

EENG 3810 Communication Systems

Spring 2018

Tues & Thurs, 11:30 AM – 12:50 P.M

Classroom: DP B227

Instructor: Dr. Kamesh Namuduri

Office: DP B234

Phone: 940-369-8960

Email: kamesh.namuduri@unt.edu

Office Hours: M/W 10 AM – 12 Noon or by appointment

TA: Ms. Roya Norouzi, B239, RoyaNorouzi@my.unt.edu

Course Description

This course introduces the concepts of transmission of information via communication channels. Topics include signal and systems (Fourier analysis), amplitude and angle modulation for the transmission of continuous-time signals, analog-to-digital conversion and pulse code modulation, and the basic principles for the analysis and design of digital communication systems.

Textbooks

- **Required:** B.P. Lathi and Z. Ding, *Modern Digital and Analog Communication Systems*, Fourth Edition, ISBN-10: 0195331451, Oxford University Press, 2009.
- **Reference:** S. Haykin and M. Moher, *Communication Systems*, Fifth edition, ISBN-10: 0471697907, Wiley, 2009.

Prerequisites

EENG 2620 Signals and Systems; EENG 3510 Electronics I; and MATH 1780 Probability Models or MATH 3680 Applied Statistics.

Basic MATLAB skills (recommended)

Grading Policies

Homework and MATLAB Assignments: 30% (10% **Penalty** if late for each day)

Mid-term Exams (2): each 20%

Final Exam: 20%

Class Participation and Project: 10%

General Comments

- Students are encouraged to discuss class material with one another in order to better understand concepts. However, homework submitted individually. Direct or indirect copying of a solution (from friends, solution manuals, and Internet) will be considered as plagiarism and a violation of the University Honor Code. Minimum penalty for cheating is “F” grade in class.

- Homework assignments are to be turned in at the beginning of the class on the due date. Late submission (Homework and Project) will be accepted with 25% penalty for each day.
- The exams are open book with one page (8 ½ x 11) of notes. Make up exams may be given only under exceptional circumstances and with prior approval of the instructor.
- All students are responsible for announcements made in lecture, on the student access website, or via the class email list.
- It is the responsibility of students with certified disabilities to provide the instructor with appropriate documentation from the Dean of Students Office (see <http://www.unt.edu/oda>).

Class Schedule (tentative)

Week	Topics	Reading
1	Introduction, Signals, and Signal Space	Ch. 1, Ch. 2
2	Signal Space	Ch. 2 and 3
3	Fourier analysis	Ch. 2 and 3
4	Midterm I	
5	Fourier analysis	Ch. 3
6	Amplitude modulation	Ch. 4
7	Amplitude modulation	Ch. 4
8	Amplitude modulation	Ch. 4
9	Midterm II	
	Break	
10	FM and PM	Ch. 5
11	FM and PM	Ch. 5
12	FM and PM	Ch. 5
13	Sampling, PCM, Digital Communications	Ch. 6
14	Sampling, PCM, Digital Communications	Ch. 6
15	Project Presentation	
16	Final Exam
