1. **Athletics aid component.** The NCAA Division I Working Group on Transfers continued its discussion of how to incentivize degree completion support for four-year transfer student-athletes. While the working group recognizes that existing legislation allows institutions to provide athletics aid support to student-athletes who have exhausted their athletics eligibility, they agreed broader mandated degree completion requirements should be referred to the appropriate governance entity. In the interim, the working group agrees all institutions that recruit four-year transfer student-athletes should consider supporting those student-athletes financially, even when their degree completion goes beyond their final season of athletics eligibility. The working group will ask the NCAA Division I Council to make a referral to the appropriate entity to explore required degree completion funds for all four-year transfer student-athletes as a part of its forthcoming comprehensive financial aid review.

2. **NCAA Division I Council update.** The working group received an update from the chair on the Division I Council discussion pertaining to its uniform transfer eligibility exception concept at its September 16 videoconference. The working group expects additional feedback from the Council standing committees during their forthcoming October videoconferences.

3. **Future videoconference.** The working group will hold its next videoconference at 2 p.m. Eastern time September 28.
