**Office Location:** Sycamore Hall, Room 126

**Class Time:** Tuesdays and Thursdays, 3:30 – 4:50 pm

**COURSE DESCRIPTION**

The distinction Nature/Culture is central to Western thought and experience and shaped Anthropology as a discipline since its beginning. However, a huge ethnographic production, especially since the 1970s, is showing that this conceptual framework is not universal. As Lévi-Strauss already pointed out in the classic *The Elementary Structures of Kinship* (1949), to anthropology the separation between Nature and Culture is a methodological strategy. Environmental Anthropology, as a subdiscipline that focus on how societies deal with the idea of environment, must considers this conceptual background.

The course is organized in two moments. In the first part, we are going to explore how the separation between Nature and Culture informs anthropological production, analyzing works that show the limits of this conceptual division to deal with certain ethnographic contexts. We will also explore how anthropologists can contribute to these contexts. In the second part, we will explore works that consider contemporary environmental issues, and the many ways that people deal with them.

**PRE-REQUISITES**

None.

**LEARNING OBJECTIVES**

- Understand how the division Nature/Culture establishes the basis for the anthropological approach to environmental problems.
- Identify different modes of dealing with environmental problems and conflicts.
- Analyze environmental problems through the lens of anthropology.
- Explore possibilities of mediation of environmental conflicts.

## HOW TO BE SUCCESSFUL IN THIS COURSE

- Read all the material, taking notes of the main objectives and main arguments/concepts/ideas of each article/chapter
- Attend the classes and be engaged - bring questions and comments about the readings, take notes. **There is no wrong question!!!**
- Prepare and deliver original assignments (please check the **University Policy on Student Academic Integrity** and the **Department Policy on Student Academic Integrity** sections)

## A NOTE ON READING THE COURSE MATERIAL

I expect you to **read** the papers and chapters assigned **before each class**. Look for the main ideas of the author in each reading. What are the concepts that the author is using? How do they dialogue with other readings assigned to this course? Write down comments, extract quotes, and most importantly: take notes of your questions and bring them to class. Once again: there is no wrong question! Keeping track of the readings **weekly** will be important in preparing your assignments.

All the students are encouraged to read all the texts, but **Graduate** students will have more readings (2 readings each week), do longer Assignments, and are expected to explore more deeply theories and concepts presented in the readings.

## COURSE STRUCTURE

The first class will be a presentation of the course syllabus and schedule, and the moment for the students to present themselves and their expectations. In the following classes we will discuss the concepts and theories related to the readings, do practical exercises, and explore audiovisual material. Once again: read the texts **before the classe**.

Students are strongly encouraged to deliver letters of reasonable accommodation during faculty office hours or by appointment. Faculty members have the authority to ask students to discuss such letters during their designated office hours to protect the privacy of the student.
