EXECUTIVE SUMMARY

1981-82 — 2003-04 NCAA Sports Sponsorship and Participation Rates Report

The NCAA compiled the following statistical information regarding participation in intercollegiate athletics at its member institutions. This information provides a general view of historical trends in participation and sponsorship by gender, sport and division. Much of this information has been collected in detail since the 1981-82 academic year but the added teams, dropped teams and net change data are only available since 1988-89. Statistics from the 1956-57 through the 1981-82 academic years are included but are only available at five-year intervals and include recreation programs. Therefore, they are not directly comparable to the statistics for the years that followed.

Changes to the report, factors affecting the data, suggestions for the reader, the definition of a student-athlete and findings are stated in the introduction. Following the introduction, data for sports sponsorship, participation and average squad size by year, gender, sport and division are presented in many different table formats to allow for a variety of comparisons. In an effort to control for the fluctuation in NCAA membership, data are presented in this report that illustrate the number of teams added and dropped, by sport, gender and division for the years 1988-89 through 2003-04. Tables are also presented that illustrate the net result of teams being simultaneously added and dropped by year, sport, gender and division. The final section reports data on sports and recreation programs of universities and colleges from 1956-57 to 1981-82 at five-year intervals. There are separate tables for each sport by gender and an overall table.

A variety of factors may affect sports participation

and sponsorship rates at the collegiate level. For example, changes in high school and college student populations, budget fluctuations, changes in the value of private institution endowments, insurance costs, the popularity of any one sport, gender-equity concerns, and NCAA rules. Also contributing is the increase in NCAA membership, members changing divisional classification and which sports are designated as championship sports.

While the number of championship sport teams sponsored for men remained basically the same in 2003-04, the number sponsored for women increased by approximately 100 teams resulting in nearly 17,000 championship sport teams sponsored at NCAA member institutions for both men and women. In 2003-04, 52.8 percent of the championship sport teams in the NCAA were women's teams and the average NCAA member institution sponsored approximately 17 teams, eight for men and nine for women.

There are now over 375,000 student-athletes participating in sports for which the NCAA conducts championships. There are still more male student-athletes (57.2 percent of the total) than female student-athletes participating in championship sports. In 2003-04, the average NCAA member institution had approximately 366 student-athletes, 209 males and 157 females.

The result of NCAA schools simultaneously adding and dropping teams in 2003-04 was a net loss of nine men's teams and a net gain of 57 women's teams. In 2003-04, the women's sport with the greatest net gain was golf with 20 teams. On the other hand, the men's sport with the greatest net loss of teams in 2003-04 was tennis (-10).

INTRODUCTION

1981-82 — 2003-04 NCAA Sports Sponsorship and Participation Rates Report

INTRODUCTION

The NCAA compiled the following statistical information regarding participation in intercollegiate athletics at its member institutions. This information provides a general view of historical trends in participation and sponsorship by gender, sport and division. Much of this information has been collected in detail since the 1981-82 academic year but the added teams, dropped teams and net change data are only available since 1988-89. Statistics from the 1956-57 through the 1981-82 academic years are included but are only available at five-year intervals and include recreation programs. Therefore, they are not directly comparable to the statistics for the years that followed.

ORGANIZATION OF THE REPORT

The first section of this report provides separate tables for each year from 1981-82 to 2003-04 illustrating the number of teams, student-athletes and the average squad size by sport and gender for championship sports, selected non-championship sports for men and emerging sports for women. The second section focuses on championship sports participation in aggregate by year, division and the NCAA overall. A similar section follows next but focuses on championship sports sponsorship.

The next two sections, one for women's sports and one for men's sports, provide sport specific tables with historical sponsorship, participation and the percentage of the NCAA membership sponsoring each sport by division and for the NCAA overall. The average number of teams per institution is presented next along with tables comparing the number of teams for each sport by division and for the NCAA overall. Data showing the average number of participants per institution and by sport for each division and the NCAA overall follow next in the report. A separate section focusing on average squad

size data is also included.

In an effort to control for the fluctuation in NCAA membership, data are presented in this report that illustrate the number of teams added and dropped, by sport, gender and division for the years 1988-89 through 2003-04. Tables are also presented that illustrate the net result of teams being simultaneously added and dropped by year, sport, gender and division.

The final section reports data on sports and recreation programs of universities and colleges from 1956-57 to 1981-82 at five-year intervals. There are separate tables for each sport by gender and an overall table.

CHANGES TO THE REPORT

The 1995-96 academic year marked a change in the way participation and sponsorship data were reported. For the first time, provisional members of the NCAA were included in the study along with active members. Provisional members follow NCAA rules and compete against other NCAA member institutions, but do not have voting privileges. All of the participation and sponsorship information compiled since the 1995-96 academic year represent active and provisional members. The inclusion of provisional members primarily affects the participation and sponsorship figures at the Division II and III levels, because most of the increase in provisional membership occurred in those divisions. It is difficult to accurately compare data that includes provisional members with data from only active members (i.e., studies done before 1995-96); therefore, the information in this report indicates when the data include provisional members.

The 1997-98 and 1998-99 participation rates data were compiled using an improved methodology than was used in previous years. The data from the 1995-96

and 1996-97 academic years were recalculated using this new method, which more accurately represents the actual participation rates of NCAA member institutions. Therefore, the data for 1995-96 and 1996-97 will not necessarily match the data for corresponding years in publications of this report prior to the 1998-99 report. This new methodology incorporated data from the Equity in Athletics Disclosure Act (EADA) form. It was not necessary to use the EADA data after the 1998-99 academic year because the NCAA collected participation data based on the EADA definition of a participant.

FACTORS AFFECTING THE DATA

Due to the increase in the number of NCAA member institutions, participation and sponsorship numbers may not accurately reflect expansion or contraction of participation opportunities at the institutional level. An increase may simply reflect the number of new institutions that joined the NCAA and sponsor teams for those sports.

A variety of other factors may also affect sports participation and sponsorship rates at the collegiate level. For example, changes in high school and college student populations, budget fluctuations, changes in the value of private institution endowments, insurance costs, the popularity of any one sport, and gender-equity concerns can have an effect on sports participation and sponsorship. NCAA rules may also have a limited effect on participation and sponsorship patterns. For example, the 1993-94 academic year marked the first time institutions could not field teams at a lower divisional level than the rest of their program. As a result, many Division I institutions that fielded Division III football teams raised their team from Division III to I-AA while other institutions may have dropped the sport entirely.

SUGGESTIONS FOR THE READER

It is important to note that the statistics provided by the NCAA in this report are derived from self-reported data supplied by its member institutions. No specific checks were made to verify the information provided by the institutions. While this information provides a good indication of general trends in participation and sponsorship from 1981-82 through 2003-04, the data may

not be absolutely precise.

For sports in which the NCAA does not offer a championship, the data are even less likely to be precise. Institutions are allowed to count a limited number of non-NCAA sports toward their membership minimums, but they may or may not report participation and sponsorship figures for those teams.

It is also important to note that no effort was made to determine the reason for the addition or discontinuation of any team in the added and dropped sports sections. In compiling these data, every effort was made to exclude those institutions, and subsequently the teams associated with those institutions, that added or dropped NCAA membership in any particular year. Therefore, only those teams at institutions that were already members of the NCAA in the specific year reported were included in the added and dropped teams data.

Specific questions concerning the statistics included in this report may be directed to the NCAA research department or public and media relations department at 317/917-6222.

DEFINITION OF A STUDENT-ATHLETE

For the purposes of this report, a participant at an NCAA member institution is defined as a student who, as of the day of the varsity team's first scheduled contest: (a) is listed as a team member; (b) practices with the varsity team and receives coaching from one or more varsity coaches; or (c) received athletically-related student aid. Any student who satisfies one or more of the criteria above is a participant, including a student on a team the institution designates or defines as junior varsity, freshman, or novice, or a student who does not play in a scheduled contest, whether for medical reasons or to preserve eligibility (i.e., a redshirt). Student-athletes who participate in more than one sport are counted in each sport.

FINDINGS

Sports Sponsorship

The number of NCAA championship sport teams was at an all-time high in 2003-04 with much of the latest increase coming from an increase in the number of

women's championship sport teams. While the number of championship sport teams sponsored for men remained basically the same, the number sponsored for women increased by approximately 100 teams resulting in nearly 17,000 championship sport teams sponsored at NCAA member institutions for both men and women. In 2003-04, 52.8 percent of the championship sport teams in the NCAA were women's teams. The proportion of men's to women's championship sport teams is similar when looking at each division separately.

As has been the case since the 1996-97 academic year, there were more championship sport teams sponsored in the NCAA for women than for men. The number of women's championship sport teams sponsored in the NCAA has increased each year for the past 22 years. A year-by-year analysis of the number of men's teams sponsored reveals a different picture. The number of men's championship sport teams has decreased five out of the last 10 years and nine out of the last 22.

In 2003-04, the average NCAA member institution sponsored approximately 17 teams, eight for men and nine for women. The trend of sponsoring more teams for women than for men began in the 1997-98 academic year. Compared to the 1981-82 academic year, the average NCAA school now sponsors approximately two more women's teams and one less men's team.

Since the 1981-82 academic year, there have been more women's basketball teams sponsored than any other women's team and in 2003-04 that trend continued. Volleyball, cross country, softball, soccer, tennis and track and field are the next most highly sponsored sports for women, in that order. A look at each division separately reveals the same general trend in sponsorship of specific women's sports.

As is the case with women's sports, there have been more men's basketball teams sponsored than any other men's sport and in 2003-04 that trend continued. The next most highly sponsored sports for men are, in order, cross country, baseball, golf, tennis, soccer, track and field and football. A look at each division separately reveals the same general trend in sponsorship of specific men's sports.

Sports Participation

Participation levels in NCAA championship sports were also at an all time high in 2003-04 for both male and female student-athletes. There are now over 375,000 student-athletes participating in sports for which the NCAA conducts championships. There are still more male student-athletes (57.2 percent of the total) than female student-athletes participating in championship sports. The proportion of male to female student-athletes participating in NCAA championship sports is similar when looking at each division separately.

In 2003-04, the average NCAA member institution had approximately 366 student-athletes, 209 males and 157 females. Since the NCAA began collecting this data in 1981-82, there have always been, on average, more male student-athletes than female student-athletes per institution. However, while the average number of female student-athletes on campus has increased since 1981-82, the average number of male student-athletes on campus has decreased. More specifically, compared to the 1981-82 academic year, the average NCAA school now has approximately 58 more female student-athletes and 17 fewer male student-athletes.

Traditionally, women's track and field had more female student-athletes in the NCAA than any other women's sport. But since the 1999-00 academic year women's soccer now has the most female student-athletes. Softball, basketball, volleyball, cross country, swimming and diving, and tennis are the sports with the next highest number of female participants, in that order. A look at each division separately reveals the same general trend in participation of specific women's sports.

Since 1981-82, football has had the most participants of any men's sport and in 2003-04 that trend continued. The next highest participation levels for men are in the sports of, in order, baseball, track and field, soccer, basketball and cross country. A look at each division separately reveals the same general trend in participation of specific men's sports.

Teams Added

In 2003-04, there were 119 men's teams added and

142 women's teams added at NCAA member institutions. Since 1988-89 there have been 2,203 men's teams added and 3,433 women's teams added with each specific academic year having more women's teams added than men's teams. In each division separately, the general trend of adding more women's teams than men's teams each year continued.

In 2003-04, the sport with the highest number of women's teams added was golf with 27, followed by indoor track and field, cross country, and soccer. The women's sport that has been added the most since 1988-89 is soccer with 551 new programs in the NCAA. Some other women's sports with a large number of teams added since 1988-89 are, in order, golf, indoor track and field, cross country, softball and outdoor track and field.

The sport with the highest number of men's teams added in 2003-04 was indoor track and field with 22 new programs followed by cross country, golf and outdoor track and field. The men's sport that has been added the most since 1988-89 is indoor track and field with 289 new teams in the NCAA. Some of the other sports with a large number of men's teams added since 1988-89 are cross country, golf, outdoor track and field, and rowing.

Teams Dropped

In 2003-04, there were 128 men's teams and 85 women's teams dropped at NCAA member institutions. Since 1988-89 there have been 2,161 men's teams dropped and 1,462 women's teams dropped with each specific academic year having more men's teams dropped than women's teams. In each division separately the general trend of dropping more men's teams than women's teams each year continued.

In 2003-04, the sport with the highest number of women's teams dropped was tennis with 16, followed by indoor and outdoor track and field. The women's sport that has been dropped the most since 1988-89 is cross country with 176 programs eliminated in the NCAA. Some other women's sports with a large number of teams dropped since 1988-89 are, in order, golf, indoor and outdoor track and field, and tennis.

The sport with the highest number of men's teams dropped in 2003-04 was tennis with 17 teams eliminated followed by outdoor and indoor track and field, cross country and rifle. The men's sport that has been dropped the most since 1988-89 is indoor track and field with 212 teams discontinued in the NCAA. Some of the other sports with a large number of men's teams dropped are tennis, cross country, golf, rowing, outdoor track and field, swimming and diving, and wrestling.

Net Change in Sports Sponsorship

The result of NCAA schools simultaneously adding and dropping teams in 2003-04 was a net loss of nine men's teams and a net gain of 57 women's teams. Since 1988-89 there has been a net gain of 42 men's teams and 1,971 women's teams in the NCAA. That equates to 98 percent of the net gain in teams in the NCAA from 1988-89 to 2003-04 coming from net gains in the number of women's teams. In eight of the last 16 years there was a net loss of men's teams while in all but one year (1988-89) there was a net gain of women's teams.

Many of the net losses in men's sports have come in Division I. More specifically, in 2003-04 there was a net loss of 30 men's teams and since 1988-89 there has been a net loss of 239 men's teams. By comparison, since 1988-89 there has been a net gain of 661 women's teams in Division I. In 12 of the last 16 years there has been a net loss of men's teams in Division I while the only net loss year for women's sports came in 1988-89.

In 2003-04, the women's sport with the greatest net gain was golf with 20 teams. The only other women's sport with a double digit net gain in teams in 2003-04 was soccer (12). Historically, the women's sport with the greatest net gain since 1988-89 is soccer with 524 teams. Other women's sports with large net gains since 1988-89 are golf, softball, indoor track and field, cross country and lacrosse.

Conversely, the women's sport with the greatest net loss of teams in 2003-04 was tennis (-14) and no other women's sport had a net loss of more than four teams. Since 1988-89, the women's sport with the greatest net loss of teams is gymnastics (-37). The only other

women's sports with a double digit net loss of teams since 1988-89 are fencing (-18) and skiing (-11).

In 2003-04, the men's sport with the greatest net gain was indoor track and field with 10 teams. No other men's sport had a double digit net gain in teams in 2003-04. Historically, the men's sport with the greatest net gain since 1988-89 is indoor track and field with 77 teams. Other men's sports with notable net gains since 1988-89 are cross country and lacrosse.

On the other hand, the men's sport with the greatest net loss of teams in 2003-04 was tennis (-10) while no other men's sport saw a double digit net loss of teams. Since 1988-89, the men's sport with the greatest net loss of teams is wrestling (-106). Other men's sports with notable net losses of teams since 1988-89 are tennis (-78), rifle (-40), gymnastics (-34), swimming and diving (-23), fencing (-21), skiing (-17) and water polo (-16).

NOTES: 1. Participation totals are adjusted to reflect all institutions sponsoring each sport. 2. Provisional members are included in these numbers. 3. Coed sport teams from the sports sponsorship database were added to both the men's AND women's team data. The following sports had coed teams: a) cross country, b) equestrian, c) fencing, d) golf, e) rifle, f) swimming & diving, g) indoor track & field and h) outdoor track & field. 4. The total row contains data from the non-championship sports subtotal row added to the championship sports subtotal row (see previous page). N/A = Not Applicable

Please note: For the 1995-96 through 1998-99 academic years, the average squad size data came from the Equity in Athletics Disclosure Act (EADA) form.
As a result of using that data, the information for the years of 1995-96 and 1996-97 will not match the data printed in previous publications.

Please note: For the 1995-96 through 1998-99 academic years, the average squad size data came from the Equity in Athletics Disclosure Act (EADA) form. As a result of using that data, the information for the years of 1995-96 and 1996-97 will not match the data printed in previous publications.

[†] For the years 1982-83 through 1994-95 women's rifle data were included with men's rifle data. Rifle is a co-ed championship sport.

* Provisional members are included in these numbers.

Please note: For the 1995-96 through 1998-99 academic years, the average squad size data came from the Equity in Athletics Disclosure Act (EADA) form.
As a result of using that data, the information for the years of 1995-96 and 1996-97 will not match the data printed in previous publications.

Please note: For the 1995-96 through 1998-99 academic years, the average squad size data came from the Equity in Athletics Disclosure Act (EADA) form.

As a result of using that data, the information for the years of 1995-96 and 1996-97 will not match the data printed in previous publications.

Please note: For the 1995-96 through 1998-99 academic years, the average squad size data came from the Equity in Athletics Disclosure Act (EADA) form.
As a result of using that data, the information for the years of 1995-96 and 1996-97 will not match the data printed in previous publications.

Please note: Men's sailing participation data for the 1983-84 academic year are unavailable.
After the 1987-88 academic year, the NCAA no longer sponsored sailing as a championship sport and therefore the participation data were no longer tracked.
Beginning in 1998-99, the NCAA began tracking men's sailing participation data as a non-championship sport.

Please note: For the 1995-96 through 1998-99 academic years, the average squad size data came from the Equity in Athletics Disclosure Act (EADA) form.
As a result of using that data, the information for the years of 1995-96 and 1996-97 will not match the data printed in previous publications.

Please note: For the 1995-96 through 1998-99 academic years, the average squad size data came from the Equity in Athletics Disclosure Act (EADA) form.
As a result of using that data, the information for the years of 1995-96 and 1996-97 will not match the data printed in previous publications.

Please note: For the 1995-96 through 1998-99 academic years, the average squad size data came from the Equity in Athletics Disclosure Act (EADA) form.
As a result of using that data, the information for the years of 1995-96 and 1996-97 will not match the data printed in previous publications.

**SPORTS AND RECREATION
PROGRAMS OF UNIVERSITIES
AND COLLEGES
1956-57 — 1981-82**

Sports and Recreation Programs of Universities and Colleges 1956-57 - 1981-82

Total Participation

Between 1956-57 and 1981-82, participation rates were collected in five-year intervals. The data for these years was not collected in the same manner as the data from 1982 to the present and it includes recreation programs. Therefore, these data are not directly comparable to the other data in this report. This information is only meant to provide a historical view.

YEAR	TOTAL WOMEN PARTICIPANTS	TOTAL MEN PARTICIPANTS
1956-57		105,613
1961-62		140,104
1966-67	15,182	151,918
1971-72	29,977	170,384
1976-77	62,886	168,136
1981-82	68,062	156,131

Note: Empty cells indicate data for that year are
unavailable.
