

OTHER TRANSFERS

Why is a sport, institution or conference not listed in the OTHER TRANSFERS when I select the sport list?

If a sport, institution or conference is not listed in the filter drop-down, a student has not yet been entered in the transfer portal for that sport, institution or conference for that year.

Why can't I find a student-athlete who I know was in the transfer portal before version 2.0 was launched?

Now that the 2018-19 and 2019-20 years are included in the transfer portal, you need to select what year(s) you are wanting to filter in OTHER TRANSFERS. Only students who were entered in the transfer portal after August 1, 2019 will show in the 2019-20 year. If you want to see both the 2018-19 and 2019-20 years, you can select ALL for the year filter. This is the same selection for your Transfer Watch List.

How does a coach see more information about the student other than the limited information shown on the list of students?

By clicking on the button in the student status column, the Division I notification of transfer or Division II/Division III permission to contact will appear. Only individuals with edit privileges have access to the transfer tracer.

Why is the student's phone number not visible to other institutions?

The student's phone number is only accessible to the institution the student is transferring from. That institution was required to enter the student's phone number so it would be easily accessible, if needed, and for a potential future enhancement to send messages by text from the portal. The only contact information visible for other institutions is the student's email address. If the student does not want other coaches to contact him/her, a designated symbol appears next to the student's name and the student's email address is not visible.
