

Church and School Phone System  
Nov. 2009  
Todd Brandenburg

The current phone system is made by Nitsuko.  
There are two cabinets located in the utility closet near the kitchen.  
Cabinet model numbers are DX2NA-32M.  
It has a CPU card (DX2NA-32CPRU-S)  
Four extension boards capable of 8 lines each (DX2NA-8DSTU-S) for a total of 32 lines  
One external paging board (DX2NA-4PGDV-S-1)

Information about this system can be found by searching on NEC 124i

The following web page has installation, service, and software manuals:  
<http://www.wedophones.com/NecManualsLead.htm> goto the '124i' section

The software manual is 1200 pages long but it is very organized.
