RESEARCH

Research Interests:

My research interests lie in partial differential equations and its applications to differential geometry and physics. Understanding solutions of $\Delta u + f(u) = 0$ continues to be a major goal among mathematicians interested in elliptic partial differential equations. In several collaborative efforts, we have studied localized radial solutions of $\Delta u + K(|x|)f(u) = 0$ in all \mathbb{R}^N and on the exterior of the ball of radius $R > 0$.

SERVICE

Professional Activities:

Organized the 101st Annual Texas Section of the MAA Conference which was held at UNT March 31-April 2, 2022. About 150 people attended the conference. (I organized the 2020 Meeting which was to be at UNT but was it canceled due to COVID-19 about 2 weeks before the conference). I had to reserve rooms in the Gateway Center, make arrangements for a banquet, provide refreshments, invite several principal speakers, make a webpage, make up Math Bowl questions, arrange to have several of the talks available on zoom, reserve blocks of rooms at 4 hotels (with Jana's help), arrange travel and accommodations for several of the principal speakers, arrange to provide wifi for participants, provide judges for undergraduate talks, provide certificates for winners of the Math Bowl and of the Best Undergraduate Talks, provide pizza for Math Bowl participants, work with people at UNT to allow participants to register online.

This took a significant amount of time in the 2019-2020 and 2021-2022 academic years. Some faculty members and staff provided assistance including Pieter Allaart, Kelli Chase, Kiko Kawamura, Nirmala Naresh, Kristi Nelson, Ralf Schmidt, and Jana Watkins but I took care of most of the other details.
