Clans Clans iOS to Android. Want to know what's wrong with Clash of Clans? Check out our great explanation to get started. Plus: What is Clash of Clans and why is everyone playing it? It's surprisingly simple. The first thing you want to do is install Clash of Clans on your Android device and open the app. Leave your Android device alone for a second and switch to your iDevice. Open Clash of Clans on your iDevice and head to settings gears in the bottom right corner of the screen. In the middle of this panel, you'll see Link a device right under Sound Effects. Press this, and select It's the AERS of the two options that appear. The next menu will ask you if you are related to another iDevice or something else. Select I want a link to another device and you'll have a 12-digit code. Back on your Android device, press the G-connecting button that appears under Already Have a Village? at the top left of the game tutorial. From there you'll be connected to Google Play Games, and if you've never played clash of clans on an Android device before being asked to enter the 12-digit code of your iDevice. If you've ever played Clash of Clans on an Android device with Google Play Games installed before, you won't need to enter the code and instead, you'll be asked if you're sure you want to load your village. Even though it's been a while since you've played on an Android device before, Clash of Clans will load the current state of your village based on their servers, which will be the version you just had on your iDevice. Idevice.
