This course juxtaposes Anglophone science fiction with some of the most enduring questions in US & British political culture.. Science fiction has long been recognized as a form that, far from being escapist, is actually intensely concerned with the social, political, economic, and ethical landscapes of contemporary society. Indeed, its concern with society as it is and as it may evolve through technology is one feature which distinguishes it from fantasy or horror, two related and often overlapping forms.

However, most scholarship has not extensively explored the relationship between science fiction works and their national or political contexts. This course sets out to ask questions about Anglophone culture and science fiction works. One of the key questions is to ask whether or not these works can be considered as emerging from a particular political context, or whether science fiction may have energies within it that defy those kinds of categorizations. If not recognizably “American”, then how should we consider science fiction literature from the United States?

Thus, it makes sense to ask how US-American science fiction has directly confronted contemporary social issues, and related American concepts such as freedom and equality. It also makes sense to ask how this form of writing has taken up matters of race, gender, identity, economic inequity, and justice. The matter is complicated in part

by the way science fiction futures often imagine alternative forms of government, often world or global authorities.

Course Objectives

Write weekly responses demonstrating an ability to identify key elements in each text that deal with one or more of the semester's key issues.

Write both a Mid-Term and a Final Essay that presents a persuasive argument about one or more key issues stemming from the readings.

Prerequisites

There are no required prerequisites for this course. However, in order to be successful in this course you will need to:

Demonstrate strong writing composition skills.

An ability to read deeply and consistently across the semester. Most texts will require between 5 and 8 hours of reading per week.

Reliable access to a secure online portal.
