Course Description: In Math 2700, we will cover linear equations in linear algebra, matrix algebra, determinants, vector spaces, eigenvalues and eigenvectors, and orthogonality.

Prerequisites for Math 2700: Math 1720.

Textbook:

- **Title:** Linear Algebra and Its Applications, 3/E
- **Authors:** David Lay
- **Publisher:** Addison-Wesley Publishing Company

Exams & Grading Policy: Your final grade will be based on homework (your two lowest homework scores will be dropped), two midterms, and a comprehensive final. The midterms will be on March 9th and on April 20th. The final exam will be on May 13th. Please make sure that you are available at those dates, since there will be **NO** make up exams!

The grade is comprised of

- Homework (20%),
- 2 Midterms (40%),
- Comprehensive Final (40%).

You are encouraged to study together and help each other throughout the semester. If everyone does well, everyone will receive a good grade.

Homework: I will announce homework assignments in class. The assignments are *usually* due on Thursdays at the beginning of each class period. Late homework will **NOT** be accepted for any reason. Your two lowest homework scores will be dropped.

Need extra help? You may want to check out the UNT Math Lab (in GAB 440) to get extra help with the homework. Hours (Jan 25-May 8): Mo-Th 7am-9pm; Fr 7am-4pm; Sa 12pm-5pm (closed Sundays and Holidays). Furthermore, <http://www.math.odu.edu/~bogacki/cgi-bin/lat.cgi> is a useful website. It can solve many linear algebra problems and show you step-by-step how to solve them.

Expectations: You should come to every lecture. It is your responsibility to obtain notes from another student if you miss class. You are expected to read the assigned sections and work on the homework problems immediately after they are assigned. In addition to attending lecture, you should spend at least 6 hours per week on my course.

Extra Credit: Do NOT expect to be able to do some extra work to help your grade either before or after the final exam. There will be NO extra credit other than perhaps an extra problem on an exam.

Disabilities: It is the responsibility of students with certified disabilities to provide the instructor with appropriate documentation from the Dean of Students Office.

Cheating: No cheating will be tolerated. Anyone caught cheating will receive an F in the course. Furthermore, a letter will be sent to the appropriate dean.

Lecture schedule: The following *Tentative Lecture Schedule* gives you an idea what material I *intend* to cover in this class, but note that the schedule *might change* often. You are responsible for all announcements/assignments made in class!
