INTRODUCTION

The organizational complexity of libraries often comes as a surprise to new librarians who are thrust into positions that require the application of managerial skills as part of their first assignments in rural, small or specialized libraries. Likewise, professionals advancing in their careers to positions of greater responsibility frequently are required to assume administrative and managerial roles on a variety of levels. SLIS 5300 Management of Information Agencies is designed for current and future information professionals who are interested in learning more about the theory and practice of management. It is a highly interactive course and requires in-depth exploration and discussion of topics presented in the course modules.

GRADUATE CATALOG COURSE DESCRIPTION

Management principles and practices. Problem-solving, public relations and program development. Libraries and information centers and their social and political context. Coping with change. Facilities and equipment. Representative research and data analysis.

COURSE GOALS AND OBJECTIVES

To study and discuss historical approaches to management; to become knowledgeable about the application of management principles and functions as they relate to the management of library and information organizations; to explore and analyze real-world management issues in the professional literature; to encourage students to pursue independent study and research; and to provide students with opportunities to interact with local and regional public library leaders and practitioners.
COMPETENCIES and OBJECTIVES

By the end of the course students will be able to:

1. Analyze the theory and application of planning, organizing, staffing, directing, and controlling within libraries and information centers.
2. Appraise the changing role of the manager of libraries and information centers within the total institution and/or organization to which information and services are being provided.
3. Identify current trends and issues in library management and administration.
4. Gain an understanding of organizational culture and structure in information organizations, and how these environmental issues relate to and affect governance and management.
5. To gain a better understanding of the dynamic of organizational change, and the manager’s role in the process.

COURSE METHOD

The course will be a combination of lectures, reading assignments, field-observation, written assignments, research and module exercises and presentations. Students will be expected to complete assignments and projects, participate in module discussions and exercises.

The outline of the content of the course will generally follow the text by Stueart & Moran, however, there will be both required and optional supplementary readings which will accompany each unit of the course. Lectures, discussions and individual reports along with case studies will be used throughout the course. Topics covered will include: planning, organizing, staffing, directing, coordinating, reporting, budgeting, managing, public relations, professional ethics, and current issues.

COURSE ACCESS

The course content for SLIS 5300 is accessible only using WebCT Vista. Students registered for the course with a valid UNT EUID AND PASSWORD will have access to the WebCT Vista pages.
