Big Data and Data Science / CSCE 5300 / Section 000

Instructor Information

Name: Ravi Vadapalli, Ph.D. Pronouns: he/him, Email: Ravi.Vadapalli@unt.edu, 940-369-6046
Office: 201F CSCE Office Hours: TBD
Teaching Assistant(s): abc, def, ghi, and klm

Course Description, Structure, and Objectives

Introduction to Big Data and Data Science includes an overview of the field, technical challenges, computational approaches, practical applications, structured and unstructured data processing, empirical methods in computer science, data analytics and learning, data visualization, privacy, and ethics. Emphasis will be on Big Data and its effect on other topics within Data Science, its technical characteristics, and state-of-the-art Big Data analytics architectures and tools.

Upon successful completion of this course, you will be able to:

1. understand the holistic view of data science and its impact in science, engineering, and industry (aka markets)
2. What is Big Data and what is data science, and the challenges and opportunities for improving outcomes.
3. Use big data tools to obtain, assess, and prepare data for analysis.
4. Articulate key advances in contemporary data science and describe the skillsets needed to be successful in a data science career.
5. Manage collections of data, create automated processes for analysis, use collaborative tools, and rapidly report quantitative findings.
6. Gain hands-on experience with cloud-based services, computing architectures, and parallel and distributed computing environments
7. Be comfortable in using Jupyter Notebook and mpi4py programming tools and command line environments
8. Apply data, software development, and computing to address data science challenges in both industry and academic research areas. These include model selection and validation, predictive modeling, and parameter tuning

Required/Recommended Materials

There are no required prerequisites for this course. However, in order to be successful in this course you will need to review, study, and understand all materials (readings, videos, tutorials, assignments, and exams) made accessible online and posted on the course calendar on the respective class day at the latest. Readings will all be fairly dense, so please search for additional resources (e.g., Wikipedia, coursera lectures) as needed. All attempts will be made to provide sufficient resources for everyone.

Technology requirements for courses with digital materials: This course has digital components. To fully participate in this class, students will need internet access to reference content on the Canvas Learning Management System.

How to Succeed in this Course

While I want to make myself as available as possible to each of you, I do have to place some limitations on when I can be contacted. I would prefer that most general questions go through the Q & A forum in the Discussion Board area. If you have a general question about the course or assignments, please post it there. Either I will
answer it, or, one of your classmates will. This way we can all benefit from questions asked, and they can be answered in a venue that the whole class can see. You may also want to find someone in class to be a "buddy" with. This will give you at least one other person who you can email with questions.

If you have a private question, please contact me via email and I will respond within 24 hours on weekdays (usually sooner). Please do not expect a response over the weekend. Please use my phone number as a last resort - but also, please use it if you need to!

Normally, I will return feedback on all written assignments within 1 week of the due date. However, if I see that I will be unable to return your feedback that quickly I will post an Announcement to let everyone know when it can be expected. You can expect to see me participate in the discussion board after all student original posts have been posted - usually on the Friday of the first week of the module.

The University of North Texas makes reasonable academic accommodation for students with disabilities. Students seeking reasonable accommodation must first register with the Office of Disability Access (ODA) to verify their eligibility. If a disability is verified, the ODA will provide you with a reasonable accommodation letter to be delivered to faculty to begin a private discussion regarding your specific needs in a course. You may request reasonable accommodations at any time; however, ODA notices of reasonable accommodation should be provided as early as possible in the semester to avoid any delay in implementation. Note that students must obtain a new letter of reasonable accommodation for every semester and must meet with each faculty member prior to implementation in each class. Students are strongly encouraged to deliver letters of reasonable accommodation during faculty office hours or by appointment. Faculty members have the authority to ask students to discuss such letters during their designated office hours to protect the privacy of the student. For additional information, refer to the Office of Disability Access website (http://www.unt.edu/oda). You may also contact ODA by phone at (940) 565-4323.

How to Reach Me?

Connect with me through email and/or by attending office hours. During busy times, my inbox becomes rather full, so if you contact me and do not receive a response within two business days, please send a follow up email. A gentle nudge is always appreciated. Office hours offer you an opportunity to ask for clarification or find support with understanding class material. Come visit me! I encourage you to connect with me and/or my TA for support. Additional office hours, in person and virtually, will be offered as the semester concludes. Your success is our goal.

Supporting Your Success and Creating an Inclusive Learning Environment

I value the many perspectives students bring to our campus. Please work with me to create a classroom culture of open communication, mutual respect, and inclusion. All discussions should be respectful and civil. Although disagreements and debates are encouraged, personal attacks are unacceptable. Together, we can ensure a safe and welcoming classroom for all. If you ever feel like this is not the case, please stop by my office and let me know. We are all learning together. We will discuss our classroom’s habits of engagement and I also encourage you to review UNT’s student code of conduct so that we can all start with the same baseline civility understanding (Code of Student Conduct) (https://deanofstudents.unt.edu/conduct)
Assessing Your Work

Course Activities & Assessments (100 points total)
- Attendance (total 1 pts.). Attendance is administered randomly, and online participants do not get credit unless excused. See UNT policies for excused absence.
- Quizzes (4 @ 5 points each, 20 points total)
- Assignments (9 @ 4 points each, 36 points total)
- Exams (2 @ 20 points each, 40 points total)
- Other Assignments (3 points total). Concept paper (2 pts.), Software Installs (1 pts.)

Grading
- A: 90-100% (Outstanding, excellent work. The student performs well above the minimum criteria.)
- B: 80-89% (Good, impressive work. The student performs above the minimum criteria.)
- C: 70-79% (Solid, college-level work. The student meets the criteria of the assignment.)
- D: 60-69% (Below average work. The student fails to meet the minimum criteria.)
- F: 59 and below (Sub-par work. The student fails to complete the assignment.)

Grade-related Policies

Late Work
I will not accept late work in this course. All work turned in after the deadline will receive a grade of zero unless the student has a university-excused absence [Links to an external site.] and provides documentation with 48 hours of the missed deadline.

Turnaround Time
I aim to return graded work to you within one week of the due date. When this is not possible, I will send an announcement to the class.

Grade Disputes
You are required to wait 24 hours before contacting me to dispute a grade. Within that time, I expect that you will review the assignment details and reflect on the quality of the work you turned in. If you would still like to meet, email me to set up a meeting (I cannot discuss grades over email). You should come to our scheduled virtual meeting with specific examples that demonstrate that you earned a higher grade than you received. If you miss your scheduled meeting, you forfeit your right to a grade dispute. If you do not contact me to schedule a meeting within seven days of receiving your grade, you also forfeit your right to a grade dispute.

Extra Credit
There are no extra credit opportunities in this course.

Course Requirements/Schedule
List required assignments and graded activities along with a short description and the points possible. Best practice is to clearly indicate both points and percentages if you are using both in the course. Here is a table example below:
## Unit 0: Course Overview, Programming Environment, and Course Expectations

<table>
<thead>
<tr>
<th>Week</th>
<th>Topic</th>
<th>Assignment Due</th>
<th>Points Possible</th>
<th>% of Final Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>Week 1</td>
<td>Syllabus Course Overview and Expectations Programming Environments</td>
<td>Assignment-0.1 (Jupyter NB) Assignment-0.2 (VM and VM File share)</td>
<td>0.25 pts. 0.75 pts.</td>
<td>0.25% 0.75%</td>
</tr>
</tbody>
</table>

## Unit 1: Introduction to Python, Data Structures, and Visualization

<table>
<thead>
<tr>
<th>Week</th>
<th>Topic</th>
<th>Assignment Due</th>
<th>Points Possible</th>
<th>% of Final Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>Week 2</td>
<td>Intro. python programming Data Structures</td>
<td>Assignment-1</td>
<td>4 pts.</td>
<td>4%</td>

</tr>
<tr>
<td></td>
<td><strong>TOTAL Points (Not including 1.0 pt Attendance Grade)</strong></td>
<td>99 pts</td>
<td>99%</td>
<td></td>
</tr>
</tbody>
</table>
Eagle Alert

Students will be notified by Eagle Alert if there is a campus closing that will impact a class and note that the proposed course schedule is subject to change. For more information on emergency notification and procedures, please review Emergency Notifications and Procedures Policy (PDF).

Academic Integrity

You are expected to adhere to the university’s Academic Integrity Policy (PDF) (https://policy.unt.edu/sites/default/files/06.049_Standard%20Syllabus%20Policy%20Statements_supplement.pdf).

Syllabus Policy

Grades are based on mastery of the content. As a rule, I do not grade on a “curve” because that is a comparison of your outcomes to others. I do, however, encourage you to find opportunities to learn with and through others. Explore Navigate’s Study Buddy (https://navigate.unt.edu) tool to join study groups. Maximize your learning with our coaching staff at the Learning Center. Focus on areas where you are struggling in this course by attending scheduled study group sessions with me the week before each exam. Forward together!

or

Every student in my class can improve by doing their own work and trying their hardest with access to appropriate resources. Students who use other people’s work without citations will be violating UNT’s Academic Integrity Policy. Please read and follow this important set of guidelines for your academic success (https://policy.unt.edu/policy/06-003). If you have questions about this, or any UNT policy, please email me or come discuss this with me during my office hours.

Attendance and Participation

Research has shown that students who attend class are more likely to be successful. You should attend every class unless you have a university excused absence such as active military service, a religious holy day, or an official university function as stated in the Student Attendance and Authorized Absences Policy (PDF) (https://policy.unt.edu/sites/default/files/06.039_StudAttnandAuthAbsence.Pub2_.19.pdf). If you cannot attend a class due to an emergency, please let me know. Your safety and well-being are important to me.

Because we only meet once a week, every class meeting is essential to your success. To encourage your attendance, punctuality, and learning, I will provide pop quizzes of the previous week’s material at the beginning of class. Plan to arrive on time because you must be present when class begins to take the quiz. Additionally, because this course involves collaboration, participation is essential to learning. Our project-based activities require you to be actively engaged in discussions and group work. I understand tardiness and absences may occur. If you are late to class, please drop me an email to let me know the circumstances. If you must miss class, please let me know prior to your absence.

Please note: the following components are required for every UNT syllabus: Attendance expectations and consequences, course competencies/assignments/requirements (including each major assignment and exam, subject matter of each session, lists of any readings), final exam date/time/location, emergency notification and procedures, academic integrity expectations and consequences.
