Transactive Energy Challenge Kickoff Workshop: ABB Inc.

- **Area of Interest:** Market-based Transactive Exchanges, Control of Distributed Energy Resources, Local Grid Management, and Coordination between Centralized and Distributed Resources.

- **Proposed Scenario:** Evaluate viable possibilities of TE through use cases, problem definition, and high-level functional architecture.

- **Impacts/Why:** Demonstrate economic and operational viability of TE across Centralized Generation, Transmission, Distribution, and Grid Edge Distributed Resources.

- **Partners Needed:** Potential partners for pilot projects to support the proposed scenarios.
