

CLIENT CASE STUDY

Client Name:

Bettina *

Age:

33 Years

Country:

USA

Time Trying to Conceive (TTC):

Almost 2 Years

Case History Summary:

- Two miscarriages at 5 and 1/2 weeks
- Very low progesterone

Natural Treatment Summary:

Bettina contacted me after her second miscarriage. She already had one three year old son and wanted to complete her family with one more child. Bettina had a very high exposure to EM radiation and was exposing herself to endocrine disruptors in her home, at work and through her diet. She followed the program as well as my recommendations and she took the supplements I prescribed for her.

Length of Treatment:

3 Months

Clinical Outcome:

After three months on the program and the supplements Bettina got pregnant again and this time carried her baby to term. Using the knowledge she gained in the program she also kept a close watch over her hormones in the initial weeks of the pregnancy to ensure she doesn't miscarry again, and she didn't. She gave birth to a healthy baby boy.
