Re: 4830 W 200 N, Huntington, IN 46750

To Whom It May Concern:

The Huntington County Health Department has no records of an on-site sewage disposal system on the above referenced property. An inspection report was submitted to this department on October 2, 2018. The inspection report revealed that the on-site sewage on the above referenced property consists of one or more septic tanks and a soil absorption field.

Rule 410 IAC 6-8.3-52(d) states:

“Any dwelling that is not connected, or cannot be connected, to a sanitary sewerage system shall be provided with a residential on-site sewage system that includes a septic tank and a soil absorption system that has not failed.”

Based on the inspection report, this system is not failing and includes septic tank(s) and a soil absorption field. Therefore, this Department has no issues with the current system.

If you should have any questions regarding this matter, please contact the undersigned directly.

Sincerely,

Brant Ricker  
Environmental Health Specialist
