

NATIONAL TYPE EVALUATION PROGRAM

Certificate of Conformance

for Weighing and Measuring Devices

For:

Indicating Element
Digital Electronic
Model: CS-19 Series
 n_{max} : 10 000
Accuracy Class III / III L

Submitted By:

Standard Features and Options

Standard Features:

- Automatic Zero Tracking (AZT)
- 7 Digit, 7-Segment (numeric) Display
- Initial Zero Setting Mechanism (IZSM)
- Unit Conversion (lb, kg, g, oz) (lb-oz Not legal for trade)
- Semi-Automatic Zero (push- button)
- Gross/Net/Tare Annunciators
- Semi-Automatic (push- button) Tare
- Stable Weight Annunciator
- Power saving Feature (Auto Shut Off)
- Time/Date Printing
- A/C Power supply
- Low Battery Annunciator
- Stainless Steel or Plastic Enclosures
- Multi-Point Calibration (up to 3)
- Center of Zero Annunciator
- RS-232 Bidirectional Communication
- Category I Audit Trail
- Liquid Crystal Display (LCD)
- Accumulator Function
- Multi-Interval

Optional Features:

- DC power (Battery)
- Reverse LCD Display
- Wireless communication (Bluetooth, Wi-Fi, RS485)
- Wireless Operation Between TI-500 RFTM-B1/B1E (NTEP CC 12-002) and Indicating Element

This device was evaluated under the National Type Evaluation Program and was found to comply with the applicable technical requirements of "NIST Handbook 44: Specifications, Tolerances and Other Technical Requirements for Weighing and Measuring Devices." Evaluation results and device characteristics necessary for inspection and use in commerce are on the following pages.

Brett Gurney
Chairman, NCWM, Inc.

James Cassidy
Committee Chair, National Type Evaluation Program Committee
Issued: April 24, 2019

1135 M Street, Suite 110 / Lincoln, Nebraska 68508

The National Conference on Weights and Measures (NCWM) does not approve, recommend or endorse any proprietary product or material, either as a single item or as a class or group. Results shall not be used in advertising or sales promotion to indicate explicit or implicit endorsement of the product or material by the NCWM.

Pro Tournament Scales

Indicating Element / CS-19 Series

Application: General purpose indicating element for use with a NTEP certified and compatible weighing/load receiving element.

Identification: The required markings are located on an adhesive label on the top of the indicator. If an attempt is made to remove the label, a checkerboard pattern will be present to indicate the label has been removed.

Sealing: These indicators use a Category I Audit Trail: Configuration and calibration counters update each time a configuration or calibration change occurs. The counters return to zero after 1000 changes, individually. The counters may be viewed by powering up the unit: The screen will display the configuration audit counter ("CF") and the calibration audit counter ("CA"). Seal these devices using one wire security seal through two adjacent screws on the rear cover; this prevents internal access to the calibration jumper.

Test Conditions: This certificate was issued based upon the following tests and upon information provided by the manufacturer. The emphasis of the evaluation was on device design, marking, operation, performance, and compliance with influence factors. Two indicating elements, (plastic case and stainless-steel case) were submitted for evaluation. The indicator was interfaced to a Doran model: DXL 8100 weighing/load receiving element (Certificate of Conformance 97-097A1) to verify compliance with zero, zone of uncertainty, unit conversion, and motion detection requirements. Additionally, the indicator was interfaced to a load cell simulator to perform several increasing / decreasing tests, warm-up test and power interrupt test. Wireless communication tests were also performed. Temperature tests were performed on both stainless steel and plastic cases over a range of -10 °C to 40 °C (14 °F to 104 °F).

Evaluated By: J. Gibson (OH) 19-039

Type Evaluation Criteria Used: *NIST Handbook 44 Specifications, Tolerances, and Other Technical Requirements for Weighing and Measuring Devices*, 2019 Edition. *NCWM Publication 14 Weighing Devices*, 2018 Edition.

Conclusion: The results of the evaluation and information provided by the manufacturer indicate the device complies with applicable requirements.
