Chance,

In regards to stormwater and the driveway on this property DPI if ok with everything installed.

Thanks for reaching out.

On a separate note we will be sending out corrective action for a couple of sites that get weekly sediment and erosion inspections. One of the sites is Revere Copper site. Wasn't sure if you too have been having issues with that site, but a lot of the concerns are the same as the last time we met out there. Let me know if there is anything that comes to mind and I can include it in our email.

Happy New Year,

Dennis Souza

Hi Chance,

I'm going to forward this to Dennis Souza, as he signed off on the CO at the beginning of Nov. last year and would be able to inform you accordingly. Take care.

Ana

Subject: 701 New Plainville Rd - Driveway Review

Ana, The Conservation Commission is looking to issue an Amended Order of Conditions for work done at 701 New Plainville Rd (Map 124C, Lot 54) and we are just looking to confirm the now paved driveway is ok in its current form (see attached As-Built. I'm told by the applicant (Joseph Machado, cc'd here) that your team inspected it recently. We are just double checking all is well with you folks on the stormwater considerations for this before we proceed. An email reply in the affirmative is all we need.

Thank you greatly, Chance
