

NATIONAL TYPE EVALUATION PROGRAM

Certificate of Conformance

for Weighing and Measuring Devices

For:

ECR/POS Interfaced with RMFD
Electronic Cash Register (ECR)/Point-of-Sale System (POS)
Interfaced with Retail Motor Fuel Dispenser (RMFD)
Model: CFC POS

***Submitted By: Contact Info. Updated October 2018**

Standard Features and Options

Standard Features:

- ECR Controls up to 32 Fueling Sites
- Pre-Pay/Post-Pay
- Cash/Credit
- Stacking Memory (Two Transactions per Fueling Site)
- Receipt Printer
- Electronic Journal
- Monitor with Touch Screen Display
- Touchscreen Display with Programmable Keys, Icons (Symbols), and a Numeric Keypad
- Cash Drawer
- Remote Customer Display

Options:

- Card Reader (Debit Card and Card Lock)
- Software Only (Customer Supplies Hardware)

This device was evaluated under the National Type Evaluation Program and was found to comply with the applicable technical requirements of "NIST Handbook 44: Specifications, Tolerances and Other Technical Requirements for Weighing and Measuring Devices." Evaluation results and device characteristics necessary for inspection and use in commerce are on the following pages. *Editorial changes, not affecting the type or metrological content, corrected this certificate.

ECR/POS Interfaced with RMFD / CFC POS

Application: Stand-alone, software-driven cash register (monitor, computer, and receipt printer) for use with National Type Evaluation Program (NTEP) compatible retail motor fuel dispensers.

Identification: The identification badge with the required make, model, serial number, and NTEP Certificate of Conformance (CC) Number is located on the computer and is required to be visible after installation. The same information can also be verified on the display screen by touching the display key labeled "Notes" on the touchscreen.

Sealing: There are no metrological adjustments in the ECR that require a security seal. The electronic fuel dispensers must have provisions for sealing.

Operation: The system is an ECR consisting of a personal computer, attached cash drawer, receipt printer, customer display, and touchscreen display. The screen uses various icons to initiate and complete "C-Store" (convenience store) and motor fuel transactions.

Test Conditions: This certificate is issued based upon the following tests and upon information provided by the manufacturer. This device is identical to the device listed in CC Number 94-102, which became inactive January 1, 1997. This certificate is issued without additional testing based on testing performed with CC Number 94-102 and information provided by the manufacturer. The test conditions for CC 94-102 are listed in this certificate for reference.

Certificate of Conformance Number 94-102: The Model RPM POS computerized cash register was interfaced with a Progressive International Electronics pump interface module and a fuel simulator for the evaluation. The interface module controls the electronic dispensers. The system was tested at the manufacturer's facility. The emphasis of the evaluation was on the operational features of the cash register, receipt format, and interaction of the cash register with the gasoline dispensers. Additionally, the system was tested in the field and then again approximately 30 days later.

Evaluated By: G. Castro (CA) and S. Grabski (NV) 94-102; J. Roach (CA) 16-0xx

Type Evaluation Criteria Used: *NIST Handbook 44 Specifications, Tolerances, and Other Technical Requirements for Weighing and Measuring Devices*, 2016 Edition. *NCWM Publication 14 Measuring Devices*, 2016 Edition.

Conclusion: The results of the evaluation and information provided by the manufacturer indicate the device complies with applicable requirements.
