

Mosaic: "New Financing Models Could Make Solar the Facebook of the Energy Industry"

- Forbes December 2011

Mosaic seeks a **Senior Software Engineer** with Java or Scala experience to work in our beautiful waterfront offices located in the heart of Oakland's Jack London Square.

Do you have years of experience building e-commerce and financial services applications? Are you a master of JVM internals, architecting robust J2EE applications, or functional programming with Scala? Would you be excited if your cutting-edge work had an immediate impact on promoting the growth of renewable energy? If yes, then we look forward to hearing from you.

Responsibilities:

- Create robust, highly scalable features for our website and investment platform
- Constantly look for ways to improve application performance and user experience
- Write unit tests, perform peer code reviews
- Leverage your experience to mentor more junior engineers
- Work directly with the CTO and product managers to define new application features
- Bring new and fresh ideas to the table

Requirements:

- **Must love to develop.**
- 2-5 years of experience building financial services or ecommerce applications with Java or Scala.
- Excellent problem solving and troubleshooting skills
- BS in Computer Science or related discipline
- Extreme attention to detail

Bonus Points:

- Scala experience
- Experience developing in a high traffic, consumer Internet environment

Mosaic: "New Financing Models Could Make Solar the Facebook of the Energy Industry"
