

Dear Ministry Partners and Friends,

Warm Christmas greetings to you from the Ganta United Methodist Hospital family. We are very happy to report that we have made a lot of progress during 2015. I will be sending you my year end summary very soon which will outline specifics. Our progress is possible because of your continuing support!

I am prayerfully seeking support for volunteers to come and assist with our plumbing and bio medical technician needs.

PLUMBING

Although we have renovated the various bathrooms and replaced commodes and sinks throughout the hospital, there is no, or limited, water going through our plumbing system because many of our pipes are corroded. Our hospital is outfitted with 1946 plumbing and it needs to be replaced. This is a very big and technical project. Our constraints are funding and acquiring qualified and experienced plumbers to draw up a plumbing system replacement plan and attach realistic cost estimate.

BIO MEDICAL TECHNICIAN

Efforts have been made to secure medical equipment technicians locally. Though very committed, their skills are limited and they cannot install/repair some of our vital equipment. I am making this appeal through our partner connection for a volunteer bio medical technician to come to assist us. Some of our already installed equipment (xray machine, ultrasound, autoclave, etc.) are in need of repair. Some recently donated equipment (oxygen distributor system) is in need of installation. A volunteer with this expertise is urgently needed.

We will provide housing, internal transportation, and meals. If you know of anyone who might be willing to come, please let me know and I will get in touch.

Thank you for your prayerful, financial and volunteer support over the years. We look forward to hear from you.

Sincerely,
Patrick
