

How to professionally print your calendar

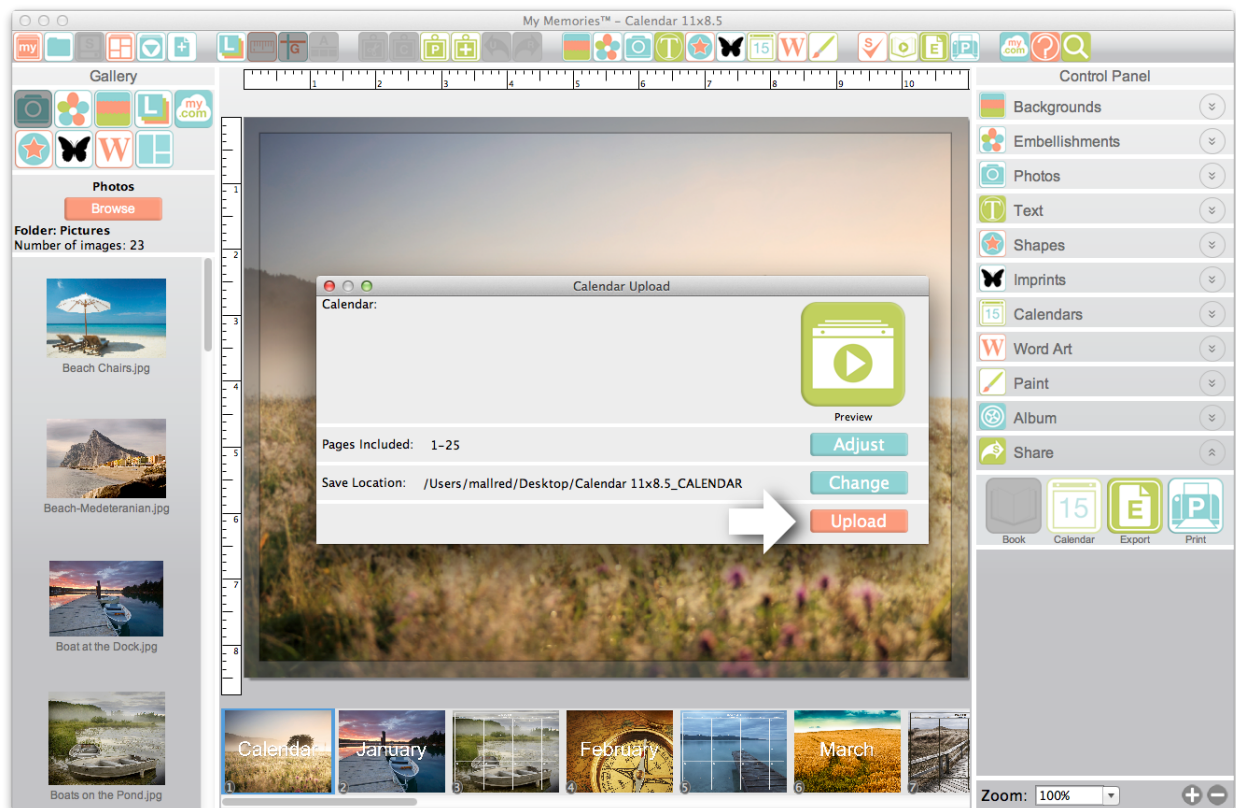

1. Open the **Share** tab in the control panel, and select the **Calendar** icon.

Note: If the Calendar icon is not available this indicates your album size is not one of the supported calendar upload sizes. 11x8.5 is currently the only supported upload size. To change your album to a size that is supported go to the Album menu > Change Size.

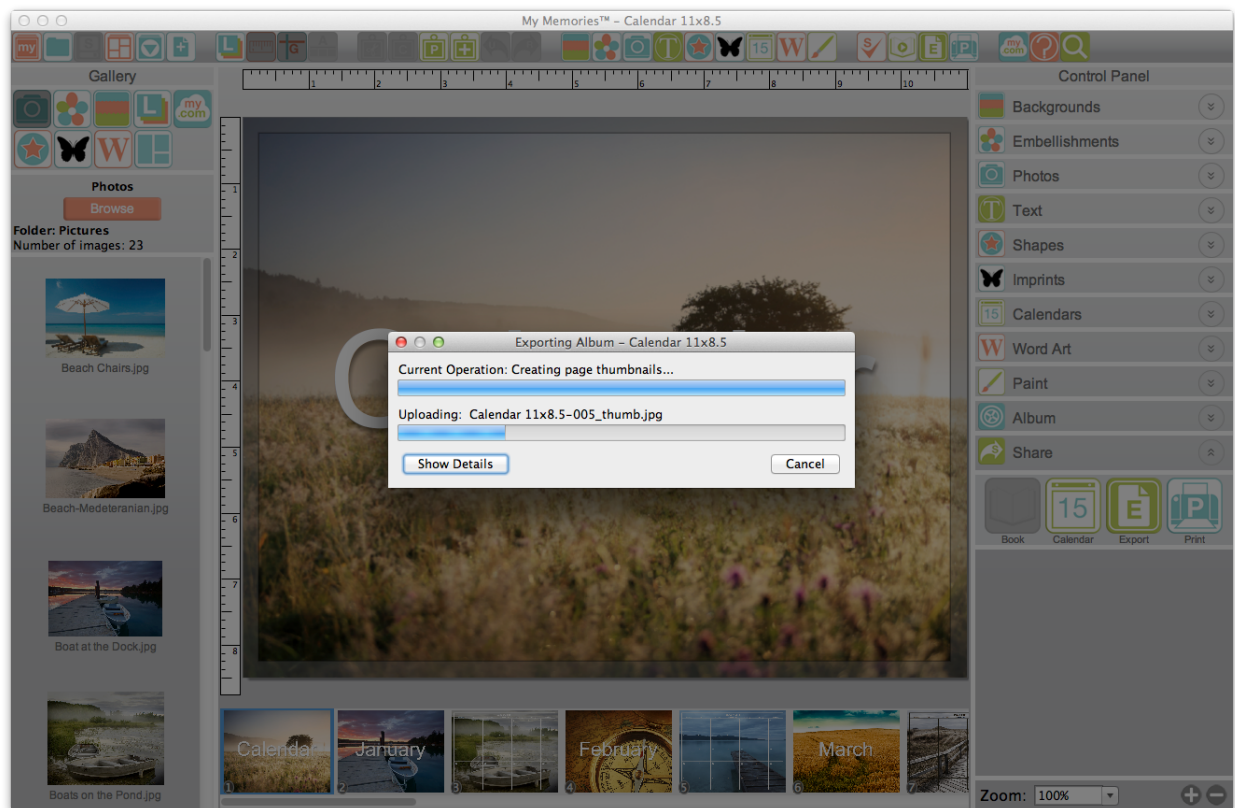

Note: We currently only professionally print calendars that are exactly 25 pages total.

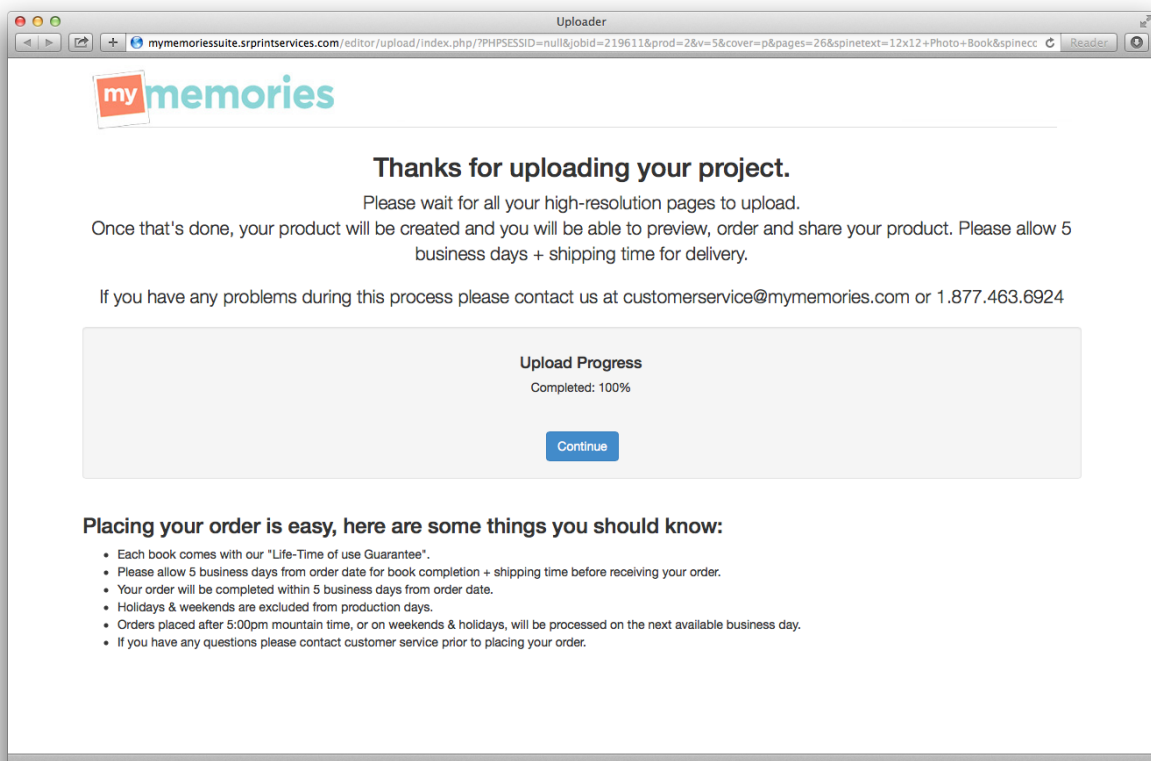

2. After previewing your calendar click **Upload**.

3. Exporting and uploading will be long and may take several minutes to complete.

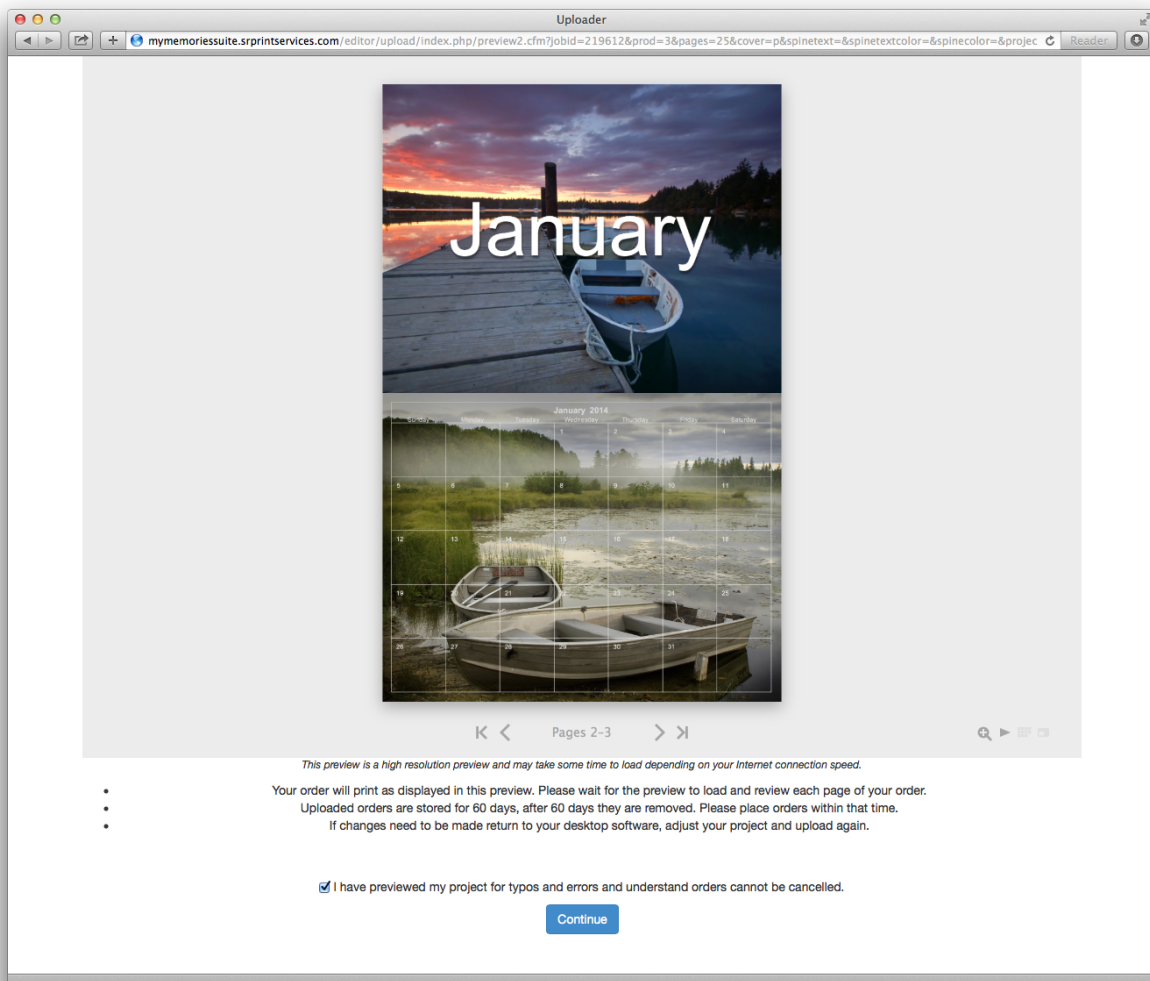

4. Once the initial export process completes your **default web browser** will open a web page. This page will display the progress of the upload. Once the upload has completed click the **Continue** button.

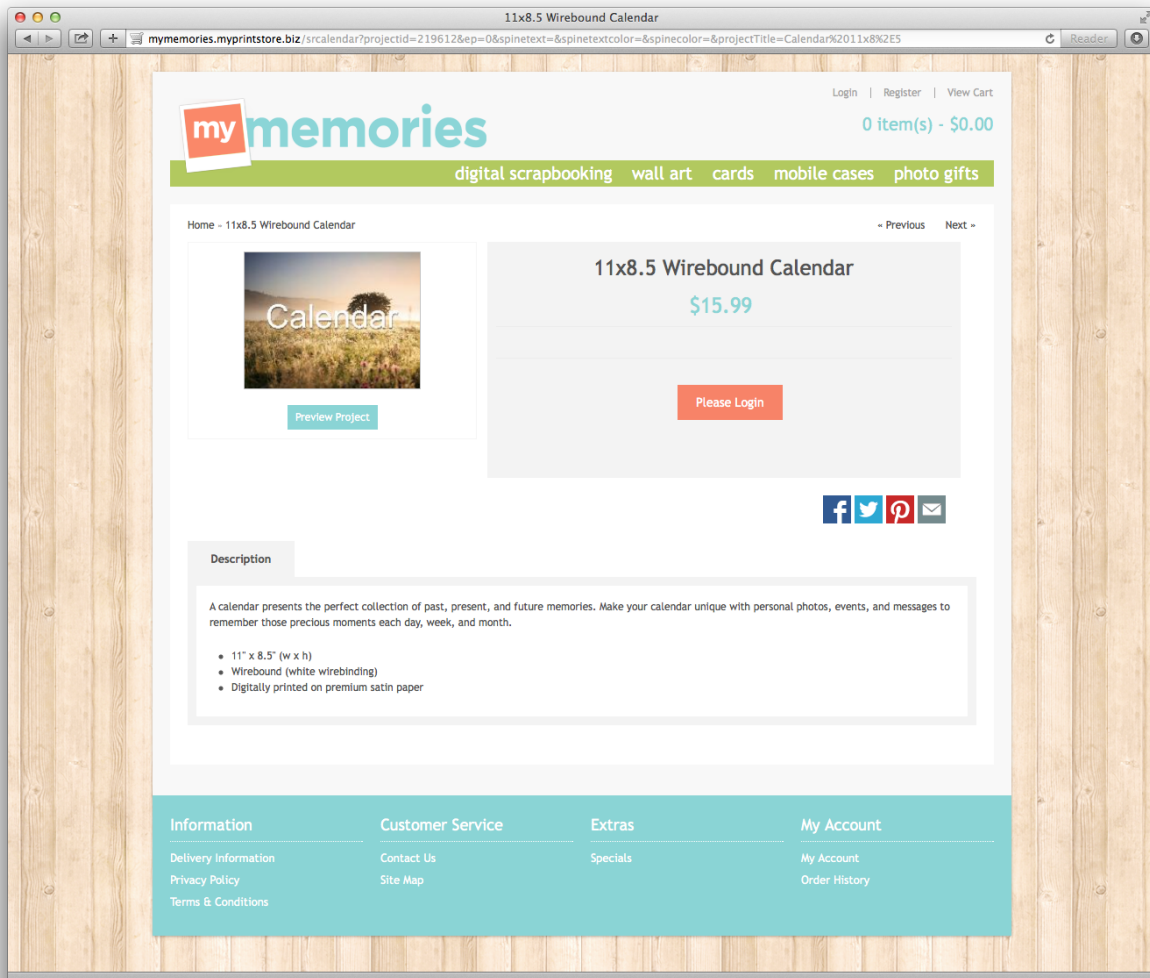

5. A **final preview** will load of your calendar. Please wait for all of the pages to load and **review each page** of your order. Your calendar will **print as displayed** in this preview. If changes need to be made return to the software, adjust the project and upload again. It is very important to **review each page** in this preview.
