Ceylon Yellow

Warm and Exotic

Ceylon Yellow

Soft/Bright
Golden Yellow

Ceylon Yellow is a brightish dark golden yellow. This is a warmer yellow with a touch of black added. Because of the black added, it has a little bit of a cool feel. Mustard is another word I would use to describe it.

I've seen it in the stores and it feels bright. However, I don't love this color on many "bright" people. It seems to look best on soft.

You'll see in the next set of pages what types of individuals can wear this color best.

Ceylon Yellow is located on the soft color wheel under the Yellow Orange label.

It is a warm color, which means that if you have cool undertones, this color will likely not flatter you.
