

A Trillion Dollars & Our National Debt:

A Trillion Dollars is... if you saved a million dollars a day (each day) it would take you **2,740 years** to save one Trillion Dollars.

With our National Debt approaching **12 Trillion**, it would take America **32,880 years** to get rid of the National Debt even if we saved one million a day! (This does not include interest)

It took **ONLY 80 YEARS** to create our National Debt and it would take **32,880 years** to get rid of it!!!

America is Broke! As a country, we need to eliminate wasteful spending!
