

FALL 2025 MATH 1680.580 Elementary Probability and Statistics

Instructor Information

Name: Poonam Chanana

Pronouns: She/Her

Class Meetings: MW 10:30AM - 11:50AM in classroom FRLD 280

Office Location: FRLD 366

Office Hours:

MTuW 9:30 am-10:30 am

Th 10:30 am-11:30 am

MW 1:30-2:30 pm

Email: poonam.chanana@unt.edu

Welcome! My name is Poonam Chanana, and I am a Lecturer in the Department of Mathematics at the University of North Texas, where I have been teaching since 2022. I hold a master's degree in mathematics and information technology and have over ten years of experience teaching a wide range of mathematics courses at the undergraduate level. I look forward to working with you this semester and supporting your success in this course.

How to Communicate with Your Instructor

Please reach out to me if you have questions, need help, or want to let me know about something that affects your engagement with the class. There are two ways to contact me outside of class.

- **Canvas:** Send me a message using the [Canvas](#) Inbox.
- **Email:** Send me an email with "MATH 1680.580" in the subject line. *To protect your privacy, questions about your academic performance must be sent from your [UNT email account](#).*

You may expect a response within two business days. If you do not hear from me within that timeframe, feel free to send a reminder.

Course Description

Introductory course to serve [students of any field who want to apply statistical inference](#). Descriptive statistics, elementary probability, estimation, hypothesis testing and small samples. **Prerequisites:** TSI Complete. Students should be familiar with high-school algebra, fractions, decimals, and percentages.

This is a 15-week, face-to-face course that will cover most of the material in Chapter 1-11. There will be three exams covering approximately three chapters each, plus a comprehensive final exam. There is also a required lab that meets for one hour per week.

Learning Objectives

By the end of the course, students will be able to:

- Describe the process of conducting a statistical study

- Determine whether a study is observational or experimental and identify appropriate use cases
- Understand confounding
- Recognize different types of data such as qualitative, quantitative, discrete, continuous, and correctly identify the level of measurement
- Understand the pros and cons of different sampling methods
- Explain sources of bias
- Summarize and present data accurately using tables, graphs, and charts
- Calculate appropriate measures of center and dispersion
- Describe distribution shapes
- Standardize data using z-scores
- Recognize linear relationships between two variables
- Make accurate predictions using linear regression
- Calculate the probability of simple and compound events
- Understand disjoint and independent events
- Construct and interpret contingency tables
- Understand discrete and continuous random variables
- Identify the parameters of binomial random variables and compute probabilities, expected value, and standard deviation
- Compute probabilities using uniform and normal random variables
- Understand sampling distributions and the Central Limit Theorem
- Construct confidence intervals for population means and proportions
- Test hypotheses involving population means and proportions
- Distinguish between Type I and Type II errors

Required Materials

This course has digital components. To fully participate in this class, students will need internet access to reference content on the [Canvas Learning Management System](https://clear.unt.edu/supported-technologies/canvas/requirements) (<https://clear.unt.edu/supported-technologies/canvas/requirements>). Students will also need:

- **Knewton Alta - 1 Term Access ELECTRONIC PRODUCT by Knewton.** Instead of a traditional textbook, the course material is contained in adaptive online assignments. Students must create a Knewton account as soon as possible in order to complete the first homework assignment. *Students will need to finalize their purchase before the end of the 14-day courtesy access period.*
- **Microsoft Office 365** (<https://it.unt.edu/installoffice365>)
- A laptop or mobile device (such as a tablet or smartphone) that is compatible
- Fill-in-the-blank notes (available on Canvas)

I also recommend that you bring a scientific or graphing calculator to both lecture and lab. *You may use Desmos and Microsoft Excel, but not smartphones, during exams.* If circumstances change, you will be informed of other technical needs to access course content. Information on how to be successful in a digital learning environment can be found at [Learn Anywhere](https://online.unt.edu/learn) (<https://online.unt.edu/learn>).

How to Succeed in this Course

At the beginning of the semester:

- Read this syllabus in detail 😊
- Familiarize yourself with the Canvas course
- Activate Knewton Alta by clicking on the first homework assignment

Before each class:

- Bring blank note paper or print/download the fill-in-the blank notes
- Have your notetaking setup ready to take notes during class

During class:

- Mark things that you think are important or don't understand
- Add comments to clarify possible misunderstandings
- Write questions that you would like to ask
- Arrive on time, and stay until class is dismissed

After class:

- Review your notes, filling any gaps based on what you remember from lecture
- Ask me any remaining questions you might have
- Start working on the appropriate Knewton Alta assignments as soon as possible

UNT strives to offer you a high-quality education and a supportive environment, so you learn and grow. As a faculty member, I am committed to helping you be successful as a student. To learn more about campus resources and information on how you can be successful at UNT, go to unt.edu/success and explore unt.edu/wellness. To get all your enrollment and student financial-related questions answered, go to scrappysays.unt.edu.

There are many academic resources available to help you succeed in this course:

- MATH 1680 Online Helpdesk (Schedule will be posted on Canvas.)
- [Navigate's Study Buddy](https://navigate.unt.edu) (https://navigate.unt.edu)
 - Study with a classmate.
- [Math Lab](https://math.unt.edu/mathlab) (https://math.unt.edu/mathlab)
 - Get help with homework in a quiet environment.
- [UNT Learning Center](https://learningcenter.unt.edu/) (https://learningcenter.unt.edu/)
 - [Supplemental Instruction](https://learningcenter.unt.edu/math-1680-schedule) (https://learningcenter.unt.edu/math-1680-schedule)
 - Peer-led group study sessions.
 - [Tutoring](https://learningcenter.unt.edu/tutoring) (https://learningcenter.unt.edu/tutoring)
 - Request free one-on-one tutoring.

ADA Accommodation Statement

The University of North Texas makes reasonable academic accommodation for students with disabilities. Students seeking reasonable accommodation must first register with the [Office of Disability Access](#) (ODA) to verify their eligibility. If a disability is verified, the ODA will provide you with a reasonable

accommodation letter to be delivered to faculty to begin a private discussion regarding your specific needs in a course. You may request reasonable accommodations at any time; however, ODA notices of reasonable accommodation should be provided as early as possible in the semester to avoid any delay in implementation. Note that students must obtain a new letter of reasonable accommodation for every semester and must meet with each faculty member prior to implementation in each class. Students are strongly encouraged to deliver letters of reasonable accommodation during faculty office hours or by appointment. Faculty members have the authority to ask students to discuss such letters during their designated office hours to protect the privacy of the student. For additional information, refer to the [Office of Disability Access](https://studentaffairs.unt.edu/office-disability-access) website (<https://studentaffairs.unt.edu/office-disability-access>). You may also contact ODA by phone at (940) 565-4323.

Creating an Inclusive Learning Environment

I value the many perspectives students bring to our campus. Please work with me to create a classroom culture of open communication, mutual respect, and belonging. All discussions should be respectful and civil. Although disagreements and debates are encouraged, personal attacks are unacceptable. Together, we can ensure a safe and welcoming classroom for all. If you ever feel like this is not the case, please stop by my office and let me know. We are all learning together.

Course Schedule

	Date			Lab
Week 1			Syllabus, 1.1-Evidence, claims, and Study types 1.2-Variables and Measures of the data	
	8/18/2025	Mon		
				Lab 1-Census & Helicopter Experiment
	8/19/2025	Tue		NTN-Asset map
			1.3- Sampling Methods 1.4-Sampling Methods, 1.5-Sampling Errors, Bias, and Misleading Statistics	
	8/20/2025	Wed		
	8/22/2025	Fri		Last day for change of schedule other than a drop. (Last day to add a class.)
	8/24/2025	Sun	HW 1.1-1.5	Due on Knewton
Week 2			2.1A Organizing Qualitative (Categorical) Data 2.1 Frequency Tables 2.2-Histograms, 2.4-Histograms and Frequency Tables	
	8/25/2025	Mon		

	8/26/2025	Tue		Lab 2-Designing a Statistical Study
				NTN-Team Charters
	8/27/2025	Wed	2.5-Dot Plots and Stem-and Leaf Plots 2.6-Line and Bar Graphs 2.7-Interpreting Graphs	
	8/28/2025	Fri		Last day to drop a course section to no longer appear on the official transcript
	8/29/2025	Sun	HW 2.1, 2.2, 2.4, 2.5, 2.6	Due on Knewton
Week 3	9/1/2025	Mon	Labor Day	Labor Day
				Lab 3-Graphic Displays of Data
	9/2/2025	Tue		NTN- Field Trip
	9/3/2025	Wed	3.1-Measures of Central Tendency 3.2- Which Measure of Central Tendency Should I Use?	
	9/7/2025	Sun	HW 2.7, 3.1. 3.2	Due on Knewton
Week 4	9/8/2025	Mon	3.3- Quartiles and Box Plots 3.4- Standard Deviation	
	9/9/2025	Tue		Lab 4-Measures of Center and Position
	9/10/2025	Wed	3.5- The Empirical Rule 3.8- Measures of Central Tendency with Excel 3.10- Measures of Spread with Excel	
	9/14/2025	Sun	HW 3.3, 3.4, 3.5, 3.8, 3.10	
Week 5	9/15/2025	Mon	Chapter 4- Correlation and Regression 4.1- Scatter Plots and Correlation 4.2- Linear Regression Equations	
				Lab 5-Measures of Dispersion
	9/16/2025	Tue		NTN-Project surveys Assignment
	9/17/2025	Wed	4.3- Least Squares and Outliers 4.5- Coefficient of Determination 4.7- Performing Linear Regressions with Excel	

	9/21/2025	Sun		
Week 6	9/22/2025	Mon	Exam 1 Review	
	9/23/2025	Tue	Review Center	Lab 6-Correlation & Regression
	9/24/2025	Wed	Exam 1	In room FRLD 446
	9/26/2025	Fri		Last day to change to pass/no pass
	9/28/2025	Sun	HW 4.1, 4.2, 4.3, 4.5	
Week 7	9/29/2025	Mon	Chapter 5- Probability 5.1- Probability Terminology and Notation	
	09/30/2025	Tue		Lab 7-Probability
				NTN- Submit Complete survey in Excel sheet
	10/1/2025	Wed	5.2- Basic Probability, 5.3- Independent and Mutually Exclusive Events	
	10/3/2025	Fri	Mandatory Friday Work Day!	
	10/5/2025	Sun	HW 4.7, 5.1, 5.2, 5.3	
Week 8	10/6/2025	Mon	5.5- Addition and Multiplication Rule	
	10/7/2025	Tue		Lab 8-Contingency Tables
	10/8/2025	Wed	5.6- Contingency Tables 6.1- Introduction to Discrete Probability Distributions	
	10/12/2025	Sun	HW 5.5, 5.6	
Week 9	10/13/2025	Mon	6.2- The Binomial Distribution	
	10/14/2025	Tue		Lab 9-Discrete Random Variable
	10/15/2025	Wed	6.6- Discrete Random Variables with Excel 7.1- The Uniform Distribution	
	10/19/2025	Sun	HW 6.1, 6.2, 6.6, 7.1	
Week 10	10/20/2025	Mon	8.1- The Normal Distribution-Parameters 8.2- The Normal Distribution-Probability	
	10/21/2025	Tue		Lab 10-Binomial Distribution
	10/22/2025	Wed	8.2-cont. d 8.4- The Normal Distribution with Excel	

	10/26/2025	Sun	HW 8.1, 8.2	
Week 11	10/27/2025	Mon	Exam 2 Review	
	10/28/2025	Tue	Review Center	Lab 11-Normal Distribution
	10/29/2025	Wed	Exam 2	In room FRLD 446
	11/2/2025	Sun	HW 8.4	
Week 12	11/3/2025	Mon	9.3- Central Limit Theorem for Means 9.4- Central Limit Theorem for Proportions	
	11/4/2025	Tue		Lab 12-Sampling Distributions
	11/5/2025	Wed	9.4 cont. d 10.2- Confidence Interval for a Mean-Population Standard Deviation Known	
	11/8/2025	Fri		Last day for a student to drop a course or all courses with a grade of W
	11/9/2025	Sun	HW 9.3, 9.4	
Week 13	11/10/2025	Mon	10.3- Confidence Interval for a Mean-Population Standard Deviation Unknown	
	11/11/2025	Tue		Lab 13-Confidence Intervals
	11/12/2025	Wed	10.4- Confidence Interval for a Population Proportion 10.8- Confidence Intervals with Excel	
	11/16/2025	Sun	HW 10.2, 10.3, 10.4, 10.8	
Week 14	11/17/2025	Mon	Exam 3 Review	
	11/18/2025	Tue	Review Center	NTN-Final Presentations
	11/19/2025	Wed	Exam 3 Review	
	11/23/2023	Sun		
	11/24/2025 - 11/28/2025	Mon-Fri-day	Thanksgiving	Thanksgiving
Week 15	12/1/2025	Mon	Exam 3	In room FRLD 480
	12/2/2025	Tue		Final Exam Review
	12/3/2025	Wed	Final Exam Review	
Week 16	Final Exam Week (Exact date TBD)			

The above schedule is subject to change. Students will be notified by Eagle Alert if there is a campus closure that impacts a class.

Final Exam

A mandatory and comprehensive final exam will be given in the week of **December 5th in the Computer Lab. (Exact room and date TBD)** **Course Topics**

CHAPTER 1 Data Collection

- 1.1 Evidence, Claims, and Study Types
- 1.2 Variables and Measures of Data
- 1.3 Sampling Methods
- 1.4 Sampling Methods
- 1.5 Sampling Errors, Bias, and Misleading Statistics

CHAPTER 2 Graphic Displays of Data

- 2.1 Organizing Qualitative (Categorical) Data
- 2.2 Frequency Tables for Quantitative (Numerical) Data
- 2.3 Histograms
- 2.5 Histograms and Frequency Tables with Excel
- 2.5 Line Graphs, Dot Plots, and Stem-and-Leaf Plots
- 2.9 Interpreting Graphs

CHAPTER 3 Measures of Center and Dispersion

- 3.1 Measures of Central Tendency
- 3.2 Which Measure of Central Tendency Should I Use?
- 3.3 Quartiles and Box Plots
- 3.4 Standard Deviation
- 3.5 The Empirical Rule
- 3.8 Measures of Central Tendency with Excel
- 3.10 Measures of Spread with Excel

CHAPTER 4 Correlation and Regression

- 4.1 Scatter Plots and Correlation
- 4.2 Linear Regression Equations
- 4.3 Least Squares and Outliers
- 4.5 Coefficient of Determination
- 4.7 Performing Linear Regressions with Excel

CHAPTER 5 Probability

- 5.1 Probability Terminology and Notation
- 5.2 Basic Probability
- 5.3 Independent and Mutually Exclusive Events
- 5.5 Addition and Multiplication Rule
- 5.6 Contingency Tables

CHAPTER 6 Discrete Random Variables

- 6.1 Introduction to Discrete Probability Distributions
- 6.2 The Binomial Distribution
- 6.6 Discrete Random Variables with Excel

CHAPTER 7-8 Continuous Random Variables

- 7.1 The Uniform Distribution
- 8.1 The Normal Distribution-Parameters
- 8.2 The Normal Distribution-Probability
- 8.4 The Normal Distribution with Excel

CHAPTER 9 Central limit Theorem

- 9.3 Central Limit Theorem for Means
- 9.4 Central Limit Theorem for Proportions

CHAPTER 10 Confidence Intervals

- 10.2 Confidence Interval for a Mean-Population Standard Deviation Known
- 10.3 Confidence Interval for a Mean-Population Standard Deviation Unknown
- 10.4 Confidence Interval for a Population Proportion
- 10.8 Confidence Intervals with Excel

Assessing Your Work

Assignment	Percentage
Homework	18%
Lab Projects (1% each)	13%
Three Mid-term Exams (15% each)	45%
Final Exam	17%
PBL (NTN Grade)	7%
Review Center (Extra Credit)	4%
Total	104%

Grading Policy

- A = 90 – 100%
- B = 80 – 89.9%
- C = 70 – 79.9%
- D = 60 – 69.9%
- F = 0 – 59.9%

Grades are based on mastery of the content. As a rule, I do not grade on a “curve” because that is a comparison of your outcomes to others. I do, however, encourage you to find opportunities to learn with and through others. Please take advantage of the academic resources listed above if you find yourself struggling.

Academic Integrity Standards and Consequences

According to UNT Policy 06.003, [Student Academic Integrity](https://policy.unt.edu/policy/06-003) (<https://policy.unt.edu/policy/06-003>), academic dishonesty occurs when students engage in behaviors including, but not limited to cheating, fabrication, facilitating academic dishonesty, forgery, plagiarism, and sabotage. A finding of academic dishonesty may result in a range of academic penalties or sanctions ranging from admonition to expulsion from the University.

Attendance and Participation

Students are required to take exams in the computer lab, exact room will be told soon.

Students are expected to attend class regularly and engage with the material. Research has shown that students who attend class are more likely to be successful. If you miss class, you will be responsible for obtaining a copy of the notes and any other information discussed from a classmate. If you expect to miss one week or more due to circumstances beyond your control, please notify me and your lab instructor in advance so that we can help you attain the course learning objectives. You may also provide documentation verifying the reason for your absence to the [Dean of Students](https://studentaffairs.unt.edu/dean-of-students) (<https://studentaffairs.unt.edu/dean-of-students>) and ask them to advocate on your behalf.

Recordings

This is a face-to-face class, not an online class. Nevertheless, I may record some of my lectures via Zoom for students who are unable to attend class. I reserve the right to restrict access to such recordings to students who have a valid and documented reason for missing class.

Homework Policy

Students may complete homework assignments up to 7 days after the due date. Assignments completed during this 7-day grace period will incur a 20% penalty. I will also drop the **two** lowest homework scores before computing your average at the end of the semester.

Exam Policy

Students may use a scientific or graphing calculator, the online graphing calculator Desmos, and Microsoft Excel during exams. I will also provide a formula sheet. *Smartphones and searching the internet are prohibited during exams. No other notes or assistance are permitted.*

You may request to take an exam early, provided that I receive the request at least one week prior to the date you would like to take the exam.

Your score on the final exam will replace your lowest exam score if the final exam score is higher (unless you received a zero on an exam for academic dishonesty).

Syllabus Change Policy

Any changes to the syllabus will be announced in class and/or posted on Canvas.

Emergency Notification & Procedures

UNT uses a system called [Eagle Alert](#) to quickly notify students with critical information in the event of an emergency (i.e., severe weather, campus closing, and health and public safety emergencies like chemical spills, fires, or violence). In the event of a university closure, please refer to the UNT Learning Management System (LMS) for contingency plans for covering course materials.
