Course Description: In Math 2730, we will cover vectors and analytic geometry in 3-space, multivariable functions and their derivatives, extreme values, double and triple integrals, and applications.

Prerequisites for Math 2730: Math 1720.

Textbook:

- **Title:** [Calculus, 2nd ed](#)
- **Authors:** Briggs, Cochran, and Gillett
- **Publisher:** [Pearson](#)

Exams & Grading Policy: Your final grade will be based on homework, two midterms, and a comprehensive final. The midterms will be on Feb 23rd and on Apr 6th. The final exam will be on May 11th. Please make sure that you are available at those dates, since there will be NO make up exams!

The grade is comprised of

- **Homework (20%),**
- **2 Midterms (40%),**
- **Comprehensive Final (40%).**

You are encouraged to study together and help each other throughout the semester. If everyone does well, everyone will receive a good grade.

Math Lab: You may want to check out the UNT [Math Lab](#) (in GAB 440) to get extra help with the homework. Hours (Jan 23-May 4): Mo-Th 7am-8pm; Fr 7am-4pm; Sa 12pm-4pm (closed Sundays and Holidays).

Homework: I will announce homework assignments in class. The assignments are *usually* due on Thursdays at the beginning of each class period. Late homework will **NOT** be accepted for any reason. Your lowest homework score will be dropped. Do all the assigned problems, but turn in only the **even-numbered** problems.

Expectations: A fair amount of work is involved in learning calculus. You are expected to come to lecture on time. Plan ahead so you are not late. You should come to every lecture, and come prepared. It is your responsibility to obtain notes from another student if you miss class. You are expected to read the assigned sections and work on the homework problems immediately after they are assigned. You should be prepared to ask questions, take notes, and look alive in class. Please bring your text book to class and leave the cell phone at home. Repeat: **NO CELL PHONES OR PAGERS!!!** In addition to attending lecture, you should spend at least 6 hours per week on my course.

Disabilities: It is the responsibility of students with certified disabilities to provide the instructor with appropriate documentation from the Dean of Students Office.

Cheating: No cheating will be tolerated. Anyone caught cheating will receive an F in the course. Furthermore, a letter will be sent to the appropriate dean.

Lecture schedule: The following *Tentative Lecture Schedule* gives you an idea what material I *intend* to cover in this class, but note that the schedule *might change* often. You are responsible for all announcements/assignments made in class!
