Subject of Action Item H:
Encourage FDA and EPA to act swiftly to adopt a regulatory framework as it relates to hemp and hemp products.

Submitted by:
Southern Associations of State Departments of Agriculture

Text of Action Item:
As the federal agency with clear governing authority, FDA (Food and Drug Administration) needs to develop a regulatory framework for the manufacturing, processing, and sale of Cannabinoid-related compounds derived from hemp. As more states legalize the production and sale of hemp and hemp-derived products, states are having a difficult time navigating federal regulations. States and the industry need clear guidance to bring safe, legal products to market. SASDA also resolves to encourage EPA (Environmental Protection Agency) to be a partner in timely issuance of pesticide registration and product availability.

Adopted:
September 11, 2019
