

Klabin S.A.

Fitch Ratings affirmed Klabin S.A.'s Long-Term Foreign and Local Currency Issuer Default Ratings (IDR) at 'BB+' and National Long-Term Rating at 'AAA(bra)' in May 2020. Fitch also affirmed the 'BB+' rating for Klabin Finance S.A. and Klabin Austria GmbH's senior notes guaranteed by Klabin. The Outlook for Klabin's ratings is Stable.

The ratings reflect the company's leading position in the Brazilian packaging sector, large forestry base that provides a low production cost structure, access to inexpensive fiber, and a high degree of vertical integration, which enhances product flexibility in the competitive but fragmented packaging industry.

Because of its strong market position in packaging products and integrated operations, Klabin is a price leader in the domestic market. It also is able to preserve more stable sales volume and operating margins during unstable economic environments in Brazil than its competitors, which have a significantly lower scale of operations and high production cost exposure. The company also benefits from being a low-cost producer of market pulp, in the lowest quartile, and maintains pulp production volumes above 90% of nominal capacity.

Klabin's solid liquidity position and low refinancing risk remain key credit considerations. Fitch's analysis considers the investments in the Puma II project, which will further strengthen the company's leading packaging business position.

Klabin's Fitch-calculated EBITDA fell to BRL3.6 billion in 2019 from BRL4.0 billion in 2018 as a result of the weak price environment. Due to the decline in EBITDA and increased capex for the Puma II project, Klabin's net debt increased to BRL14.5 billion from BRL12.5 billion in 2018 and its net leverage ratio increased to 4.1x from 3.1x, according to Fitch's criteria. This amount of net debt and the leverage ratios remain within Fitch's expectations in the midst of the project and result in the maintenance of a Stable Outlook.

The Outlook reflects Fitch's expectation of strong operating cash flows, despite the severe economic downturn and weak pulp prices, benefiting from depreciation of Brazilian real. Fitch expects the coronavirus pandemic to have a limited impact on Klabin's packaging business. Kraftliner, coated board and corrugated box demand should remain relatively stable in 2020, supported by the company's leading position and diversified client base in the more resilient food sector. Industrial bags, which represented 8% of sales in 2019, is the only segment that will be significantly affected by weaker demand.

Key Rating Drivers

Leading Position in Packaging Segment: Klabin is the leader in the Brazilian corrugated box and coated board sectors, with market shares of 18% and 50%, respectively. The company is the sole producer of liquid packaging board in the Brazilian market and is the largest producer of kraftliner and industrial bags, with market shares of 42% and 56%, respectively.

In Fitch's opinion, the Puma II expansion project is very strategic for Klabin and will add 920,000 tons of annual kraftliner production capacity by 2023, positioning the company as the world's third-largest kraftliner paper producer. Klabin's strong market shares allow it to be a price leader in Brazil. The company's competitive advantage is viewed as sustainable due to its scale, high level of integration and diversified client base in the more resilient food sector. This allows Klabin to preserve EBITDA margins above 30% throughout the cycle, while smaller companies have margins below 15%.

Pulp Mill and Forestry Assets: Klabin has a 1.6 million-ton pulp mill that started operations in 2016. Klabin sources much of its fiber requirements from hardwood and softwood trees grown on 248,000 hectares of plantations it has developed on 542,000 hectares of land it owns; this ensures a competitive production cost structure in the future.

Analysts

Fernanda Rezende
+55 21 4503-2619

fernanda.rezende@fitchratings.com

Claudio Miori
+55 11 4504-2207
claudio.miori@fitchratings.com

During 4Q19, the company's cash cost of production was USD167 per ton, which placed it firmly in the lowest quartile of the cost curve. The accounting value of Klabin's land was about BRL2.2 billion as of YE 2019, and the value of the biological assets on its forest plantations was BRL4.7 billion. Some of the forestry assets could be monetized if needed to reduce debt and improve liquidity.

FCF to Remain Negative: Consolidated adjusted EBITDA is forecast to be around BRL4.4 billion in 2020 and BRL4.6 billion in 2021, and cash flow from operations at BRL2.8 billion and BRL3.0 billion, respectively. Klabin generated BRL3.6 billion of adjusted EBITDA and BRL2.7 billion of cash flow from operations in 2019, as per Fitch's calculations. Klabin's flexibility and product diversification will continue to soften the effects of the severe economic downturn in Brazil and weak pulp prices.

Fitch's projections reflect a 1% reduction in paper and packaging sales volume in 2020, to 1.8 million tons, with an increase in 2021 following the start-up of the first phase of the Puma II project, and 1.5 million tons of pulp for 2020 and 2021. Fitch expects negative FCF of about BRL1.6 billion in 2020 and BRL955 million in 2021, due to Puma II investments. Fitch's base case incorporates total investments around BRL7.5 billion in 2020–2021 and no dividends during 2020.

Leverage to Increase: Fitch expects net adjusted leverage to increase to about 4.2x in 2020 due to Puma II investments. Net debt is expected to peak at BRL20.0 billion in 2022, compared with BRL14.5 billion at YE 2019.

Net adjusted leverage is expected to decline to lower levels only after 2023. Fitch expects Klabin to continue to manage its capital structure conservatively during its expansion phase and take proactive steps if leverage exceeds 5.0x. Net debt/adjusted EBITDA was 4.1x in 2019, according to Fitch's methodology, pressured by weaker pulp prices and high investments.

Downturn in Pulp Cycle: The market pulp industry is cyclical; prices move sharply in response to changes in demand or supply. Fitch believes prices of bleached eucalyptus kraft pulp delivered to China have already bottomed out after plummeting to USD480/ton at YE 2019 from USD725/ton at YE 2018. Weaker European demand for paper and packaging and a slowdown of the Chinese economy will continue to pressure a recovery in pulp prices.

At current pulp price levels, high-cost producers are already operating at very low profit margins and may extend maintenance capex or shut down mills to reduce supply. Demand for printing and writing and specialty papers will decline due to depressed global economies, but the tissue market is showing signs of increasing demand, providing a level of support for pulp prices. Tissue and fluff end use represented about 50% of market pulp demand in 2019.

Rating Pierces Country Ceiling: Klabin's 'BB+' IDR is one notch higher than Brazil's 'BB' Country Ceiling due to a combination of exports of about USD1 billion, approximately USD350 million of cash held outside of Brazil and its USD500 million unused revolving credit facility. As of YE 2019, pro forma EBITDA from exports, plus cash held abroad and the revolving credit facility, covered hard currency debt service over the next 24 months by more than 1.5x.

In line with Fitch's *Non-Financial Corporates Exceeding the Country Ceiling Rating Criteria*, this could allow the company to be rated up to three notches above the Brazilian Country Ceiling. However, Klabin's Foreign Currency IDR is constrained by its 'BB+' Local Currency IDR, which reflects the company's underlying credit quality.

Financial Summary

(BRL000, as of Dec 31)	2018	2019	2020F	2021F
Operating EBITDA (Before Income from Associates)	4,022,621	3,550,000	4,424,757	4,625,768

Rating Derivation Relative to Peers

Klabin's size, access to inexpensive fiber and high level of integration relative to many of its competitors give it competitive advantages that Fitch views as sustainable. Its business profile is consistent with a rating in the 'BBB' category.

Klabin's leverage is high compared with Latin America peers Empresas CMPC S.A. (BBB/Stable) and Celulosa Arauco y Constitucion S.A. (BBB/Negative). That is a key reason Klabin, which was rated investment grade, is now rated 'BB+'. Klabin's leverage increased as a result of construction of the Puma pulp mill and low pulp prices following its completion have prevented quick deleveraging. Klabin's net adjusted leverage is projected to increase to around 4.5x in 2020 due to investments in Puma II project and it is not expected to decline to lower levels until 2023.

Klabin is more exposed to demand from the local market than Suzano S.A. (BBB-/Negative), CMPC and Arauco, as these companies are leading producers of market pulp sold globally. This makes Klabin more vulnerable to Brazilian macroeconomic conditions than its peers, which is also a negative consideration. Positively, its concentration of sales to the food industry, which is relatively resilient to downturns in Brazil's economy, and its position as the sole producer of liquid packaging board add stability to operating results.

Rating Sensitivities

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

- Average net debt/EBITDA of 3.0x or below throughout the pulp price cycle following completion of the expansion project;
- Sustained net debt of less than USD3.5 billion after completion of the expansion project.

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

- Net leverage higher than 4.5x during the expansion project;
- Average net debt/EBITDA of 4.0x or higher throughout the pulp price cycle following completion of the expansion project;
- Sustained net debt of more than USD4.5 billion after completion of the expansion project;
- An increasingly unstable macroeconomic environment that weakens demand for the company's packaging products and prices.

Liquidity and Debt Structure

Solid Liquidity: Klabin's solid liquidity and low refinancing risk remain key credit considerations. The company had BRL7.2 billion of cash and marketable securities as of March 31, 2020 and BRL27.8 billion of total debt, of which BRL1.5 billion is due in the short term. Financial flexibility is enhanced by a USD500 million unused revolving credit facility. Klabin plans to finance the Puma II expansion project with a combination of debt and operating cash flow.

Fitch expects Klabin to continue to preserve an extended debt amortization profile and strong liquidity, conservatively positioning it for price and demand volatility, which is an inherent risk in the packaging industry. Klabin successfully concluded its liability management in 2019, issuing about BRL23.0 billion of debt and prepaying approximately BRL6.3 billion, which significantly improved its debt amortization profile and enhanced liquidity to finance high investments. The company also concluded in 1Q20 the reopening of its 2049 bond, for USD200 million. Klabin had about BRL1.5 billion due in the short term as of March 31, 2020, BRL491 million due from March 2021 to December 2021 and BRL1.2 billion due in 2022.

About 72% of total debt was denominated in U.S. dollars as of March 31, 2020. Total debt of BRL27.8 billion consisted of 43% bonds, 14% export prepayment, 14% agribusiness receivables certificates, 10% export credit notes, 8% debentures, 2% Banco Nacional de Desenvolvimento Economico e Social (BNDES) and 9% others.

ESG Considerations

The highest level of Environmental, Social and Governance (ESG) credit relevance, if present, is a score of '3'. This means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or to the way in which they are being managed by the entity.

Key Assumptions

Fitch's Key Assumptions Within Our Rating Case for the Issuer

- Paper and packaging sales volume of 1.8 million tons for 2020 and 2.0 million tons for 2021;
- A 60% reduction in industrial bags sales volumes in 2020, with a gradual recovery in 2021 and 2022;
- Pulp sales volume of 1.5 million tons in 2020 and 2021;
- Average hardwood net pulp price of USD525 per ton in 2020 and USD575 per ton in 2021;
- Average FX rate of 4.9 Brazilian reals to the U.S. dollar in 2020 and 4.5 in 2021;
- Investments of around BRL7.5 billion in 2020–2021, of which about BRL5.5 billion will be invested in the Puma II project;
- No dividends in 2020 and dividends of 20% of EBITDA in 2021.

How to Interpret the Forecast Presented

The forecast presented is based on Fitch Ratings' internally produced, conservative rating case forecast. It does not represent the forecast of the rated issuer. The forecast set out above is only one component used by Fitch Ratings to assign a rating or determine a rating outlook, and the information in the forecast reflects material but not exhaustive elements of Fitch Ratings' rating assumptions for the issuer's financial performance. As such, it cannot be used to establish a rating, and it should not be relied on for that purpose. Fitch Ratings' forecasts are constructed using a proprietary internal forecasting tool, which employs Fitch Ratings' own assumptions on operating and financial performance that may not reflect the assumptions that you would make. Fitch Ratings' own definitions of financial terms such as EBITDA, debt or free cash flow may differ from your own such definitions. Fitch Ratings may be granted access, from time to time, to confidential information on certain elements of the issuer's forward planning. Certain elements of such information may be omitted from this forecast, even where they are included in Fitch Ratings' own internal deliberations, where Fitch Ratings, at its sole discretion, considers the data may be potentially sensitive in a commercial, legal or regulatory context. The forecast (as with the entirety of this report) is produced strictly subject to the disclaimers set out at the end of this report. Fitch Ratings may update the forecast in future reports but assumes no responsibility to do so. Original financial statement data for historical periods is processed by Fitch Solutions on behalf of Fitch Ratings. Key financial adjustments and all financial forecasts credited to Fitch Ratings are generated by rating agency staff.

Company's Market Position

a-	Market Share	a	Top-three player in most markets or leader in a well defined and protected niche.
bbb+	Competitive Advantage	bbb	Some competitive advantages with reasonably good sustainability.
bbb	Operating Efficiency	bbb	Return on invested capital in line with industry average.
bbb-			
bb+			

Profitability

a-	FFO Margin	bb	10%
bbb+	EBIT Margin	a	14%
bbb	FCF Margin	b	Neutral to negative FCF margin.
bbb-	Volatility of Profitability	bbb	Volatility of profits in line with industry average.
bb+	EBITDA Margin or EBITDAR Margin	aa	25% or 25%

Financial Flexibility

bbb+	Financial Discipline	a	Clear commitment to maintain a conservative policy with only modest deviations allowed.
bbb	Liquidity	bbb	One year liquidity ratio above 1.25x. Well-spread maturity schedule of debt but funding may be less diversified.
bbb-	FFO Interest Coverage or FFO Fixed Charge Cover	bb	3x or 3x
bb+	FX Exposure	a	Profitability potentially exposed to FX but efficient hedging in place. Debt and cash flows well-matched.
bb	Op. EBITDA/Interest Paid or Op. EBITDAR/(Interest Paid+Rents)	bb	3.5x or 3.5x

How to Read This Page: The left column shows the three-notch band assessment for the overall Factor, illustrated by a bar. The right column breaks down the Factor into Sub-Factors, with a description appropriate for each Sub-Factor and its corresponding category.

Management and Corporate Governance

a-	Management Strategy	bbb	Strategy may include opportunistic elements but soundly implemented.
bbb+	Governance Structure	bbb	Good CG track record but effectiveness/independence of board less obvious. No evidence of abuse of power even with ownership concentration.
bbb	Group Structure	a	Group structure shows some complexity but mitigated by transparent reporting.
bbb-	Financial Transparency	bbb	Good quality reporting without significant failing. Consistent with the average of listed companies in major exchanges.
bb+	Financial Sponsor Attitude (LBO only)		n.a.

Sector Trend

bbb+	Long-Term Growth Potential	bbb	Mature industry. Traditional markets may be under some pressure but opportunities arise in new markets.
bbb	Volatility of Demand	bbb	Demand volatility in line with economic cycles.
bbb-	Threat of Substitutes	bb	Facing substitutes of comparable quality with modest switching costs.
bb+			
bb			

Diversification

bbb	Geographic Diversification	bb	Modest geographical diversification.
bbb-	Product/End-Market	bbb	Exposure to at least three business lines or markets but with some performance correlation.
bb+			
bb			
bb-			

Financial Structure

bbb-	FFO Leverage or FFO Adjusted Leverage	bb	4.0x or 4.0x
bb+	FFO Net Leverage or FFO Adjusted Net Leverage	bb	3.5x or 3.5x
bb	(CFO-Capex)/Total Net Debt With Equity Credit (%) or Net Debt/(CFO-Total Debt With Equity Credit)Op.	bb	7.5% or 3.5%
bb-	EBITDA or Total Adjusted Debt/Op.	bb	3.5x or 3.5x
b+	Funding Structure (LBO only)		n.a.

Credit-Relevant ESG Derivation

Environmental (E)

General Issues	E Score	Sector-Specific Issues	Reference
GHG Emissions & Air Quality	3	GHG emissions; air quality	Diversification; Profitability; Financial Structure; Financial Flexibility
Energy Management	3	Energy management	Diversification; Profitability; Financial Structure; Financial Flexibility
Water & Wastewater Management	3	Water and wastewater management	Diversification; Profitability; Financial Structure; Financial Flexibility
Waste & Hazardous Materials Management; Ecological Impacts	3	Waste and hazardous materials management; ecological impacts; product design & lifecycle management; supply chain management; product	Diversification; Profitability; Financial Structure; Financial Flexibility
Exposure to Environmental Impacts	3	Impact of climate change and extreme weather events on assets and operations	Diversification; Sector Trend; Profitability; Financial Structure; Financial Flexibility

How to Read This Page

ESG scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant and green (1) is least relevant.

The **Environmental (E), Social (S) and Governance (G)** tables break out the individual components of the scale. The right-hand box shows the aggregate E, S, or G score. General Issues are relevant across all markets with Sector-Specific Issues unique to a particular industry group. Scores are assigned to each sector-specific issue. These scores signify the credit-relevance of the sector-specific issues to the issuing entity's overall credit rating. The Reference box highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis.

The **Credit-Relevant ESG Derivation** table shows the overall ESG score. This score signifies the credit relevance of combined E, S and G issues to the entity's credit rating. The three columns to the left of the overall ESG score summarize the issuing entity's sub-component ESG scores. The box on the far left identifies the some of the main ESG issues that are drivers or potential drivers of the issuing entity's credit rating (corresponding with scores of 3, 4 or 5) and provides a brief explanation for the score.

Classification of ESG issues has been developed from Fitch's sector ratings criteria. The General Issues and Sector-Specific Issues draw on the classification standards published by the United Nations Principles for Responsible Investing (PRI) and the Sustainability Accounting Standards Board(SASB).

Social (S)

General Issues	S Score	Sector-Specific Issues	Reference
Human Rights, Community Relations, Access & Affordability	2	Human rights; relationships with communities and/or land right holders; access and affordability	Management and Corporate Governance; Company's Market Position; Diversification; Profitability; Financial Flexibility
Customer Welfare - Fair Messaging, Privacy & Data Security	3	Customer privacy; data security; product quality and safety; customer welfare; selling practices and product labeling	Management and Corporate Governance; Sector Competitive Intensity; Company's Market Position; Profitability
Labor Relations & Practices	3	Impact of labor negotiations and employee (dis)satisfaction; supply chain management - labor; employee diversity and inclusion	Operating Environment; Diversification; Profitability; Financial Structure; Financial Flexibility
Employee Wellbeing	3	Employee health and safety	Diversification; Profitability; Financial Flexibility
Exposure to Social Impacts	3	Shifting social preferences; social resistance to major projects or operations that leads to delays or cost increases	Operating Environment; Sector Trend; Company's Market Position; Diversification; Profitability

Governance (G)

General Issues	G Score	Sector-Specific Issues	Reference
Management Strategy	3	Strategy development and implementation	Management and Corporate Governance
Governance Structure	3	Board independence and effectiveness; ownership concentration	Management and Corporate Governance
Group Structure	3	Complexity, transparency and related-party transactions	Management and Corporate Governance
Financial Transparency	3	Quality and timing of financial disclosure	Management and Corporate Governance

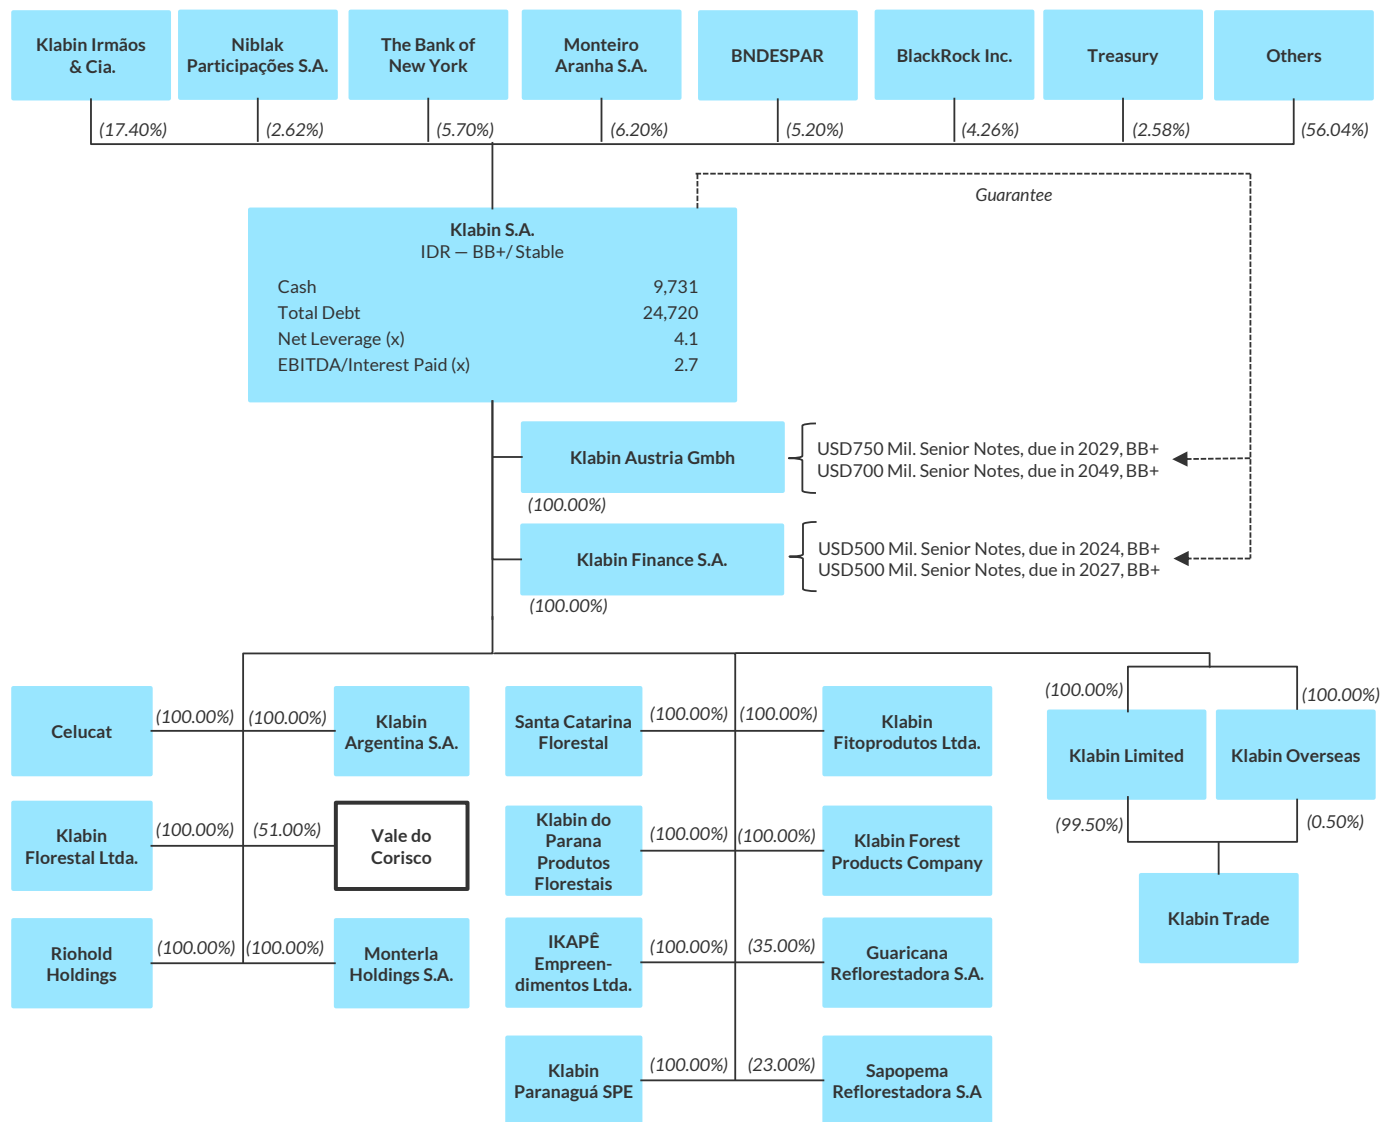

CREDIT-RELEVANT ESG SCALE

How relevant are E, S and G issues to the overall credit rating?	
5	Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator.
4	Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.
3	Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator.
2	Irrelevant to the entity rating but relevant to the sector.
1	Irrelevant to the entity rating and irrelevant to the sector.

FX Screener

Exports made up about 40% of Klabin’s sales in the LTM ended March 31, 2020. About 72% of total debt is U.S. dollar-denominated, and a 20% depreciation of the Brazilian real would likely increase net leverage by about 0.2x. About 11% of total cash and marketable securities were invested in hard currency as of March 31, 2020. Klabin does not hedge its foreign currency debt.

Reproduction or retransmission in whole or in part is prohibited except by permission. All rights reserved. In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.
