PENALTY																					

Key Swing Thought

Keeping shoulder back as I fire through to avoid over-rotating back shoulder.

Key Mental Thought

Focus on target including, selecting a specific spot on the green to land my ball for short shots.

Notes from Round

Struggle with twitch with my putting so experimented with various approaches. Decided claw is best when twitch in high gear. Went to range after the round and discovered how to drive my shoulder to the target without over-rotating! Will's swing from the range gave me the visual.
