CSCE 5215: Machine Learning
COURSE SYLLABUS, Fall 2022
Department of Computer Science and Engineering
University of North Texas

Instructor
J. U. QUEVEDO-Torrero
Jesusubaldo.QUEVEDO-torrero@unt.edu (preferred communication option)

Office: Discovery Park Building E250G
Office Hours: Mondays and Wednesdays 12:45 am to 2:15pm by appointment at doodle
Office hours are for fall 2022 only from August 29 to December 16, 2022

Teaching Assistants:

Course Description:
Machine learning is the process of applying algorithms to learn directly from data to make predictions and decisions without being explicitly programmed. Topics include a wide variety of supervised learning methods, both regression and classification, with an emphasis on those that perform well on large feature sets. Ensemble methods are used to combine independent approaches efficiently. Unsupervised and semi-supervised methods will demonstrate the power of learning from data without an explicit training target or goal.

Learning outcomes: Students in this course will learn how to apply sophisticated algorithms to large data sets, with a focus on practical application. The goal will be to create models that can make automated predictions or classifications on new data or make inferences on unlabeled data to aid in understanding and future prediction models.
Course Structure
Time: Fr 10:00AM - 12:50PM
Location: NTDP B185
Credit hours: 3
Dates: May 16, 2022-Jul 8, 2022

Communication Expectations: You will be expected to regularly check university email and attend class regularly. When you miss a class, you are expected to check the course calendar shortly after class to be aware of assignments, quizzes, and other materials. Questions not answered in class are best asked before or after class. For in-depth assistance on course content, you are expected to meet with the GA/TA prior to meeting with the instructor. For quick questions, email is preferred, and you can expect a response within 48 hours during the work week (M-F, no Saturday, no Sunday). For involved questions or discussions not appropriate for the GA/TA, office hours are preferred.

Tentative topics
Machine Learning concepts
Supervised learning, part 1
Model validation and selection
Supervised learning, part 2
Feature selection and feature engineering
Ensemble methods: bagging, boosting
Unsupervised learning: PCA, ICA
Clustering: K-means and DBSCAN
Semi-supervised learning: label spreading

Course Objectives
By the end of the course, students will be able to:
1. Properly collect and organize data to extract relevant features for learning
2. Build predictive models, both regression and classification, using a variety of modeling strategies
3. Use unsupervised learning techniques to understand high dimensional data sets
4. Apply advanced techniques such as reinforcement learning for robust behavior in complex, changing environments

PREREQUISITE
Prior programming experience and data structures.

Materials
All materials (readings, videos, tutorials, quizzes, and assignments) will be accessible online and posted on the course Canvas site on the respective class day at the latest.
RECOMMENDED TEXTS
Although no text is required, the following textbook is highly recommended:

- Additional online resources (however many other resources are available)
  - Elements of Statistical Learning
  - Tom Mitchell's Machine Learning course

Your class notes are your best study guide for this course. Anything discussed in class may be in your exams or quizzes regardless of time spent on them.

Technical Requirements and Skills
Minimum Technology Requirements
- Computers are required for exams and in-class activities
  - In-class exams: You will need to bring a laptop on exam days. These will be done individually on your computer in class. You will be expected to connect to the UNT wireless network.
  - Quizzes and exams will use the Canvas quiz system
    - Canvas Technical Requirements ([https://clear.unt.edu/supported-technologies/canvas/requirements](https://clear.unt.edu/supported-technologies/canvas/requirements))

- Computers are required during class
  - There will be occasional in-class activities along with lecture that are required that help in understanding and applying the material

- Students will be expected to Download and install Anaconda Python version 3 and be able to open a Jupyter notebook, Google Colab and other software as needed and indicated in class.

Course Requirements
Readings, Quizzes, and Exams

Quizzes (in-class): These quizzes are meant to focus students on the important aspects of the readings or lectures.

Exams: Exam days are already posted and are considered fixed. Missed exams: Exams cannot be missed without prior arrangements or later documented proof of extenuating circumstances.

Assignments

Assignments are designed to engage you in your learning, so you can begin to apply these principles in practice and tailor them to your needs.
Assignments are generally due at the end of the day one week after they are assigned, unless otherwise specified. **WE DO NOT ACCEPT ASSIGNMENTS SUBMISSIONS BY EMAIL.**

**Short presentations:** There are far more tools and techniques than we can possibly cover, many which may be particularly relevant to your interests. Also, the ability to distill complex topics into a form useful for the audience is a critical skill to develop. **Students will be expected to present one concept, tool, or technique which goes beyond what is covered in the course.** Each presentation is to be 5-10 minutes on the whiteboard or with slides. These presentations will be concentrated on 2 days in the course calendar. Only a basic familiarity is expected of students observing the presentations.

**GRADING**

Your course grade will be determined by a combination of the following:

- In-Class Activities (online-discussions, quizzes): 20%
- Assignments: 20%
- Short Presentations: 10%
- Exams: 40%
  - Exam I: 15%
  - Exam II: 15%
  - Final Exam: 20%

Total 100% (No curve or relative grading)

**Grading Scale:** A=90, B=80-89.9, C=70-79.9, D=60-69.9, F=0-59.9 %.

**Your class notes are your best study guide for this course.**

**Course Evaluation**

Student Perceptions of Teaching (SPOT) is the student evaluation system for UNT and allows students the ability to confidentially provide constructive feedback to their instructor and department to improve the quality of student experiences in the course.

**Expectations**

1. **Examination Policy:** Exams will be on the computer using the Canvas quiz system. You need to bring a laptop on the appropriate exam days. Quizzes and exams must be taken in the classroom unless special accommodations have been made through the Office of Disability Accommodation (ODA). Another other accommodations must be given by prior arrangement with the instructor, otherwise documentation proving an extenuating circumstance will have to be provided after the missed exam. Time
will be limited, and all work will be individual. Exams will focus on the most recent material but are expected to be cumulative in scope.

2. Technical errors during exams: If during an online quiz or exam there is a technical error which affects your ability to complete the assignment, you are immediately to let the quiz or exam proctor know and the instructor will discuss ways to allow you to resume the test without giving an unfair advantage. In the event of any unexpected server outage or any unusual technical difficulty which prevents students from completing a time sensitive assessment activity, the instructor will extend the time windows and provide an appropriate accommodation based on the situation. Students should immediately report any problems to the instructor.

3. Each student will be responsible for completing the assigned reading, exercises and attending classes.

4. Attendance: You are expected to attend lectures and to complete all readings, however, this course does not use participation points and there is no penalty for missing days without exams, or group project efforts. There is no need to let the instructor know you have missed a class; however, you are responsible for keeping up with the material covered in the class if you are not present. If a class is missed, you are expected to proactively reach out to classmates, the TA, or the instructor if there are any questions. Individual attendance is not required except on group projects and exam days. There is no direct participation grading. There will be a sign-in sheet to record attendance for class analytics and administration.

5. If you miss a class, you are still responsible for knowing everything that took place. Your absence does not change the due date of an assignment.

6. Generally, late submission of any class work is not allowed. However, late assignments might be submitted with reduction of points 20% per weekday.

7. Cheating: Cheating on tests and programs will be dealt with very severely. You must make a diligent effort to prevent other students from seeing your test answers. Keep your paper covered and do not let your eyes wander during tests. You should not receive or give help to others on any program that goes beyond help in deciphering syntax errors. Plagiarism: Plagiarism is a form of cheating. Copying someone else's program, changing a few lines, and turning it in as your own is plagiarism; thus, this is cheating. Each student is to write his or her own programs.

The penalty for cheating and/or plagiarism is an F as final grade in this course, but a zero in the assignment/exam might be assigned for the first offense. Additionally, there will be no opportunity to re-do assignment/exam that got a zero for cheating/plagiarism.

8. Topics or discussions unrelated to class, suggestions about the logistic of the course are all welcome outside class, but are considered disruptive during class and will affect negatively your “class contribution” grade, and may impact at the discretion of the instructor your final grade.

9. If you use laptops and other electronic devices, they should be used to enhance your class engagement level.

10. Cellular Telephones and Pagers in Class and Lab: Along with your instructors, many students find these both distracting and rude. As a courtesy to all involved, please either turn off your cellular telephone or pager or disable the ring tone during lecture and lab. If you must use the phone, please leave the classroom or lab and go to a place that will not interrupt others.

UNT Policies

Academic Integrity Policy
Academic Integrity Standards and Consequences. According to UNT Policy 06.003, Student Academic Integrity, academic dishonesty occurs when students engage in behaviors including, but not limited to cheating, fabrication, facilitating academic dishonesty, forgery, plagiarism, and sabotage. A finding of academic dishonesty may result in a range of academic penalties or sanctions ranging from admonition to expulsion from the University.

ADA Policy
UNT makes reasonable academic accommodation for students with disabilities. Students seeking accommodation must first register with the Office of Disability Accommodation (ODA) to verify their eligibility. If a disability is verified, the ODA will provide a student with an accommodation letter to be delivered to faculty to begin a private discussion regarding one’s specific course needs. Students may request accommodation at any time; however, ODA notices of accommodation should be provided as early as possible in the semester to avoid any delay in implementation. Note that students must obtain a new letter of accommodation for every semester and must meet with each faculty member prior to implementation in each class. For additional information see the ODA website (https://disability.unt.edu/).

Emergency Notification & Procedures
UNT uses a system called Eagle Alert to quickly notify students with critical information in the event of an emergency (i.e., severe weather, campus closing, and health and public
safety emergencies like chemical spills, fires, or violence). In the event of a university closure, please refer to Blackboard for contingency plans for covering course materials.

**Retention of Student Records**
Student records pertaining to this course are maintained in a secure location by the instructor of record. All records such as exams, answer sheets (with keys), and written papers submitted during the duration of the course are kept for at least one calendar year after course completion. Course work completed via the Canvas online system, including grading information and comments, is also stored in a safe electronic environment for one year. Students have the right to view their individual record; however, information about student’s records will not be divulged to other individuals without proper written consent. Students are encouraged to review the Public Information Policy and the Family Educational Rights and Privacy Act (FERPA) laws and the University’s policy. See UNT Policy 10.10, Records Management and Retention for additional information.

**Acceptable Student Behavior**
Student behavior that interferes with an instructor’s ability to conduct a class or other students' opportunity to learn is unacceptable and disruptive and will not be tolerated in any instructional forum at UNT. Students engaging in unacceptable behavior will be directed to leave the classroom and the instructor may refer the student to the Dean of Students to consider whether the student's conduct violated the Code of Student Conduct. The University's expectations for student conduct apply to all instructional forums, including University and electronic classroom, labs, discussion groups, field trips, etc. Visit UNT’s Code of Student Conduct (https://deanofstudents.unt.edu/conduct) to learn more.

**Access to Information - Eagle Connect**
Students’ access point for business and academic services at UNT is located at: my.unt.edu. All official communication from the University will be delivered to a student’s Eagle Connect account. For more information, please visit the website that explains Eagle Connect and how to forward e-mail Eagle Connect (https://it.unt.edu/eagleconnect).

**Student Evaluation Administration Dates**
Student feedback is important and an essential part of participation in this course. The student evaluation of instruction is a requirement for all organized classes at UNT. The survey will be made available during weeks 13, 14 and 15 of the long semesters to provide students with an opportunity to evaluate how this course is taught. Students will receive an email from "UNT SPOT Course Evaluations via IASystem Notification" (noreply@iasystem.org) with the survey link. Students should look for the email in their UNT email inbox. Simply click on the link and complete the survey. Once students complete the survey they will receive a confirmation email that the survey has been submitted. For additional information, please visit the SPOT website (http://spot.unt.edu/) or email spot@unt.edu.

**Getting Help**
Technical Assistance
UIT Help Desk (http://www.unt.edu/helpdesk/index.htm)
Email: helpdesk@unt.edu
Phone: 940-565-2324
In Person: Sage Hall, Room 130
Walk-In Availability: 8am-9pm
Telephone Availability:
  • Sunday: noon-midnight
  • Monday-Thursday: 8am-midnight
  • Friday: 8am-8pm
  • Saturday: 9am-5pm
Laptop Checkout: 8am-7pm
