

## Need a Consultation?

We at Legendary Bowling Services do not believe in charging our customers for analysis when purchasing equipment. It is part of our job to gather your PAP, axis tilt, axis rotation, ball speed, rev rate, environment, physical characteristics, and apply that information so you can bowl your best.

Your fit is the most important element of your bowling. It is critical for proper execution. We have relieved hand pressure for thousands of bowlers and we take pride in measuring every bowlers hand thoroughly. If you are experiencing any hand discomfort at all, give us a call to schedule an appointment at The National Bowling Stadium.
