

March 1st, 2018

Dear MSD customer;

Smith's Medical is standardizing their CADD® tubing sets to only their Flow Stop CADD® Cassette and Administration Sets with Integrated Free-Flow Protection. Therefore, Smith's will be discontinuing the non-flow sets in April 2018.

As of today, March 1st, MSD has started adjusting inventory levels by decreasing demand for the Non-Flow set and increasing demand for the Flow Stop sets. As a result, internally our customers should start the conversion process as soon as possible.

CADD® Tubing Sets with Flow Stop Free-Flow Protection – Global Product Number Format

The Flow Stop products include most globally-supported languages on their labelling and in the *Instructions for Use*. The Flow Stop product numbers will now standardize to a global format of 21-73XX-24. The “3” indicates that it includes the Flow Stop integrated free-flow protection. The “-24” indicates that all global languages are included. Please refer to the chart below for the current and new product number information. Flow Stop product numbers (21-73XX-24) are available immediately.

Alternate Flow Stop item codes are available for every non-Flow Stop item that is being discontinued. Please refer to the attached cross reference sheet.

We apologize for any inconvenience this may cause.

Please contact your MSD Sales Representative or Customer Service with any questions
