

CLIENT CASE STUDY

Client Name:

Anne *

Age:

36 Years

Country:

USA

Time Trying to Conceive (TTC):

4 years

Case History Summary:

- Two miscarriages (one in second trimester)
- Endometriosis and adhesions
- Clomid and Femara use over 2 years
- 3 failed IUIs
- Postcoital test showed no sperm were moving
- Normal sperm parameters
- Low Testosterone
- Unexplained infertility
- Spotting before periods

Natural Treatment Summary:

Anne had an eight year old son from her first marriage and she wanted to have another baby with her new husband. After unsuccessfully trying for four years to get pregnant and the diagnosis of unexplained infertility she found me online and got in touch with me. Anne joined the program, ordered the supplements I prescribed and did the tests I recommended. It turned out her vagina was too hostile to the sperm, she also had frequent flare-ups of HPV and she tested positive for MTHFR gene mutation which predisposes to miscarriages.

Length of Treatment:

4 Months

Clinical Outcome:

Exactly four months after following the program and taking the supplements plus following the special protocol for her gene mutation, Anne got pregnant! She gave birth to a beautiful, healthy girl.
