

BCIS 4730/5670 – International Issues of Information Technology Spring 2024

Dr. Chang E. Koh
Office: BLB 319A
Phone: (940) 565-3625
E-mail: Chang.Koh@unt.edu

Office Hours: 2:00 – 5:00 pm, Thursday
and by appointment in office or via Zoom

Zoom ID: 374-801-7379

COURSE DESCRIPTION

This course provides an in-depth analysis of contemporary information systems topics with emphasis on the organizational, economic, and technological impacts of computer information systems in an international business environment. It is designed to be both interesting and informative for the information systems professional who wants to better understand important international IT management issues.

COURSE OBJECTIVES

During this course the student will develop an awareness of:

- General global business and IT environments
- Roles of IT in international business
- Global IT strategy and management
- IT and global supply chain management
- Cultural, social, organizational and political issues of IT
- Factors affecting global electronic commerce
- International considerations of the adoption of new technologies
- International considerations of organizational forms and the alignment of IT services
- Strategies for global IS development
- Global IT sourcing

PREREQUISITES

- BCIS 3610/5090 (Introduction to Business Computer Information Systems) or equivalent, or consent of department.

TEXTBOOKS AND OTHER MATERIALS

- D. E. Leidner and T. R. Kayworth, Global Information Systems: The Implications of Culture for IS Management (ISBN: 978-0-7506-8648-8)
- Subscription to Wall Street Journal
(Check Canvas for subscription information - <https://cob.unt.edu/masters/subscriptions>)
- Additional articles as shown in the Class Schedule section and to be announced in class

ONLINE TOOLS

- **Canvas**
The course uses Canvas for communication between the instructor and students and among students.
- **Socrative** (www.socrative.com)
Socrative is an online polling tool and may be used for class activities.

GRADING

Point Distribution

Component	Weight
Midterm exam	25 %
Final exam	25 %
Individual research assignment	10 %
Team research project	20 %
Attendance, participation and quiz	20 %
Total	100 %

Grading Scale

Percent	Grade
90.0 – 100 %	A
80.0 – 89.9 %	B
70.0 – 79.9 %	C
60.0 – 69.9 %	D
Less than 60 %	F

INDIVIDUAL RESEARCH ASSIGNMENT

Each student will conduct research on a topic, issue or event recently reported in Wall Street Journal. The student must select a story relevant to the course and conducts additional research for background information, analysis and interpretation and prepare and submit a research report in PowerPoint (5-10 slides). Be sure you cite and credit all works used in the presentation. A minimum of 3 sources are required.

The student may present and discuss the findings of the research during a class for 5-10 minutes for additional credit.

Extra credit is also awarded for early submission. Check Canvas for details.

TEAM PROJECT

Each student will participate in a research project that investigates and reports the business and IT environment; cultural, social, organizational and political issues related to the adoption and use of IT; and any other topics relevant to the course for a country or region of choice. The objective of the project is to allow students to reinforce the theories and concepts they learn from the course by applying them to a target country or region while gaining intimate knowledge of the country or region.

Team:

Each team will consist of up to six members. It is the responsibility of individual students to find colleagues to work with as a team. Once a team is formed, each member has obligation to stay and function as a productive team member until the completion of the project. Any disputes, conflicts and problems within a team must first be resolved among the members.

Each team will elect team leader who will be responsible for coordinating various project tasks and communicating with the instructor. The performance of a team will be graded as a single unit. That is, each member of the team will get the same grade for the project. However, individual members will receive an adjusted grade at the end of the semester, which reflects the level of contribution as assessed by peers.

Presentation (50 points)

Each team will prepare and record a presentation in Zoom to report their findings on the country or region. The presentation will be evaluated for its contents as well as the quality and style of presentation. The presentation should last between 15 and 20 minutes. Submit the recorded presentation along with the PowerPoint slides to the designated Canvas site.

Report (100 points)

Each team will submit a report that summarizes the findings of the research project on the country or region. The report of 7 to 10 pages in length (double-spaced, excluding appendices) should include the following (but not limited to):

- Cover page
- Table of contents
- Executive summary
- Page number on each page (except the cover page)
- Tables and charts and their references in the report
- References of resources identified and/or used in the project

Peer Evaluation (50 points)

All members of the team will receive the same grade for the presentation and the report. At the end of the project (after the report has been submitted), the team members will anonymously evaluate each other on their levels of contribution to the project. The result of this evaluation will determine the points each member will receive for the peer evaluation part of the project grade.

ATTENDANCE AND CLASS PARTICIPATION

Regular and punctual attendance for the full class period is expected. Attendance will be recorded. You must attend the entire class to avoid being recorded absent. Any student whose absences exceed the equivalent of two weeks of the class without proper notice may be dropped by the instructor with a WF for nonattendance.

You are expected to come to class prepared. That means you will need to read the assigned chapters before coming to class and be prepared to discuss them. Attendance and class participation represent 200 possible points of your final class grade. I will assign your class attendance and participation score for each class based upon your attendance, performance on the in-class quiz, and the level of contributions you make in class. Details for grading criteria will be provided in class.

CODE OF CONDUCT AND ETHICS

Consult the University of North Texas *Student Handbook* (www.unt.edu/student/code.htm) for guidelines and policies regarding student academic conduct.

Scholastic integrity *must* be exhibited in your academic work, conduct, and methods. Course work for which you receive an individual grade *must* be your original, individual effort. If any evidence of copying, cheating, or any other form of academic dishonesty on all or part of any of your graded course work, you (and any others involved) will be given a zero for that work. A second incident will result in a grade of F in this course and a recommendation for further action by the Dean of Students.

STUDENTS WITH DISABILITIES

The College of Business Administration complies with the Americans with Disabilities Act in making reasonable accommodations for qualified students with disability. If you have an established disability as defined in the Americans with Disabilities Act and would like to request accommodation, please see your instructor as soon as possible.

EMEGENCY NOTIFICATION AND PROCEDURES

UNT uses a system called Eagle Alert to quickly notify students with critical information in the event of an emergency (i.e., severe weather, campus closing, and health and public safety emergencies like chemical spills, fires, or violence). In the event of a university closure, please refer to Canvas for contingency plans for covering course materials.
