**The Pele Report – August 19, 2015**

Hola ~ Buenos Dias ~

This is Kaypacha with the weekly Pele Report and this report is for August 19<sup>th</sup> of 2015. I want to mix it up a little bit. I'm been doing this same doggone thing week after week, for years, year and years... (\*laughing)

*I want to respond to customer comments. Number one is that when I use too many hand gestures the focus messes up and I'm going to try to chill out with the hand gestures. Number two, it was also brought to my attention that many of you people watching this Pele Report may not be aware that I travel all over the place offering workshops on astrology - different aspects, Black Moon Lilith, Chiron, or sexuality or biography. I will be leaving next week for Vancouver*

*Island, I'm going to be up there. I am doing another one in Boulder, Colorado in early September. I am going down to Taos, New Mexico. Then I am going down to Australia and Bali in November and December. I am planning more workshops in Costa Rica and Guatemala next year. Then next summer, I will be over in Ibiza, Portugal and Greece. Please check out my website, maybe if you don't listen to the whole report, you never get to the end there where it says, 'If you want to know more, go to my website.'* <http://newparadiqmastrology.com>

*What else? Another one is that people have really enjoyed software of where they see the planets. So today I am modifying the Pele Report. I am going to go to the computer, and I am going to use some other astrology software, (Solar Fire by ASTROLABE) because somebody else was very interested in the sacred geometry. With those charts I put out, you can see all the angles, quincunx, trines, and sextiles, all these aspects come together and there is a lot of meaning behind the sacred geometry of the aspects of the planets. I want to show you that a little bit more today with the software. And what's the last one? I think I've also gotten some feedback that people would like more than a weekly report. I am going to use my software and go a little bit more towards the of the end year, into 2016. I am calling 2016, "The year of purification" - that's it baby!*

We've got Jupiter in Virgo. It's going to be opposing Neptune and Chiron. I will show you this with the software squaring Saturn and everything. It's really time to get our act together. I just wanted to show my face and say hello, give an introduction. I am now going to move over to the computer and give you the rest of the Pele Report – a little different than the usual walk in the park. Because you know what? Life is not always a walk in the park... ha-ha...

*\*Kaypacha is screen sharing his astrology software chart for August 19<sup>th</sup>, 2015, and into 2016.*

Let's get down to business because that's what Virgo is about - work, service, contribution and business. As you can see and I've talked about it before, Jupiter just went into Virgo a little while ago. What we have going on this week is on this Sunday, the Sun is also going to move into Virgo. Then we are going to have the Sun/Jupiter/Mercury and Black Moon Lilith all in the sign of Virgo. As you can see, Mercury is in opposition to Chiron in Pisces. And the Sun conjunct Jupiter in opposition to Neptune over here in Pisces. And this is going to be going on for quite some time – I'm going to talk about that a little bit.

In the meantime, if we go back a little bit to more about this week, you can see that Saturn is up here in a square right to the Sun and Jupiter that is exact on Friday. Here's the interesting thing, we have the first quarter square – the Moon square the Sun. Only it's just not the Moon Ladies and Gentlemen, it is the Moon conjunct Saturn, both square to the Sun. That is coming up on Saturday.

What we are seeing is, let's look at the interpretation a little bit. I think that was most of the aspects that I really wanted to bring forward at this time. And last but not least obviously you can see that Black Moon Lilith is conjunct the North Node of the Moon in Libra. We have the situation where as of today, the Moon is in Libra. Then she goes into Scorpio on Thursday –

stays there for a couple of days, hits that Moon. We've got that square Moon on Saturday, then she goes into Sagittarius on Saturday, and stays there until entering Capricorn on Monday. That's the movement of the Moon.

Again, it is separating. We have that new Moon, can't forget that new Moon. Let's go back a little bit. Remember that new Moon? It was last Friday in Leo, conjunct Venus – I did that whole meditation going on with this Sun/Moon/Venus, very powerful day last Friday. Starting off a new month cycle and that new month cycle is starting off in the sign of Leo. It's time for me to be authentic. It's time for me to express my true nature, for me to own just exactly who I am and let go of anything that I am not. And then this moves in the development is into Virgo – purification, purging, cleansing, clearing, and healing. What is this Virgo healing about?

You can see there's this opposition and this is a long time opposition. Chiron is in Pisces for seven years, from 2011 until 2018. Neptune is in Pisces from 2012 until 2024, even more than that, it's fourteen years. So these two, this is in the sign of what? Pisces, infinite spirit, infinite love, no boundaries, no walls, no limits. It's the dream, it's the void. When we are dealing with Chiron in Pisces for seven years, from 2011 to 2018, we are healing the wound of separation from spirit, and Neptune is coming along to assist us in that.

What we have then is this opposition is opening up the gates - I call the Pisces/Virgo axis, the axis of initiation. We are all being collectively now initiated. Virgo is initiating the self into partnership/relationship in Libra. Pisces is initiating the community, the planet into a new beginning within the cosmic consciousness. What we have here is, all this initiation is requiring cleansing, purification and clearing. And that's why I say 2016 is what it's all about, and I'm going to get a little more into that.

Let's go a little bit forward now and point out a couple more dynamics that are going on. What we can also see with all of this is what? The other aspect I want to bring forward, Venus trine Uranus. Now you can see Venus is retrograde. That's what this little 'R' is here. Venus first came up trine Uranus at 20 degrees, then it went retrograde, now going back trining Uranus again. It's going back to 13 degrees, and it's going forward and trine Uranus again – its three months of Venus trine Uranus, which is what? Breaking out and breaking free. Uranus is liberation, it is the new, and it is the unconventional. Venus is the way we love, the way we are, what we are attracted to, the sweetness of life. And you can see what happened. She went up to Virgo and said, 'Oh my goodness, I forgot Mars.' So now she is going back.

Now let's look. We have a Venus/Mars conjunction going on all this time – she's going back, back, back, and back. There she is, 14/15 degrees, you see it September 1<sup>st</sup>. We have this Venus/Mars conjunction. Then she's going to go straight, she's going to go direct, and Venus and Mars are going to be traveling along together. All the way through September and trining Uranus in the meantime. They're going to travel into Virgo together – Venus/Mars/Jupiter are all going to be in Virgo together from October 8<sup>th</sup> to November 8<sup>th</sup>. Venus/Mars/Jupiter traveling through Virgo in opposition to Neptune and Chiron, healing the wound of separation

between the sexes, between the masculine and the feminine. This is such a really, beautiful, powerful time. I am going to stop it there, you can see, too much to go into in one day. I wanted to show you a little bit of what's coming up through September/October. We have this whole process that's going on with Virgo with the balancing of the feminine and the masculine. I am actually releasing a talk on the masculine and feminine, it's on my website, the link: <http://newparadiqmastrology.com/shop/classes/evolving-the-masculinefeminine-for-a-new-paradigm/> the evolutionary stages in relationship to the expression of the masculine and feminine, and the changing nature of relationships in the new paradigm. And this is really super powerful through August/September/October and November.

Let's look at what's coming up in 2016. Look at what happens here. I am going to go by weeks now instead of days. Watch this sacred geometry happen here. What's really going on that you will see through 2016, boom, there goes the North Node into Virgo. The North Node of the Moon, our future planetary soul intention traveling together with Jupiter in opposition to this Chiron/Neptune and in square to Saturn. Do you see this T-square that's going through most of 2016? We really want to look at what's happening so much during 2016. I am going to go backwards a little bit, I love the little hat that happens here. Where was that hat that happens again? There's a couple of trines and a couple of squares. It's great, I think it's in May...see it's like a beautiful hat that happens there.

Saturn: form and structure. Saturn is coming around, coming back to Sagittarius in September. It's spending two and half years reforming and restructuring our relationship to natural law, what we believe, this is Sagittarius. It's religion, it's what we believe, it's the higher mind, and it's the right brain. It's expansion of consciousness. We need to reform, cleanse out, clear out and reflect on the connection between what? What are we healing here?

What we are healing is the split that happened in the Piscean Age, the last two thousand years, split Spirit/Pisces from Virgo/Earth, our bodies. It has been a split between spirit and matter going on for a couple thousand years. This is the split that we are now healing and will be healing all through 2016. As we can see with Venus and Mars has a lot to do with our sexuality, it has to do with guilt and shame around our bodies, and around being in a body and dealing with our health – everything that having a body involves. And our relationship to the collective to the whole. We are in this Age of Aquarius which is about community. Libra and Aquarius are air signs and have to do with global consciousness, community and communication.

This is a very unique time in the evolution of species and evolution of our consciousness. It involves like I say, over this year of 2016, you are just going to really be seen. Very often Virgo brings in crisis. It can be health crisis, could be health care crisis, the health care systems, there can be viruses, bacteria. We are really going to be dealing very much with our immune systems, which is ruled by Neptune in Pisces, the breakdown, immune disorders, allergies. This is really becoming really more aware of and connected to, not only our bodies, but our collective body. Our collective body is Gaia, planet Earth, our environment, our GMOs, our chemicals, our polluted rivers and streams, oceans and skies. This is the great planetary

purging and this is our physical, individual purging. *Get ready for the great purification!*  
(\*laughing)

It's a great time of healing. Yes, it can be a crisis - it's a healing crisis. Chiron brings on a healing crisis. So there's a crisis to make us aware of all the pollution, all of the shit in our bodies, uncleansed, not pure or how messed up we are. So that we can straighten up, lighten up, purify - and after a good cleanse, you feel frickin' awesome! This is a time if you play your cards right, you can get more done, and really create so much more healing and so much more beauty – really integrate yourself with the other and with spirit!

The Manta for this week is:

***In search for health and wellness,  
I have found the source of illness,  
As separation from the Oneness,  
That sows seeds of fear and darkness.***

Let's not forget the source of all disease and illness lies in blocked emotions and fears. These have their source in the roots. The roots of these are in the ego which believes itself to be separate from all that is. We are not separate from all that is. We can trust, we can open, we can love, we can let go. We do not need to grab on and freak out around security issues if we have faith, belief, trust and hope in the divine nature of our self and our bodies. So that true source of healing is getting into that sense of filling that void or that emptiness with spirit and love, and joining, reconnecting, uniting with the oneness!

One more time:

***In my search for health and wellness,  
I have found the source of illness,  
As separation from the Oneness,  
That sows seeds of fear and darkness.***

***Namaste, Aloha, So Much Love!***

***Kaypacha***
