

# Interactive Guided Tour Instructions

The Sonoma

Name of Home

Maneuvering the dollhouse: To turn, hold down mouse and move mouse left right and up down; to make bigger or smaller right click until you see crosshairs and move mouse inward to make smaller and outward to make bigger. If you are using a trackpad, just press and pinch.

How to navigate inside the home: Move your mouse or finger on the trackpad so that the bright circle goes to any location you wish to see in the home. There are dim circles to indicate optimal standing points so you can move to those places to get a central view. Then press the mouse and the screen will zoom to that spot as though you are standing on it. You can then look left right and up down by right clicking and dragging your mouse or dragging your fingers on the trackpad. To move anywhere else, move your bright circle to a spot and press. Again, just use your mouse or trackpad to look in any direction.
