## Course Description

The effect of computer science and engineering on the home and workplace, with emphasis on the role of the computer professional in modern society.

This course will consist of a combination of critical thinking and synthesis of ideas and concepts into articulate and coherent arguments. While there may be few absolutely right or wrong answers in this course, you will be required to discern more defensible arguments from less defensible and create your own persuasive stances on the issues covered.

## Course Outcomes

Course Outcomes are measurable achievements to be accomplished by the completion of the course. These outcomes are evaluated as part of our ABET accreditation process.

1. Develop an awareness of the social responsibilities of computer science and engineering.
2. Understand the need for computer science and engineering ethics.
3. Generate an effective written communication incorporating a topic related to social and ethical issues and principles in computer science and engineering.
4. Deliver an oral presentation about a topic related to a particular social or ethical issue related to computer science and engineering.
