University of North Texas  
Department of Kinesiology, Health Promotion, and Recreation  
KINE 5185 and KINE/PSYC 6185: Applied Sport Psychology  
Spring Semester, 2020  
Tuesday 6:30 – 9:20 PM  
Room PEB 219

**Instructor Information**  
Scott Martin, Ph.D., FACSM, FAASP  
Professor of Sport and Exercise Psychology  
Department of KHPR  
Office Phone: 940.565.3418  
Office: PEB 210F  
Office Hours: TR 1:00-1:50 pm (or by appointments)  
Notes, self-tests, and project information on Canvas  
e-mail: Scott.Martin@unt.edu  
website: http://faculty.coe.unt.edu/scott-martin

**Teaching Assistant Information**  
Taylor Casey, M.Ed.  
Teaching Assistant  
Department of KHPR  
Office Phone: 940-369-5187  
Office: MGM 107  
e-mail: Taylor.Casey@unt.edu

**Purpose of the Course**  
The purpose of this course is to provide graduate students interested in applied performance psychology with an in-depth overview of professional practice issues influencing effective mental training and performance enhancement. The focus of the course will be on applied performance psychology techniques and strategies to enhance client functioning, with the intent to bridge performance psychology related research with professional practice.

The American Psychological Association (Division 47) defines sport and exercise psychology as the scientific study of the psychological factors associated with participation and performance in sport, exercise, and other types of physical activity. Sport and exercise psychology practitioner focus primarily on:

1. Helping individuals use psychological principles and skills to achieve optimal mental health and to improve performance.

2. Understanding how participation in sport, exercise, and physical activity affects their psychological development, health, and well-being.

This course primarily focuses on applied performance psychology professional practice techniques, strategies, and issues in various athletic and performing artist groups.

**Course Prerequisite**  
The prerequisite for this course is KINE 5125 and KINE/PSYC 6125: Sport and Exercise Psychology. In addition to the prerequisite course, it would be preferable that any student enrolling in the course has a strong understanding of sport and exercise psychology theories and research. Preferably students should have read a text such as Williams and Krane (2015) or Weinberg and Gould (2019) prior to enrolling in this course.
**Required Textbooks**

**Learner Objectives**

1. To read, synthesize, and critique existing scientific literature and anecdotal reports; and to discuss the status and ramifications for future practice and research.
2. To develop an understanding of different applied performance psychology consulting and counseling approaches.
3. To become acquainted with techniques and strategies appropriate to applied performance psychology practice.
4. To demonstrate the ability to incorporate applied performance psychology theory into practice.
5. To improve communication and counseling/consulting skills.
6. To acquire life skills and knowledge from applied performance psychology literature for improved functioning.
7. To develop a better understanding of various groups and subcultures in athletics.
8. To demonstrate applied sport performance knowledge and skills in various situations.

**Course Criteria**

**Attendance**

*Attendance* is defined as being in the *classroom* the complete class period. If you are in attendance you can listen and participate in the class activities and discussions. Showing up late,
leaving early, or stepping out of class (e.g., to use a cellular phone) is distracting to other students. Because attendance is defined as such, being late and/or leaving early will be counted as not being in attendance and may result in points deducted from your final point total. You will be allowed ONE (1) absence during the semester for any reason. This DOES NOT include exam or project days. Following the ONE (1) absence, 25 points will be deducted from the final point total for each additional absence. In the event that you are scheduled to take part in an official University function on the date of a project or exam, please contact me at once in order to schedule a make-up session or exam. If you need to speak with me and have a conflict with office hours, I will be happy to make an appointment at a time that is convenient for us both.

**Grade Criteria**

The applied performance psychology course is composed of seven projects or competencies which, when successfully completed, should help you be better prepared to deliver sport psychology services. Information about the course projects and activities will be available at the course website. The seven projects contribute to 70% of your final grade. You are required to complete all seven projects to earn a grade in the course. Projects are due as indicated and will be evaluated by the instructor (and in some cases, by other graduate students). Class participation and attendance (i.e., being in the classroom on time for the complete class period) will contribute to 10% of your final grade. It is your responsibility to review the ancillaries (e.g., read materials, view videos, etc.) prior to attending class. Reading the appropriate material prior to class and actively involving yourself in class discussions will help improve your understanding of the topics covered and your grade. Exam 1 and 2 will contribute to 20% of your grade for the course. Should you have any questions regarding project assignments, grading, exam results, etc., it is YOUR RESPONSIBILITY to see me well in advance of due dates. Naturally, I hope that the course will have much more value to you than the credits and grades. I will be happy to discuss any of the above with you.

**Classroom Etiquette**

Student behavior that interferes with an instructor’s ability to conduct a class or other students' opportunity to learn is unacceptable and disruptive and will not be tolerated in any instructional forum at UNT. Students engaging in unacceptable behavior will be directed to leave the classroom and the instructor may refer the student to the Dean of Students to consider whether the student's conduct violated the Code of Student Conduct. The university's expectations for student conduct apply to all instructional forums, including university and electronic classroom, labs, discussion groups, field trips, etc. The Code of Student Conduct can be found at [https://deanofstudents.unt.edu/conduct](https://deanofstudents.unt.edu/conduct).

This course involves lectures and activities in and out of class. Plan to show up to class on time. Turn cell phones off or to vibrate (no text messaging will be allowed, picture taking, etc.). Likewise, turn off iPods, computers, and other electronic devices prior to entering class. Cell phones and other electronic devices (laptop computers, iPods, iPads, Nooks, calculators, etc.) can be distracting when used during class. These devices should be placed in your backpack or under your desk. During quizzes, test, or other examination activities cell phones and other electronic devices must be completely turned off and stored in your backpack, under your desk, or in the front of the classroom. Only topics related to the course content should be discussed during class time. Talking during a lecture or engaging in inappropriate discussions is distracting to others in the class. Failure to follow these guidelines will result in you: (a) being asked to
leave the classroom, (b) receiving a “zero” on the activity (project, etc.) of the day, and (c) possibly referring you to the Dean of Students (see above information and web address). Therefore, be respectful of the instructor and other students around you.

Course Group Contract

A group code of conduct will be discussed and a group contract will be signed. It is hoped that activities and discussions will provide a meaningful experience. The following rules (and possibly others) will govern our interactions and help to make group experiences and activities meaningful. As a member, you will take responsibility for being on time and attending all class meetings, keeping our discussions confidential, speaking directly to others rather than about them, and speaking only for yourself and allowing others to speak for themselves. If at any time during the activities and discussions you feel that you cannot continue, then please share your feelings with the facilitator. You share the responsibility for course success.

Course Email Requirement and Etiquette

All students are required to activate their UNT e-mail accounts. Information about this class, and updates to the assignments will be sent via e-mail. If students do not want to use their UNT accounts on a regular basis, they are highly encouraged to have their UNT e-mail messages forwarded to an account that they do check on a regular basis. When communicating with me through email use my “scott.martin@unt.edu” email address. Students are expected to carefully and thoughtfully write the communication. This should be done by using a meaningful subject line (course name, reference question), a greeting (e.g., Hello Dr. Martin), and a signature with a UNT student identification number. Using abbreviations, all lower case, or all upper case lettering is discouraged. Proof read emails before sending them. This will allow me to address your question or concern thoroughly and promptly.

Documents (in Portable Document Format [pdf]) should be sent via email and include your name, reference to project (or activity), and date. For example, an email from John Doe containing his project one assignment sent on January 21, 2020 would be titled as “Doe_Project1_01-21-20.pdf”. Thus, the document can be easily found when searching for it on a computer.

Canvas Course Requirement

All students are required to become familiar with their UNT Canvas account. Information about this course and updates to assignments will be uploaded via Canvas. Students must check the Canvas site regularly to keep up with course requirements.

Guest Lecturers

Invited speakers and guests may attend some class meetings. Please respect and appreciation differences in opinions, ethnicity, gender, nationality, physical ability, sexual orientation, religion, and other categories that are and have used to define and separate us. Our discussions and sometimes our guest speakers and lecturers will challenge status quo thinking. Therefore, please be thoughtful, accepting of diverse views other than your own, and embrace equality for all.
Additional Resources

In addition to the above required texts, the following texts will help students develop a greater understanding of professional practice issues and techniques in applied sport and exercise psychology. These texts were designed to help students and practitioners interested in sport psychology prepare for the many issues that arise in applied consulting.

**Academic Dishonesty**

Cheating or plagiarism will not be tolerated. Students caught cheating during an examination or quiz or plagiarizing a written assignment will be charged under the University's Code of Student Conduct. Among other punishments, students found guilty run the risk of having their score changed to a zero, receiving a grade of F for the course, and/or dismissal from the University. Students should be familiar with the academic dishonesty policy at UNT. Please review the student rights and responsibilities information online.

**American with Disabilities Compliance**

The University of North Texas makes reasonable academic accommodation for students with disabilities. Students seeking reasonable accommodation must first register with the Office of Disability Accommodation (ODA) to verify their eligibility. If a disability is verified, the ODA will provide you with a reasonable accommodation letter to be delivered to faculty to begin a private discussion regarding your specific needs in a course. You may request reasonable accommodations at any time, however, ODA notices of reasonable accommodation should be provided as early as possible in the semester to avoid any delay in implementation. Note that students must obtain a new letter of reasonable accommodation for every semester and must meet with each faculty member prior to implementation in each class. Students are strongly encouraged to deliver letters of reasonable accommodation during faculty office hours or by appointment. Faculty members have the authority to ask students to discuss such letters during their designated office hours to protect the privacy of the student. For additional information, see the Office of Disability Accommodation website at [http://www.unt.edu/oda](http://www.unt.edu/oda). You may also contact them by phone at 940.565.4323.

**Family Educational Rights and Privacy Act (FERPA) Information**

Students have the right to expect their grades will be kept confidential. There are a few things, because of the size and/or nature of this class, the instructor must advise you of regarding collection and distribution of test results, quiz scores, homework assignments, roll sheets, projects, etc. During class it may be necessary for you to pass your assignments forward to the instructor or it may be necessary for the instructor to call your name and then return your completed assignment to you by passing it across the room. The instructor, under the reasonable assumption guidelines, assumes students are collecting only their own materials. Every attempt will be made to keep your information confidential. Neither your course grades nor grades for any assignment will be posted in a way that could result in you being identified by other students or faculty members.
Welcome to KINE 5185 and KINE/PSYC 6185 on Canvas

Canvas will be used to supplement the KINE 5185 and KINE/PSYC 6185: Applied Sport Psychology which is primarily taught in a regular classroom environment. Lecture notes and project information will be available on Canvas. Students will want to attend class, read the assigned book, and utilize the lecture materials on Canvas to gain an extensive understanding of applied performance psychology and experience success in the course.
