CSCE 4110: Algorithms

1. **Class Hours:** Tuesday and Thursday 1:00-2:20 OR 2:30-3:50

2. **Course Content:** This is a first undergraduate course on analysis of algorithms. Course will focus on the design strategies, the mathematical analysis of the algorithms, and their proofs of correctness.

3. **Course Objectives:**
   - Be able to analyze the time and space complexity of a nontrivial algorithm, using mathematical tools, and prove/justify the correctness.
   - Understand the Divide and Conquer, Greedy, and Dynamic Programming strategies for algorithmic design.
   - Be familiar with the algorithms for Matrix Multiplication (Strassen's), Activity Selection, Knapsack, Shortest Paths (single source, and all pairs), Minimum Spanning Tree (Prims and Kruskals), Matrix Chain, and Longest Common Subsequence problems.
   - Be exposed to approximation algorithms for solving NP-hard problems.
   - Be able to determine and measure the efficiency of a given algorithm, in practice, through different possible implementations, and by testing on suitable data sets.
   - Be able to communicate clearly and precisely in writing about the theoretical analysis of an algorithm and its efficiency in practice.

4. **Prerequisites:** Students planning to enroll in this course should have taken course numbers 3110, 2100, 2110. They should have been exposed to the following:
   - Time and space analysis; asymptotic notation
   - Basic sorting algorithms: insertion, merge, and heap sort
   - Data structures including trees, heaps, BSTs, union/find data, and graphs
   - Recurrence Relations and Proof techniques
   - Graphs: BFS, DFS, MST (Prims and Kruskals algorithms)
   - Mathematical structures: Sets, relations
   - Important mathematical manipulations: Sums, combinatorics

5. **Tentative Schedule:**
   (a) Week 1 Introduction, Review of techniques for proof, Algorithm Analysis
   (b) Week 2 Algorithm Analysis (continued), Sorting (Heap sort, Quicksort, Linear time Sorting)
   (c) Week 3 Red-Black Trees and other Data Structures; Assignment 1
   (d) Week 4 Dynamic Programming (Matrix Chain Multiplication, Longest Common Subsequence)
   (e) Week 5 Review and Midterm (on everything up to greedy algorithms)
   (f) Week 6 Greedy Algorithms (Huffman codes, Task Scheduling)
   (g) Week 7 Graph Theory (Review of BFS, DFS, Minimum Spanning Trees)
   (h) Week 8 Graph Theory (Single Source Shortest Paths, All Pair Shortest Paths)
   (i) Week 9 Graph Theory (Maximum Flow, Strongly Connected Components, Biconnected Graphs)
   (j) Week 10 NP Completeness and Reducibility
   (k) Week 11 Approximation Algorithms for NP complete Problems

7. **Instructor:** Sanjukta Bhowmick  
   Office: F291  
   Email: sanjukta.bhowmick@unt.edu  
   Office Hours: Tuesdays and Thursday 11:30-12:30 pm

8. **TA:** Andrew Clark  
   Email: AndrewClark2@my.unt.edu  
   Office Hours: Monday 2-3pm F232

9. **TA:** Phuc Nguyen  
   Email: phucnguyen2@my.unt.edu  
   Office Hours: Thursday 10am-11pm F232

10. **Course Announcements and Assignments** will be emailed and posted on Blackboard.

11. **Evaluation:** Every week on Thursday there will either be a quiz or mini-assignments due. There will be 10-15 such quizzes/assignments each worth 2%. We will take the best of 10 for a total of 20%. There will be 3 assignments worth 10%, total of 30%. There will be a project worth 10%. There will be 2 exams (Midterm and Final) each worth 20%, total 40%.

12. **Academic Integrity Standards** in this course are consistent with UNT policy: **STUDENT STANDARDS OF ACADEMIC INTEGRITY** (18.1.16), or other related/existing UNT policies. The work that you turn in to be graded, including any underlying ideas, must be your own individual work. Usage of unauthorized material and sources, or depending on any unauthorized assistance, to answer homework problems, tests questions, writing reports, or carrying any type of assignment, etc., without the permission of the instructor, or without complete and accurate and complete attribution/citation of the source, when applicable, is viewed as an academic misconduct.

13. **Students can re-take at most three quizzes.** The retakes will be administered the week before the final (Prep Week).

14. **Two points will be deducted for each day (weekends included) of late submission of the homework.**

15. **The passing marks in this class is 55 or lower.** Anyone getting lower than 55 will get an F
