Neurological Bases of Speech and Hearing (ASLP 4050, Section 001, Fall 2021)
University of North Texas
Class is held every Tuesday and Thursday, 3:30-4:50
Class location: SAGE 354

Your professor: Gloria Streit Olness, Ph.D., CCC-SLP
Office* ASLP 217 Gloria.Olness@unt.edu 940-369-7455
Your TA: Brynn Weber
E-mail** brynn.weber@unt.edu
Your SI: Josette Bowe
E-mail** josettebowe@my.unt.edu

*TA: Weekly study-help sessions held each Tuesday 5:00-6:00pm (on Zoom) and Wednesday 5:00-6:00pm (meet outside of Starbucks in the Union). Meetings can also be held M-F evenings, or late afternoons possible, by request. Professor: Thursday evenings 5:15-6:15pm in SPHC 217; Zoom office hours can be scheduled flexibly on other days and times.

A combination of in-person and remote office hours are available to meet the learning support needs of all students. When regular office hours do not work in your schedule, office hours can be arranged flexibly, at a time and location mutually agreed upon by student(s) and instructor(s). See page 6 of the syllabus for important information on how best to contact us and make appointments using structured emails.

**The most efficient way to reach us is by e-mail, but you can also send a message through Canvas as a backup.

Required resource

- It is required that you obtain access to the on-line student resources associated with the 5th edition of the text, as part of your book purchase, for purposes of completing the home-work assignments. Also, page numbers mentioned within lectures and study materials are pages in the 5th edition of the book. Contact the UNT bookstore and/or the publisher for information on how to obtain access to the book and its on-line resources.
- Note: If you purchase a used 5th edition of the book, it will not provide access to the online resources. You will have to purchase the online resources separately from the online publisher (Wolters Kluwer) or the bookstore.
- A copy of the 4th edition is also on reserve at the UNT library for your reference. Content parallels the 5th ed.

Suggested resource

Prerequisite course
ASLP 3025: Anatomical Bases of Speech and Hearing Sciences
(prior or concurrent enrollment strongly recommended; see professor to discuss exceptions)

What you can expect to achieve in this course
This course, for advanced undergraduate students, is designed to provide an introduction to the structure and function of the human central nervous system (brain, spinal cord) and the human peripheral nervous system, as related to the practice of speech-language pathology and audiology. Normal neurological bases for multiple aspects of communication and swallowing are addressed, as well as neuropathology associated with disorders of communication and swallowing. There is an emphasis on the reception and integration of sensation (with a focus on hearing, speech and language comprehension, tactile sensation, vision, smell and taste and proprioception), and the integration/planning and production of verbal and non-verbal responses (speech and language production; kinesics, including gesture), writing/drawing, posture, and mastication/swallowing).

Upon successful completion of this course, you will be able to:
1. discuss the gross anatomy of the central and peripheral nervous systems;
2. discuss the neuromuscular control for normal speech, swallowing and gestural movements;
3. discuss the nervous system as it relates to normal language production, language comprehension, and cognition;
4. discuss the nervous system as it relates to hearing, balance, vision, taste, smell, and touch; and
5. apply your knowledge of neuropathology toward an understanding of the clinical-pathological method as it relates to neurogenic disorders of communication, hearing, and swallowing.
What this achievement will take on your part
Emphasis is placed on your steady progress and consistent participation in this course, through regular class attendance, regular study habits, home-works, exercises and exams.

1. Consistent attendance and participation in class: every Tuesday/Thursday, 3:30-4:50
2. Regular allocation of 6 hours per week outside of class for review, reading, home-work completion, exercise completion, individual study, group study, and/or meetings with T.A., SI, or professor, which is standard for a 3 credit-hour course (i.e., 2 hours of out-of-class work for every hour in class)
   i. It is important to first study the big picture before studying details. Treat this class like you would a puzzle – look at the overall picture on the front of the box before you start trying to piece it all together.
   ii. Treat your book like an encyclopedia. Encyclopedias are not read from beginning to end. Rather, you scan across the headers and sub-headers to see the overall frame-work first, and then you dig down for the details that you need. Once you see the overall frame-work, finding and understanding detailed information becomes much easier.
3. Accessing lectures in advance of class, for note-taking and pre-study; lectures will be posted on Canvas at least 2 hours in advance of each lecture.
4. Checking your UNT email and Canvas Announcements on a regular basis. Instructors will send all class correspondences to your official UNT email address (yourname@my.unt.edu).
5. Completion of all home-works. All home-works need to be completed to earn full credit, but only the top five home-work scores count toward your grade; you learn the critical skill of how to figure out little puzzles, and we’ll also let you know explicitly which of the home-work content is test eligible.
6. Completion of exercises. You earn completion credit; very helpful in support of test preparation.
7. Preparation for and completion of five examinations.

Remember, though: Your health and safety, and that of your loved ones, come first, before school. If you are experiencing an emergency please call 911. If you are in crisis, please call the Crisis Hotline: 1-800-762-0157. If you have been exposed to COVID-19 and may have contracted the virus: email COVID@unt.edu. Mental health resources can be accessed at https://speakout.unt.edu/content/mental-health-resources. Your instructors are available to support you in your academic success, whatever your life situation, so please reach out to us anytime.

Our commitment as professor and teaching assistant
1. Careful selection of readings and materials
2. Careful preparation of lectures, in-class activities, home-works and exercises
3. Availability for discussion of course content and student progress
4. Provision of feedback on your learning, via the home-works and the five examinations; we also offer discussion of home-works and exercises outside of class (by student request).
5. Help in arranging study/discussion groups (by student request) outside of class, if this fits your learning style.

Strongly recommended participation, and associated learning goals

Class attendance: Attendance is not recorded and does not contribute to calculation of your final course grade. However, attendance is expected and required. Studying from online Power Points alone without attendance at lectures is typically insufficient for learning the material; physical models, explanations, demonstrations, and discussion of clinical cases cannot be included in the Power Points. Attendance at all lectures puts you at a strong learning advantage. You are encouraged to cooperate with classmates to share and discuss notes together as the course progresses, Later portions of course content build systematically on prior content.

Self-quizzes: Research suggests that self-quizzing optimizes learning. So from the very start, we’ll guide you in how to use this learning technique to give yourself an edge.

</table>
More about grade calculation and posting

Raw grades on home-works and exams will be posted throughout the semester on Canvas. To access Canvas go to https://unt.instructure.com/login/ldap and login with your EUID and password.

Assignment of final course grade:

- A: 90-100%
- B: 80-89%
- C: 70-79%
- D: 60-69%
- F: <60%

For purposes of final grade assignment, percentages are rounded up to the nearest whole-number percentage. For instance, a final course percentage of 79.1% would round up to 80%, which would earn a ‘B’ in the course. See the last page of this syllabus and the grading calculation spreadsheet on Canvas for guidance on how to calculate your final course grade. Ignore Canvas course grade calculations; they are grossly inaccurate.

Important details about the home-works

For each homework, answer each of the questions specified in the homework assignment/guidelines that you will find on Canvas. You will need access to Canvas and to the online resources associated with your text to complete the home-works. You should complete the whole homework, but only the multiple-choice items will submitted and graded. The home-works will be found through the text’s website at http://thePoint.lww.com. Once you are logged into the site, select “Classroom Handouts” under Student Resources. You will find Student Workbooks, divided by chapter. Your home-works are these Student Workbooks.

You are welcome to work on take-home home-works with peers. However, is to your learning advantage to be actively involved in the thinking and rationale behind your final responses to the home-work questions. It is strongly advised that you do NOT simply copy the correct (or incorrect!) answers of your peers.

Important details about the exercises

Exercises will be posted for you on Canvas. Completing exercises supports your understanding of the lecture content and how that content is clinically applied, in preparation for exams. Completed exercises that are submitted on the day of the posting of the examination guidelines earn completion credit (up to a maximum of 5% credit) as described elsewhere in the syllabus.

Important details about the examinations

Exams will be posted on Canvas with extended time provided for all students, and exams are also open-note (in Canvas using Lockdown Browser + Respondus Monitor), to accommodate the on-line testing format.

Examinations cover all course content up to and including the class day prior to the exam. Emphasis is based on frameworks, concepts, and content taught in lectures and reinforced by the readings and the associated home-works and exercises. Home-work content that may appear on the test will be so indicated on the home-work assignment sheet. Exercise content will give you practice in clinical application of course content, in preparation for related questions on the exam.

An understanding of content early in the course is essential for the learning of content in later portions of the course, so it is important to learn and retain content from each unit across the term. However, the focus of each exam will be placed on the material taught most recently, since the previous exam. Each exam will be comprised of a set of multiple-choice questions combined with a short-answer justification of the multiple-choice response (MC-with-justification), as well as one verbal response to one question (verbal-short-answer). All exams will be conducted remotely, using Canvas Lockdown Browser + Respondus Monitor (MC-with-justification), plus Zoom (verbal-short-answer). Study guidelines will be provided in advance.
**Make-up policy**

In fairness to all students in the course, each student is held to the same standards for course grading and course deadlines; no exceptions. Course deadlines can be adjusted only in extreme emergencies with advance notification, and formal documentation will be required.

**Home-works.** There is no late submission of home-works, although early turn-in of home-works is allowed. Answers to all the multiple-choice home-work questions must be turned in by the specified due date and due time. Home-works turned in late or not turned in will earn a zero for that home-work, and will reduce the home-work completion portion of your grade.

**Exercises.** Completed exercises must be submitted on the day prior to the posting of the associated exam to earn completion credit.

**Exams.** Exams must be completed on Canvas within the allotted amount of time, which will be an extended amount of time for all students (to be announced in class), and open-note, to accommodate the online testing format. Students may sit for the exam on Canvas within any time block that they can flexibly decide is best for them, between the time of exam posting and the time that the exam is due. The scheduled five examination dates found in this syllabus are fixed, and will not change. Please plan accordingly.

<th>Dec 7 submission due</th>
</tr>
</thead>
</table>

Alternate examination arrangements will be allowed only for sufficient reason and must be requested prior to the time of the scheduled exam posting, with the associated documentation, through the TA. Students who miss examinations will earn a zero. Please note the dates of all exams.

All exams are open-note, but must be completed independently by each student. Students will sign a statement of academic integrity prior to answering the first question and after answering the last question of each exam, and student test-taking will also be proctored on-line using Lockdown Browser + Respondus Monitor in Canvas. (See Academic Integrity below.)

**Office of Disability Access**

The Department of Audiology & Speech-Language Pathology cooperates with the Office of Disability Access (ODA) to make reasonable accommodations for qualified students with disabilities. If you experience any problems in arranging reasonable accommodation with the ODA, please contact the departmental chair or the ODA directly.

“The University of North Texas makes reasonable academic accommodation for students with disabilities. Students seeking accommodation must first register with the Office of Disability Access (ODA) to verify their eligibility. If a disability is verified, the ODA will provide you with an accommodation letter to be delivered to faculty to begin a private discussion regarding your specific needs in a course. You may request accommodations at any time, however, ODA notices of accommodation should be provided as early as possible in the semester to avoid any delay in implementation. Note that students must obtain a new letter of accommodation for every semester and must meet with each faculty member prior to implementation in each class. For additional information see the Office of Disability Accommodation website at http://www.unt.edu/oda. You may also contact them by phone at 940.565.4323.”
Academic Integrity
According to UNT Policy 06.003, Student Academic Integrity, academic dishonesty occurs when students engage in behaviors including, but not limited to cheating, fabrication, facilitating academic dishonesty, forgery, plagiarism, and sabotage. A finding of academic dishonesty may result in a range of academic penalties or sanctions ranging from admonition to expulsion from the University. Academic integrity is expected of all students at all times. Issues related to cheating, plagiarism, copying or distribution of assessment questions or home-work materials, or other behaviors inconsistent with the UNT student code of conduct will be dealt with according to university guidelines. Please note that it is the instructor’s belief that violations of academic integrity can be a gateway to unethical professional behavior. As a result, such behavior will always be addressed by the instructor.

UNT Academic Dates
Students are responsible for verifying the university deadlines such as census date, last day for auto W, last day to drop, beginning date to request an incomplete, last day to withdraw from the university, and last class day. For official dates and a complete schedule, refer to Registrar’s website http://registrar.unt.edu/registration/spring-registration-guide

Note from TA
This was one of my favorite undergraduate courses and I’m so excited to work with you all this semester. Dr. Olness is an amazing professor and you will learn so much from the course. The class may seem a little intimidating at first, but once you get in the swing of things and reach out when you need help, it is definitely doable. Remember the instructional team is here to help support your learning in any way we can, so please don’t be afraid to contact us!

How do students set up study-help sessions and meetings with the instructional team?

Everyone in this class is welcome to arrange for study-help sessions, in support of your learning. This includes questions about the course, wanting to review past exams, study help, guidance with the home-works, or any other topic you wish. These sessions will be held as a mixture of in-person and Zoom sessions.

The TA and professor each offer regular, weekly study-help sessions as listed at the top of the syllabus. To arrange a session with TA or professor for an alternate day/time, your first step is to prepare an email to Brynn, your TA (Brynn.Weber@unt.edu). Here’s what you must include in this email:

- In the subject line of the email, you must write “Request for study-help session (YourLastName)”
  - For example: Request for study-help session (Smith)
- Next, in the body of the email:
  - Specify who you would like to meet with (professor, TA, or both)
  - Specify the group size you are seeking:
    - An individual session (one-on-one)
    - A small-group session (e.g. a meeting of your small study group with the professor or TA)
    - An open-group session (a study-help session that would be open to any/all class members)
  - List all days and the range of time blocks when you could be available for the study-help session
    - The TA and professor will compare your schedule of availability to their schedule of availability and finalize a time accordingly
  - Specify your goals and purpose for this study-help session, so we can make this the best session possible in support of your learning.

Can I contact the professor directly?
Yes, absolutely. Please contact the professor anytime to set up a meeting. The best way to reach her is through email or Canvas messaging, using the email structure described above. Meetings can be one-on-one or in groups,
whatever is best for you. Meetings outside of her regular office hours can be held by Zoom or in person by advance appointment.

Class recordings are reserved for use only by students in this class for educational purposes. The recordings should not be shared outside the class in any form. Failing to follow this restriction is a violation of the UNT Code of Student Conduct and could lead to disciplinary action.

Helpful resources in support of your learning

A guide to some helpful pages in the coloring book. Some of the pages listed below may be more detailed than what is necessary for this class, but still may be beneficial to your learning, especially if you are a visual learner. Use this as a supplemental resource to the class lectures, readings, and exercises.

UNT provides access to the 3D anatomy resource, Primal Pictures, which may support your learning: [https://libproxy.library.unt.edu/login?url=https://www.anatomy.tv](https://libproxy.library.unt.edu/login?url=https://www.anatomy.tv)
Helpful resources in support of your learning (cont.)

A free 3D Brain app from Cold Spring Harbor Laboratory is available online at this link. This is especially helpful for learning brain anatomy and the anatomical relationships between and among brain structures.

- https://www.dnalc.org/resources/3dbrain.html

Many students enjoy learning specific neurology topics discussed on the Crash Course video series by the Green brothers. Here is a link to the Crash Course video playlist.

- https://www.youtube.com/playlist?list=PLNuqetWsrYrpv0HEwgWFZPPQVz7MFdECH

Here is a link to the 2-Minute Neuroscience video playlist. Videos like these are helpful for many learners.

- https://www.youtube.com/watch?v=zIo_500V1LM&index=2&list=PLNZqyJnsvdMqFNFyHvMFrFlXLosnwwB&t=0s

Here is a guide to some helpful videos available online from Khan Academy. Although the content of these videos does not supplant the learning benefits you will derive from your ASLP 4050 course lectures, readings, home-works, and exercises, you may find that selected content from the Khan Academy site may support your learning.

I. Biological basis of behavior: The nervous system
   a. Nervous System Questions
   b. Structure of the nervous system
   c. Functions of the nervous system
   d. Motor unit
   e. Peripheral somatosensation
   f. Muscle stretch reflex
   g. Autonomic nervous system
   h. Gray and white matter
      i. Upper motor neurons
   j. Somatosensory tracts
   k. Cerebellum
   l. Brainstem
   m. Subcortical cortex
   n. Neurotransmitter anatomy
   o. Early methods of studying the brain
   p. Lesion studies and experimental ablation
   q. Modern ways of studying the brain

II. Neural Cells
   a. Neural cells questions
   b. Introduction to neural cell types
   c. Overview of neuron structure
   d. Overview of neuron function
   e. Astrocytes
   f. Microglia
   g. Ependymal cells
   h. Oligodendrocytes
   i. Schwann cells

III. Neuron membrane potentials
   a. Neuron membrane potentials questions
   b. Neuron membrane potentials questions 2
   c. Neuron action potentials: The creation of a brain signal
      i. Concentration gradients
      ii. Resting membrane potential
      iii. How action potentials work
      iv. Refractory periods
   d. Action potential velocity
      i. Some signals are very fast
      ii. Size
      iii. Sheath
      iv. Consider the following
   e. Neuron graded potential description
   f. Neuron resting potential description
   g. Neuron resting potential mechanism
   h. Neuron graded potential mechanism
   i. Neuron action potential description
   j. Neuron action potential mechanism
   k. Effects of axon diameter and myelination
   l. Action potential patterns

IV. Neuronal synapses
   a. Neuronal synapses questions
   b. Signal propagation: The movement of signals between neurons
      i. How does information travel
      ii. The synapse
      iii. The Pre-Synaptic Cell
      iv. Neurotransmitters
      v. Post-Synaptic Cell
      vi. Consider the following
   c. Synapse structure
   d. Neurotransmitter removal
   e. Neuroplasticity
Guidance for students in the course grade calculation process

Your professor and TA have provided an automated Excel file on Canvas, to assist you in calculating your final course grade; you’ll find this Excel file alongside the syllabus on Canvas. You can also run the calculations by hand, if you’d like, using the “John Doe” guidelines below.

Course grades on each assignment will be posted by the instructional team as percentage scores; the grading and posting process may take up to a week’s time. Only the individual assignment grades posted as percentage scores on Canvas by the instructional team are accurate. You must IGNORE the automated course grade calculation function performed by Canvas, in the far-right columns, as it does not allow for accurate weighting of scores and will be grossly inaccurate.

John Doe turned in 7/8 home-works. His scores were 85, 96, 73, 89, 95, 100, 100, and 0 (this is the home-work that was not turned in). He completed and submitted 4/5 exercises. On his five exams, he scored 94, 82, 90, 76, and 88.

To calculate John’s final grade, first calculate how much of the 10% points he earned for the home-work grade. Drop the three lowest scores (0, 73, and 85). Multiply the remaining 5 highest home-work scores each by .02 and then add up all of the results.

\[ 96 \times .02 = 1.92\% \]
\[ 89 \times .02 = 1.78\% \]
\[ 95 \times .02 = 1.9\% \]
\[ 100 \times .02 = 2\% \]
\[ 100 \times .02 = 2\% \]

This means John earned 9.6% of the maximum 10% he could earn for his home-work grade.

Next, we will calculate his home-work completion grade. He turned in 7 out of 8 of the home-works. Looking up the percentage points earned for 7 home-works turned in (found on page 3 of the syllabus), John earned 3% of the 5% he could have earned. Add this 3% to his home-work percentage.

\[ 9.6\% + 3\% = 12.6\% \]

Next, we will calculate his exercise completion grade. He turned in 4 exercises. Looking up the percentage points earned for 4 exercises turned in (found on page 3 of the syllabus), John earned 4% of the 5% he could have earned. Add this 4% to the sum of his homework percentage and his home-work completion percentage.

\[ 12.6\% + 4\% = 16.6\% \]

The only part left to calculate is the percentage he earned on his five exams. Multiply each of the exam grades by .16 and then add up all of the results.

\[ 94 \times .16 = 15.04\% \]
\[ 82 \times .16 = 13.12\% \]
\[ 90 \times .16 = 14.40\% \]
\[ 76 \times .16 = 12.16\% \]
\[ 88 \times .16 = 14.08\% \]

Lastly, just add the percentage calculated earlier (the sum of the home-work grade percentages, and the homework and exercise completions credits) to the exams percentage that you just found.

\[ 16.6 + 68.8 = 85.4\% \]

Thus, John Doe earned an 85.4% for his final course grade. This rounds up to 86%, and he earns a ‘B’ in the course.

Note:
- If there are any policy changes (i.e. grading, attendance) during the semester, a new/revised syllabus will be issued and given to all students.
- The course syllabus is on file in the ASLP departmental office.
UNT encourages everyone to wear a face covering when indoors, regardless of vaccination status, to protect yourself and others from COVID infection, as recommended by current CDC guidelines. Face covering guidelines could change based on community health conditions.

Students are expected to attend class meetings regularly and to abide by the attendance policy established for the course. It is important that you communicate with the professor and the instructional team prior to being absent, so you, the professor, and the instructional team can discuss and mitigate the impact of the absence on your attainment of course learning goals. Please inform the professor and instructional team if you are unable to attend class meetings because you are ill, in mindfulness of the health and safety of everyone in our community.

If you are experiencing any symptoms of COVID-19 please seek medical attention from the Student Health and Wellness Center (940-565-2333 or askSHWC@unt.edu) or your health care provider PRIOR to coming to campus. UNT also requires you to contact the UNT COVID Team at COVID@unt.edu for guidance on actions to take due to symptoms, pending or positive test results, or potential exposure.

If your health condition or health risk status warrants that you watch the class via live streaming, the passcode is: 4050
