Subject of Action Item G:
USDA Promulgation of Federal Regulations and Guidelines for Hemp Production

Submitted by:
Secretary Brad Pfaff, Wisconsin

Text of Action Item:

NASDA encourages the USDA to promulgate as expeditiously as practicable the required regulations and guidelines to implement the statutory changes to hemp production, as amended in the Agriculture Improvement Act of 2018 (2018 Farm Bill).

NASDA supports USDA efforts to establish guidelines and provide technical assistance in the development of state or tribal plans that seek approval for delegated primary regulatory authority over the production of hemp.

NASDA urges USDA to consult with state agricultural departments and industry partners in the promulgation of regulations and guidelines relating to hemp production, including jurisdictions that do not request delegated primary regulatory authority.

Adopted:
February 26, 2019
