Toyota Models On this page you will find links to various Toyota car manuals and manuals. Official manuals of the Toyota factory dedicated to certain models. Toyota (Toyota Motor Corporation, Toyota Jidosha KK), a Japanese car company that is part of the financial and industrial group Toyota. One of the largest car companies in the world. It produces its products under various brands, including Daihatsu. The headquarters are in Toyota (Tota). The beginning of the Toyota company's history can be considered 1933, when Toyoda Automatic Loom Works, initially unrelated to cars and engaged in the textile industry, opened an automotive department. Discovered by his eldest son, company owner Sakichi Toyoda (Kiichiro Toyoda), later, and brought the Toyota brand to global fame. The initial capital for the development of the first cars is the money earned from the sale of patent rights to spinning machines to the British company Platt Brothers. In 1935, the work of the first car called the Model A1 (later AA) and the first Model G1 truck was completed, and in 1936 the Model AA car was put into production. At the same time, the first export delivery is made – four G1 trucks have gone to northern China. A year later, in 1937, the automotive department became a standalone company called Toyota Motor Co., Ltd. This is, in short, the story of Toyota's prewar development. To date, Toyota is one of the largest car manufacturers in the world. Of course, it is also Japan's largest automaker, producing more than 5.5 million cars a year, roughly equal to one car every six seconds. There are many companies in the Toyota group, both automotive and engaged in many different fields.
