Did any part of presentation stand out

I like the lab part. (1)

I always felt like everyone was in sync with the instructor. He does a good job of breaking topics down to easy-to-understand pieces and makes sure everyone is following him before proceeding. (2)

What improvements could be made

I particularly like the lab sections. I wish we could spend more time in lab or have more lab examples. (1)

Skills or techniques gained | How to model systems without intimate knowledge of them. (2)
What improvements could be made | I wished the labs built more on each other. Too much of the labs seemed like magic. We characterized all the components but never actually incorporated the results in future labs. (2)
