

Theistic Evolution

If you believe in God, but believe that the creation account from Genesis is "Moral-Metaphor".

If you believe that God had a hand in causing the Big-Bang, in the formation of Stars and Planets.

He had a hand in the evolution process. He molded the first cell in the premortal soup and guided the process of "super-natural-selection" to create all life forms.

We would call you a **Theistic Evolutionist.**
