

Q prime

Q prime promotes enhanced delivery of essential nutrients and oxygen throughout the body at the cellular level by restoring, protecting, and rejuvenating the microvascular system. This proprietary, patent-pending dietary supplement provides the building blocks needed to keep your blood vessels slick, smooth, and protected, from the largest arteries and veins to the tiniest capillaries.*

Better health from head to toe

Your circulatory system, which is made up of your veins and arteries, delivers the oxygen you breathe and the nutrients you eat throughout your entire body. A vital component of this delivery structure is the microvascular system—made up of millions of tiny blood vessels and capillaries. With age, the delicate lining that supports and protects these tiny blood vessels and capillaries known as the glycocalyx deteriorates, limiting blood flow and the effectiveness of this critical delivery system. Utilizing a breakthrough, clinically-proven formulation of polysaccharides, amino sugars, and antioxidants, Q prime restores the protective structure of the glycocalyx, rejuvenates the body's ability to produce more of the protective gel, and protects the glycocalyx from breaking down—boosting nutrient and oxygen delivery to every cell throughout your body for better health from head to toe.*

Features:

Proprietary ingredient blend: Combining polysaccharides, amino sugars, and antioxidants, this patent-pending, synergistic blend of ingredients supplies the building blocks needed for a healthy microvascular system.*

Key benefits:

- Restores, protects, and rejuvenates the microvascular system*
- Helps preserve normal, protective blood vessel function*
- Promotes delivery of nutrients and oxygen to all tissue and cells throughout the body*
- Promotes healthy organs associated with vascular health, including the heart, brain, kidneys, lungs, muscles, skin, and eyes*

Suggested use: Take two capsules twice per day with food

Three synergistic actions restore, rejuvenate and protect the microvascular circulation system.

Restore: Polysaccharides – enables repair of glycocalyx matrix

Rejuvenate: Amino sugars – precursor for polysaccharide biosynthesis

Protect: Antioxidants – protects endothelial polysaccharide from breakdown

Manufactured for:

Quintessential Biosciences, Inc.
2162 W. Grove Parkway, Suite 150
Pleasant Grove, UT 84062
