BCIS 5120.003/004

Instructor Information
Name: Kane J. Smith, PhD.
Email: Kane.Smith@unt.edu
Office Location: 304B
Office Hours: TBA

Course Description, Structure, and Objectives
Foundations of business information systems analysis and design. Concentration on contemporary design methodologies and computer-aided software engineering techniques. Topics include strategic information systems planning, requirements analysis, user interface design, data design, process design, system testing, ethics and system audit ability, control and security.

Prerequisite: None

Course objectives: Upon successful completion of this course the student will:
- Be familiar with traditional and current methodologies for new systems development
- Understand the concept of the life cycle of an information system
- Understand the importance of systems analysis and design
- Understand the tasks of the systems analyst and the skills required to perform them
- Understand the importance of feasibility analysis and business modeling
- Be familiar with the unified process as a systems development methodology
- Understand object oriented concepts such as encapsulation, inheritance, and polymorphism
- Be able to develop functional and structural models of the system using UML
- Be familiar with project management concepts and software tools
- Understand the importance of documentation
- Understand the role of computer assisted software engineering (CASE) tools
- Understand the importance of data modeling and data normalization
- Understand the importance of user interface design and usability

Required/Recommended Materials
- No Textbook is required. All materials are provided by the instructor on Canvas.
- All supplementary materials and/or readings are provided by the instructor on Canvas.
- Technology requirements for courses with digital materials:
  - This course has digital components. To fully participate in this class, students will need internet access to reference content on the Canvas Learning Management System and other required equipment or software. If circumstances change, you will be informed of other technical needs to access course content. Information on how to be successful in a digital learning environment can be found at Learn Anywhere (https://online.unt.edu/learn).

ADA Accommodation Statement
The University of North Texas makes reasonable academic accommodation for students with disabilities. Students seeking reasonable accommodation must first register with the Office of Disability Access (ODA) to verify their eligibility. If a disability is verified, the ODA will provide you with a reasonable accommodation letter to be delivered to faculty to begin a private discussion regarding your specific needs in a course. You may request reasonable accommodations at any time; however, ODA notices of reasonable accommodation should be
provided as early as possible in the semester to avoid any delay in implementation. Note that students must obtain a new letter of reasonable accommodation for every semester and must meet with each faculty member prior to implementation in each class. Students are strongly encouraged to deliver letters of reasonable accommodation during faculty office hours or by appointment. Faculty members have the authority to ask students to discuss such letters during their designated office hours to protect the privacy of the student. For additional information, refer to the Office of Disability Access website (http://www.unt.edu/oda). You may also contact ODA by phone at (940) 565-4323.

Communication Practices
The best way to connect with me is through email and/or by attending office hours. During busy times, my inbox becomes rather full, so if you contact me and do not receive a response within two business days, please send a follow up email. A gentle nudge is always appreciated. Additional meetings via Zoom can be set up by appointment.

Ethics/Code of Conduct
Students found to be in violation of academic integrity standards will incur penalties ranging from a failing grade of a specific assignment to a failing grade in the course. Cheating on an exam or assisting others in cheating, misrepresenting others’ work as your own, and severe plagiarism (over 30% similarity on the project) will result in a grade of F in the course. All academic integrity violations will be reported to the Academic Integrity Office.

Assessing Your Work
There are no late submissions accepted in this course. This is a project-based and group-based course and it is the responsibility of each group to ensure it is done according to the dates listed in Canvas. There are 3 individual submissions in this course beyond the group-based work; Mid-term exam, Final Exam and AS10/11.

The following is the grading scale for the course I will use to calculate your final grade:

A = 90-100%
B = 80-89%
C = 70-79%
D = 60-69%
F = 50-59%

Point totals are broken down as follows:

<table>
<thead>
<tr>
<th>Assignment</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Weekly Assignments</td>
<td>1000</td>
</tr>
<tr>
<td>Mid-term Exam</td>
<td>200</td>
</tr>
<tr>
<td>Final Exam</td>
<td>200</td>
</tr>
</tbody>
</table>

**TOTAL 1400 points**

The following criteria will apply to the grading of Assignments and Exams:
A - Work that demonstrates not only a clear understanding of the material under study, but also a superior ability to utilize that material in the assignment. All criteria are met. The student’s work goes beyond the task and contains additional, unexpected or outstanding features.

B - Work that demonstrates a good understanding of the material under study, and utilizes the material well in the assignment. The student meets the assignment criteria, with few errors or omissions.

C - Work that minimally demonstrates a basic or technical understanding of the material under study, and uses some relevant material in the assignment. Work may not address one or more criteria or may not accomplish what was asked.

D/F - Work that is incomplete, inappropriate and/or shows little or no comprehension of the material under study.

Managing Teamwork

Students will be randomly assigned to teams at the beginning of the class. All team members are expected to contribute equitably to the project. It is up to the team to determine equitable distribution of responsibilities for the project. If a team member is not actively contributing to the project, the team is allowed to fire a team member at any time before the date indicated in the schedule. In order to fire a team member, the team should first issue a warning to the non-contributing team member which clearly states the expectations of contributions, followed (no less than one week later) by a firing notice signed by all remaining team members sent to the team member and the instructor. A team member fired from a team will not receive credit for any assignments submitted by the team after the date of “firing”. Similarly, a team member can elect to quit a team following a similar process. A team member fired by a team or voluntarily leaving the team may team up with other “unemployed” student, or submit remaining assignments individually. Individual submissions will be evaluated using the same criteria as group submissions. At the end of the semester, each team (except for those dismissed from the team) will submit a peer evaluation document signed by all team members reflecting individual contributions to the project. Below average contribution of a team member as reflected in team evaluation may result in downward adjustment of individual project grades.

Class Attendance and Participation

In-person class attendance is expected. No standard accommodations for non-attending students will be provided. Come on time and stay for the duration of each class. It is critical that you not only attend class meetings, but are fully engaged and participating in such meetings. Excessive absences and failure to participate will impact your grade. Specifically, more than 3 absences without a documented medical reason may reduce your overall points by ½ a letter (50 points) and more than 6 absences may reduce your grade by 1 letter (100 points). Coming to class late (defined by the instructor as 10 minutes or after the scheduled start time) more than 3 times may reduce your overall points by (25 points) and more than 6 times may reduce your overall points by ½ a letter (50 points). In addition, if you must miss a class, you remain fully responsible for all material, changes in the schedule, and other information given during class.
Student Conduct

Students are expected to behave in a respectful and professional manner when in class and when interacting with the instructor and other students. Talking in class during the lecture is very disruptive even when done at a low voice. If you want to contribute or ask a question, please raise your hand. Students engaging in disruptive behavior, including talking during the lecture without an explicit permission, will be asked to leave the classroom resulting in an absence and a corresponding grade penalty as described in the section on attendance. Disruptive students, including those talking in class without permission of the instructor, who refuse to leave the class will incur grade penalties up to a failing grade in the course, will be reported to the Dean of Students, and may be forcefully removed from the classroom by the UNT police.

Professional Communication

Students will communicate with the instructor verbally and in writing using professional language. All written communication will be composed using proper grammar and spelling. All electronic communication will be conducted over email (not on canvas). All student emails to the instructor will be sent from the student’s official UNT email with a subject line starting with: BCIS 5120: <Type of concern>. Emails sent in violation of these guidelines will be ignored. All grade related questions and concerns need to be communicated in writing over email (not on canvas) with the subject line: BCIS 5120: Grade Concern. Any grade-related emails should only contain information relevant to the grade in question. Any references to your grades in other courses, or the impact of the grade on your overall academic standing are non-relevant and will result in the grade concern being dismissed.
## Course Requirements/Schedule

Schedule is subject to change as necessary. Any updates will be announced and posted on Canvas.

Week 16 during 12/13-16
College of Business and University Policies and Procedures

Academic Integrity Standards and Consequences

According to UNT Policy 06.003, Student Academic Integrity (available at https://vpaa.unt.edu/fs/resources/academic/integrity ), academic dishonesty occurs when students engage in behaviors including, but not limited to: cheating, fabrication, facilitating academic dishonesty, forgery, plagiarism, and sabotage. A finding of academic dishonesty may result in a range of academic penalties or sanctions ranging from admonition to expulsion from the University.

Additional information regarding RCOB and ITDS academic integrity policies and practices will be posted on the Canvas site.

Acceptable Student Behavior

Student behavior that interferes with an instructor’s ability to conduct a class or other students' opportunity to learn is unacceptable and disruptive and will not be tolerated in any instructional forum at UNT. Students engaging in unacceptable behavior will be directed to leave the classroom and the instructor may refer the student to the Dean of Students to consider whether the student's conduct violated the Code of Student Conduct. The university's expectations for student conduct apply to all instructional forums, including university and electronic classroom, labs, discussion groups, field trips, etc. The Code of Student Conduct can be found at https://deanofstudents.unt.edu/conduct.

Health-related Absences

Students are expected to attend class meetings regularly and to abide by the attendance policy established for the course. If you cannot attend a specific class section due to a health-related reasons, it is important that you communicate with the me prior to being absent so that we can discuss and mitigate the impact of the absence on your attainment of course learning goals. If you experience a medical emergency that may result in more than one absence or inability to submit assignments on time, please notify the Dean of Students and the instructor as soon as possible to minimize the impact on academic standing.

Student Evaluation Administration Dates

Student feedback is important and an essential part of participation in this course. The student evaluation of instruction is a requirement for all organized classes at UNT. The survey will be made available during weeks 13, 14 and 15 of the long semesters to provide students with an opportunity to evaluate how this course is taught. Students will receive an email from "UNT SPOT Course Evaluations via IASystem Notification" (no-reply@iasystem.org) with the survey link. Students should look for the email in their UNT email inbox. Simply click on the link and complete the survey. Once students complete the survey they will receive a confirmation email that the survey has been submitted. For additional information, please visit the SPOT website at www.spot.unt.edu or email spot@unt.edu.

Emergency Notification & Procedures

UNT uses a system called Eagle Alert to quickly notify students with critical information in the event of an emergency (i.e., severe weather, campus closing, and health and public safety emergencies like chemical spills, fires, or violence). In the event of a university closure, please refer to Blackboard for contingency plans for covering course materials.
Emergency Evacuation Procedures for Business Leadership Building

Severe Weather. In the event of severe weather, all building occupants should immediately seek shelter in the designated shelter-in-place area in the building. If unable to safely move to the designated shelter-in-place area, seek shelter in a windowless interior room or hallway on the lowest floor of the building. All building occupants should take shelter in rooms 055, 077, 090, and the restrooms on the basement level. In rooms 170, 155, and the restrooms on the first floor.

Bomb Threat/Fire. In the event of a bomb threat or fire in the building, all building occupants should immediately evacuate the building using the nearest exit. Once outside, proceed to the designated assembly area. If unable to safely move to the designated assembly area, contact one or more members of your department or unit to let them know you are safe and inform them of your whereabouts. Persons with mobility impairments who are unable to safely exit the building should move to a designated area of refuge and await assistance from emergency responders. All building occupants should immediately evacuate the building and proceed to the south side of Crumley Hall in the grassy area, west of parking lot 24.
