TEACHING PHILOSOPHY

My approach to teaching is based on my regard for the counseling profession. I believe my role is to equip students with current and accurate information and role model ethical decision making. My goal is for students to become ethical, compassionate, and sought-after professionals in their field of choice. I aim to help students reach their goals by introducing new ideas and facilitating open dialogue. I want to provide decision-making opportunities and scenarios coupling theory with application. I believe students learn from a multi-faceted approach and practical application of information. The courses I teach aim to provide opportunities for active engagement through brainstorming new information and challenging fixed ideas.
