- 100% natural **premium ingredients** backed by science
- 100-Day Money-Back Guarantee (Risk-free)
- World-wide Free Shipping
- Multi-buy savings
- Manufactured in the UK

Ingredients

Bioperine: is derived from black pepper and makes the formula more effective by significantly increasing the bioavailability of all TestoGen ingredients.

Zinc: it's essential for keeping your sperm healthy and responsible for a whole lot of bodily functions working properly

Vitamin B6: is essential for more than 100 different functions in your body and vital for the testosterone production process. Its deficiency is linked to lower testosterone levels as well as having an impact on overall energy levels

Red Ginseng Extract: is a well-known aphrodisiac giving it the alternative name of “man root”. It is also a libido stimulator which can protect the testes from damage by dioxins, assisting in strong erections.

Fenugreek Extract: this herb is known for its libido-enhancing, testosterone-boosting seeds. It helps increase your strength, stamina and vitality. Its antioxidant properties helps keep harmful free radicals at bay so your body can work efficiently.

Ingredients

D-Aspartic Acid: Research suggests that this amino acid could enhance testosterone production by over 45% in a matter of weeks – and TestoGen has more of it per serving than any other product on the market.

Vitamin K1: it helps your body absorb the vitamin D that's also in the TestoGen formula more efficiently for an increase in testosterone.

Nettle Leaf Extract: nettle leaf binds to SHBG, leaving your testosterone free to circulate your bloodstream and do much more useful things like build muscle and boost your libido

Boron: one study found that men who took 10mg of boron per week showed a 28% increase in free testosterone and a decrease in estrogen levels.

Vitamin D: research shows that increasing your vitamin D intake can have a very positive effect on your testosterone levels.

Magnesium: plays an important role in testosterone production and helps promote quality sleep, which is vital for good testosterone production

Competitor Comparison
