

CSCE 2100: Foundations of Computing
Section 400, 100% Online
COURSE SYLLABUS, Spring 2026
Department of Computer Science and Engineering
University of North Texas

Instructor

J. Ubaldo QUEVEDO

Jesusubaldo.Quevedo-torrero@unt.edu (preferred communication option)

Office: Discovery Park E250G

Office Hours: Mondays and Tuesdays 4:00 pm to 4:50pm by Zoom and by appointment

<https://unt.zoom.us/j/9876304928>

Office hours are for the Spring 2026 semester only from January 12 to May 1st, 2026.

Teaching Assistant:

CSCE 2100 - 400 - Foundations of Computing		
Name	Email	Office Hours
Sivani Ammisetti	AmmisettiSivani@my.unt.edu	Check Canvas

Course Description:

Conceptual and formal models, efficiency and levels of abstraction as used in the field of computing, combinatorics and conditional probability, basic operations of sets, functions, relations, trees and graphs, regular expressions, deterministic finite automata and non-deterministic finite automata to describe patterns in strings.

Expected Student Outcomes

Student Outcomes are measurable achievements to be accomplished by the completion of the degree. These outcomes are evaluated as part of our ABET accreditation process.

Computer Engineering Students:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Computer Science Students:

1. Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Apply computer science theory and software development fundamentals to produce computing-based solutions.

Expected Course Outcomes:

Course Outcomes are measurable achievements to be accomplished by the completion of the course. These outcomes are evaluated as part of our ABET accreditation process.

1. Define and use the basic operations of sets, functions, and relations.
2. Define and demonstrate the basic properties of trees and graphs.
3. Use elementary graph and tree algorithms including traversals and searches.

4. Describe assertions in propositional logic form.
5. Describe simple circuits, I/O, and satisfiability using Boolean logic.
6. Use combinatorics and conditional probability in solving real-world problems.
7. Demonstrate a solid foundation in conceptual and formal models by describing loop structures in summation and/or product notation.
8. Demonstrate an introductory knowledge of finite state machines.

Course Structure

Lecture Section 400(100% Online):

This course takes place 100% online. Your interaction with the instructor and with your fellow students will take place on Canvas. There are 16 weeks of content that you will move through. I will be opening a new module per week. Participation in video conferences, if there is any, is optional. This course is not self-paced but self-directed and requires students to read the textbook, other course resources posted on canvas and practice the material independently. You must complete in sequential order ALL activities and assignments listed in each of the modules and take three exams to successfully finish this course.

Credit hours: 3

Dates: January 12 to May 8, 2026

Communication Expectations: You will be expected to regularly check university email and attend your online class regularly by being aware of assignments, quizzes, and other materials in addition to participating in weekly online discussions. For in-depth assistance with the course content, you are expected to meet with the IA/TA prior to meeting with the instructor. For quick questions, email is preferred, and you can expect a response within 48 hours during the work week (M-F 9am-4:30pm, no Saturday, no Sunday). For questions requiring more elaboration or discussions not appropriate for the IA/TA, office hours are preferred.

For a grading issue, do not post your question as a comment after we have graded an assignment because we do not see those comments unless we revisit every graded assignment. Please email your grading issue questions.

Topics

1. Abstraction
2. Sets
3. Relations
4. Graphs
5. Trees
6. Propositional Logic
7. Boolean Algebra
8. Automata
9. Combinatorics
10. Series

AI Resources: The use of AI resources such as Google or ChatGPT is prohibited during exams or wherever indicated in specific assignments. Otherwise, it is permitted for educational purposes and enrichment.

Syllabus Revisions:

This syllabus may be modified as the course progresses should the instructor deem it necessary. Notice of changes to the syllabus shall be made through Canvas and/or in-class announcements.

Materials

All materials (readings, videos, tutorials, quizzes, and assignments) will be accessible online and posted on the course Canvas site on the respective class day at the latest.

REQUIRED TEXTBOOK

Our textbook is an electronic book

ZyBooks: CSCE 2100: Foundations of Computing

1. Click any zyBooks assignment link in your learning management system (Do not go to the zyBooks website and create a new account)
2. Subscribe.

A paid subscription is required. Students may begin subscribing on Dec 29, 2025, and the cutoff to subscribe is Apr 23, 2026. Subscriptions will last until May 22, 2026.

Technical Requirements and Skills

Minimum Technology Requirements

- Computers are **required for this class**
 - **You must have access to a computer system with access to the Internet and capable of installing software and running Lockdown Browser. Chromebooks are not appropriate for an online class because you can't perform software installations.**
 - Quizzes and exams use the Canvas quiz system
 - [Canvas Technical Requirements \(https://clear.unt.edu/supported-technologies/canvas/requirements\)](https://clear.unt.edu/supported-technologies/canvas/requirements)
 - Students will be expected to open Google Colab accounts or Download Python on your system, and other software as needed and indicated in class. For your convenience and to avoid some software installations, you might have to open a Gmail account for this class. Otherwise, you must download software and perform installations as needed.

Course Requirements

Readings, Quizzes, and Exams

Exams: Exam days are already posted and are considered fixed.

Missed exams: Exams cannot be missed. Proof of extenuating circumstances needs to be approved by the dean of students, but we do not have make-up exams.

Course assignments. There are several course assignments. You need to solve the problems given and submit your answers by or preferably before the due date. Please do not work on course assignments the day before they are due. Getting sick the day before the due date, it will not give you an extension. However, most course assignments have a 3-day emergency penalty free extension labeled as “Available Until” in Canvas. The emergency time extension should be used only to complete an assignment submission and NOT to start working on the assignment. There are no further extensions after the emergency extension. **WE DO NOT ACCEPT ASSIGNMENTS SUBMISSIONS BY EMAIL.**

GRADING

Your course grade will be determined by a combination of the following:

- ZyBook Activities: 11%
- Online Discussion Assignments: 20%
- Quizzes: 20%
- Exams: 49%
 - Exam 1: 15 %
 - Exam 2: 15 %
 - Final Exam: 19 %

Total 100%

Grading Scale: A>=90, B=80-89.9, C=70-79.9, D=60-69.9, F=0-59.9 %.

Extra Credit Options

*Extra credit is optional. Be aware that we might not have any extra credit activity during this course. You do not have to participate in them to get an A in the course. These non-mandatory activities cannot be substituted or made-up. Extra credit activities would be special assignments with different point values. They are optional and they will be averaged separately from regular assignments. The final grade listed on Canvas will not include the extra credit. The final average extra credit percentage will be multiplied by 2.5 points, and those points will be considered only for determining the final letter grade. For example, if at the end of the course, a student has a 68% final score on Canvas for regular assignments, and such student has 100% in extra credit assignments. Then, to determine the student's final letter grade, we will do $68\% + 100\% * 2.5 = 70.5\%$. The extra credit would change that student's grade from D to C. However, another student with a final score on Canvas for regular assignments of 74% with an extra credit average of 100%, will not change the student grade of C to a B because $74\% + 100\% * 2.5 = 76.5\%$ which is still a C. In conclusion, extra credit is optional, you must qualify to validate your extra credit, additionally, extra credit only helps those students with borderline letter grade limits since the maximum points added to your final score is 2.5 points. Further, letter grades are not reflected on Canvas. Letter grades are posted on my.unt.edu.*

To qualify for extra credit, you should not have incurred any of the penalties indicated in the next section.

Penalties

Incurring any of the following penalties disqualifies you to receive any extra credit.

1. **Cheating:** Cheating on tests and programs will be dealt with very severely. You must make a diligent effort to prevent other students from seeing your test answers. Keep your paper covered and do not let your eyes wander during tests. You should not receive or give help to others while taking an exam. We also monitor responses to course assignments generated by AI resources such as ChatGPT.

First offense of Receiving or giving help while taking an exam= -25% deducted from grade

Second offense of Receiving or giving help while taking an exam= 0% in the exam. The exam will not be graded.

One or more incidents of cheating in exam= 0% in Exam

Cheating on a second exam= F in the course

2. **Plagiarism:** Plagiarism is a form of cheating. Copying someone else's program, changing a few lines, and turning it in as your own is plagiarism; thus, this is cheating. Each student writes his or her own programs. You should not receive or give help to others on any program that goes beyond help in deciphering syntax errors. **First time penalty = 0% in assignment, second time penalty=F in the course.**
3. Inappropriate multiple requests of changing a grade for any of the following statements or something similar: (1) Being in probation, (2) last semester, (3) core course, (4) financial situation, (5) Being sick, (6) suspended from the university, (7) family issues, (8) others.

Course Evaluation

Student Perceptions of Teaching (SPOT) is the student evaluation system for UNT and allows students the ability to confidentially provide constructive feedback to their instructor and department to improve the quality of student experiences in the course.

Expectations

1. **Examination Policy:** Exams will be on the computer using the Canvas quiz system and Lockdown Browser. You need to have access to a computer capable of installing and running Lockdown Browser. Time will be limited, and all work will be individual. Exams will focus on the most recent material but are expected to be cumulative in scope.
2. Each student will be responsible for completing the assigned reading, exercises and attending classes.
3. **Attendance and in-class activities:** Since this is an online class. Participation in weekly online discussions is considered as attending the course.
4. If you miss participating in online activities, you are still responsible for knowing everything that took place. Your absence does not change the due date of an assignment. Even if you document that you were sick, you still must find available opportunities to complete the missing assignment. Being ill does not excuse nor

waive any assignment. If an illness incapacitates you for a long period of time, you might consider in the best interest of your educational experience to request from the dean of students a medical withdrawal from the course.

5. **Grading Issues:** Once a grade has been posted for a course assignment, grading issues need to be addressed with graders first. Do not contact the instructor unless the grading issue is not solved by graders. However, you must contact the instructor if the grading issue is not solved by the graders. Additionally, we only have one week after a grade has been posted to address grading errors or any other issues. We cannot correct grades that have been posted on canvas for longer than one week.

6. Tentative Course Schedule

Week	Dates	Topic
1.	1/12-1/16	Module 1: Abstraction
2.	1/19(MLK Day)-1/23	Module 2: Sets
3.	1/26-1/30	Module 3: Relations
4.	2/2-2/6	Module 3 and 4: Relations and Graphs
5.	2/9-2/13	Module 4: Graphs
6.	2/16-2/20	Exam Review and Exam 1
7.	2/23-2/27	Module 5: Trees
8.	3/2-3/6	Module 6: Logic
9.	3/9-3/13 Spring Break	Spring Break
10.	3/16-3/20	Module 6: Logic
11.	3/23-3/27	Module 7: Boolean Algebra
12.	3/30-4/3	Module 7: Boolean Algebra and Exam 2
13.	4/6-4/10	Module 8: Automata
14.	4/13-4/17	Module 9: Combinatorics and counting
15.	4/20-4/24	Module 10: Series
16.	4/27-5/1	Review Final Exam
17.	5/2-5/4	Final Exam Online and available from Saturday 5/2/26 at 12:00AM to Monday 5/4/26 at 11:59PM

UNT Policies

Academic Integrity Policy

Academic Integrity Standards and Consequences. According to UNT Policy 06.003, Student Academic Integrity, academic dishonesty occurs when students engage in behaviors including, but not limited to cheating, fabrication, facilitating academic dishonesty, forgery, plagiarism, and sabotage. A finding of academic dishonesty may result in a range of academic penalties or sanctions ranging from admonition to expulsion from the University.

ADA Policy

UNT makes reasonable academic accommodation for students with disabilities. Students seeking accommodation must first register with the Office of Disability Accommodation (ODA) to verify their eligibility. If a disability is verified, the ODA will provide a student with an accommodation letter to be delivered to faculty to begin a private discussion regarding one's specific course needs. Students may request accommodation at any time; however, ODA notices of accommodation should be provided as early as possible in the semester to avoid any delay in implementation. Note that students must obtain a new letter of accommodation for every semester and must meet with each faculty member prior to implementation in each class. For additional information see the ODA website (<https://disability.unt.edu/>).

Emergency Notification & Procedures

UNT uses a system called Eagle Alert to quickly notify students with critical information in the event of an emergency (i.e., severe weather, campus closing, and health and public safety emergencies like chemical spills, fires, or violence). In the event of a university closure, please refer to Blackboard for contingency plans for covering course materials.

Retention of Student Records

Student records pertaining to this course are maintained in a secure location by the instructor of record. All records such as exams, answer sheets (with keys), and written papers submitted during the duration of the course are kept for at least one calendar year after course completion. Course work completed via the Canvas online system, including grading information and comments, is also stored in a safe electronic environment for one year. Students have the right to view their individual record; however, information about student's records will not be divulged to other individuals without proper written consent. Students are encouraged to review the Public Information Policy and the Family Educational Rights and Privacy Act (FERPA) laws and the University's policy. See UNT Policy 10.10, Records Management and Retention for additional information.

Acceptable Student Behavior

Student behavior that interferes with an instructor's ability to conduct a class or other students' opportunity to learn is unacceptable and disruptive and will not be tolerated in any instructional forum at UNT. Students engaging in unacceptable behavior will be directed to leave the classroom and the instructor may refer the student to the Dean of Students to consider whether the student's conduct violated the Code of Student Conduct. The University's expectations for student conduct apply to all instructional forums, including University and electronic classroom, labs, discussion groups, field trips, etc. Visit UNT's Code of Student Conduct (<https://deanofstudents.unt.edu/conduct>) to learn more.

Access to Information - Eagle Connect

Students' access point for business and academic services at UNT is located at: my.unt.edu. All official communication from the University will be delivered to a student's Eagle Connect account. For more information, please visit the website that

explains Eagle Connect and how to forward e-mail Eagle Connect (<https://it.unt.edu/eagleconnect>).

Student Evaluation Administration Dates

Student feedback is important and an essential part of participation in this course. The student evaluation of instruction is a requirement for all organized classes at UNT. The survey will be made available during weeks 13, 14 and 15 of the long semesters to provide students with an opportunity to evaluate how this course is taught. Students will receive an email from "UNT SPOT Course Evaluations via IASystem Notification" (reply@iasystem.org) with the survey link. Students should look for the email in their UNT email inbox. Simply click on the link and complete the survey. Once students complete the survey they will receive a confirmation email that the survey has been submitted. For additional information, please visit the SPOT website (<http://spot.unt.edu/>) or email spot@unt.edu.

Getting Help

Technical Assistance

UIT Help Desk (<http://www.unt.edu/helpdesk/index.htm>)

Email: helpdesk@unt.edu

Phone: 940-565-2324

In Person: Sage Hall, Room 130

Walk-In Availability: 8am-9pm

Telephone Availability:

- Sunday: noon-midnight
- Monday-Thursday: 8am-midnight
- Friday: 8am-8pm
- Saturday: 9am-5pm

Laptop Checkout: 8am-7pm
